

**UNIVERSITY OF MUMBAI**

**Guidelines for assessment/ model answers and marking scheme**

**FYBCom Sem I (Program Code: 2C00141) Business Economics: Paper I (Paper Code: 80907)**

**Question Paper Code: 55701**

**Date of Examination: 3/12/2018**

**Max. Marks: 100**

The synoptic answers given below are broad guidelines provided so as to maintain uniformity and consistency in assessment of answers. Due credit should be given to candidates who provide neat diagrams, explanations and examples.

**1(A) Select the best answer from the given options and rewrite the statement (Any Ten)**  
**1 mark for each correct answer**

**(10)**

|                                   |   |
|-----------------------------------|---|
| i) c) uses an '=' symbol          | ii) c) the supply curve for computers shifts to the right                       |
| iii) c) Scarcity of resources     | iv) b) A and B are complements  |
| v) a) relatively elastic          | vi) b) Variations within a year time  |
| vii) b) Economies of localization | viii) a) uses less of any one of the inputs to produce the same level of output |
| ix) c) Diminishing returns        | x) c) cost of owned resources used  |
| xi) b) MC                         | xii) b) level of output where economic profit is equal to zero.                 |

**1. B) Write whether the following statements are true or false (Any Ten)**  
**1 mark for each correct answer**

**(10)**

|           |            |           |           |          |            |
|-----------|------------|-----------|-----------|----------|------------|
| i) True   | ii) False  | iii) True | iv) False | v) False | vi) False  |
| vii) True | Viii) True | ix) True  | x) True   | xi) True | xii) False |

**2. Attempt A and B OR C and D**

**A. Concept of market demand, concept of market supply, determination of equilibrium price- diagram and explanation**

**(07)**

**B.**

|                |     |     |     |     |     |     |      |
|----------------|-----|-----|-----|-----|-----|-----|------|
| Output (Units) | 1   | 2   | 3   | 4   | 5   | 6   | 7    |
| Price (Rs.)    | 100 | 90  | 80  | 70  | 60  | 50  | 40   |
| TR (Rs.)       | 100 | 180 | 240 | 280 | 300 | 300 | 280  |
| AR (Rs.)       | 100 | 90  | 80  | 70  | 60  | 50  | 40   |
| MR (Rs.)       | 100 | 80  | 60  | 40  | 20  | 0   | - 20 |

**(08)**

Monopoly (imperfect competition) since more units of output are sold by reducing the price – relationship between TR, AR and MR.

**OR**

**C. Opportunity cost principle, incremental and marginal concepts – meaning of each and use as basic tools.**

**(07)**

2

D.

| Price (Rs.) | Quantity demanded | Quantity supplied |
|-------------|-------------------|-------------------|
| 80          | 440               | 240               |
| 100         | 400               | 300               |
| 120         | 360               | 360               |
| 140         | 320               | 420               |
| 160         | 280               | 480               |

(08)

Equilibrium price is Rs. 120 and equilibrium quantity is 360 units where quantity demanded is equal to quantity supplied.

3. Attempt A and B OR C and D

- A. Relationship between elasticity of demand and revenue concepts – equations/formula, diagram and explanation. (07)
- B. Demand forecasting- meaning, Steps – identifying objectives, nature of product, determinants of demand, data collection, time period, method of forecasting, estimation, interpretation, etc. (08)

OR

- C. Demand curve under monopoly- downward sloping, steep – diagram and explanation. (07)  
Demand curve under oligopoly – kinked - diagram and explanation.
- D. Income elasticity of demand for cars is 2. Diagram (08)

4. Attempt A and B OR C and D

- A. Least cost combinations of factor inputs - Producer's equilibrium – where isoquant is tangent to iso cost. Diagram and explanation. Conditions: tangency, slope of isoquant is equal to slope of isocost, etc. (07)
- B. Economies of scale- meaning, external economies- localization, information, by-product, transport, marketing, vertical disintegration, etc. (08)

OR

- C. Law of returns to scale- statement, stages- diagram of expansion path and explanation (07)

D.

| Labour(Units) | 0                      | 1  | 2  | 3  | 4  | 5    | 6                        | 7     | 8     | 9                     | 10  |
|---------------|------------------------|----|----|----|----|------|--------------------------|-------|-------|-----------------------|-----|
| TP (Units)    | 0                      | 10 | 22 | 36 | 52 | 66   | 76                       | 80    | 82    | 82                    | 78  |
| AP (Units)    | 0                      | 10 | 11 | 12 | 13 | 13.2 | 12.67                    | 11.43 | 10.25 | 9.11                  | 7.8 |
| MP (Units)    | -                      | 10 | 12 | 14 | 16 | 24   | 10                       | 4     | 2     | 0                     | -4  |
| Stages        | I – Increasing returns |    |    |    |    |      | II - Diminishing returns |       |       | III- negative returns |     |

A rational producer will operate in stage 2 since MP is positive and TP is maximised

3

5. Attempt A and B OR C and D

- A. LAC – meaning, diagram of derivation and explanation, features- dish shaped, envelope curve, planning curve, represents least AC of producing various output levels in the long run, etc. (07)

B. (08)

| Output (Units) | 0   | 1   | 2   | 3     | 4   | 5   | 6     | 7     | 8    |
|----------------|-----|-----|-----|-------|-----|-----|-------|-------|------|
| TC (Rs.)       | 100 | 125 | 140 | 150   | 160 | 180 | 210   | 250   | 400  |
| TVC (Rs.)      | 0   | 25  | 40  | 50    | 60  | 80  | 110   | 150   | 300  |
| ATC (Rs.)      | -   | 125 | 70  | 50    | 40  | 36  | 35    | 35.72 | 50   |
| AVC (Rs.)      | -   | 25  | 20  | 16.67 | 15  | 16  | 18.33 | 21.43 | 37.5 |
| MC (Rs.)       | -   | 25  | 15  | 10    | 10  | 20  | 30    | 40    | 150  |

OR

- C. Break-even point – meaning -  $TR = TC$ , diagram and explanation - shift in TFC curve upwards/ downwards, resultant shift in TC curve and therefore change in breakeven point. (07)
- D. i) 250    ii) 400    iii) 200    iv) 500

6. Attempt A and B OR Write short notes on any four

- A. Law of demand – statement and explanation. Determinants - price of commodity, price of related goods, income of consumer, tastes, habits, preferences, size and composition of population, advertisements, fashion, customs, consumers' expectations, weather conditions, etc. (10)
- B. Isoquant – meaning and properties – negative slope, convex to origin, do not intersect, do not touch any axis, oval-shaped (ridge lines), etc.- diagrams (10)

OR

Write short notes on any four ( 5 marks each) (20)

- i) Use of marginal analysis – meaning and use in decision making
- ii) Cross elasticity of demand- meaning, measurement and implications
- iii) Isocost line – meaning, diagram and slope
- iv) Economies of scope – meaning, measurement and implications
- v) Relationship between AC and MC - meaning, diagram and explanation
- vi) Learning curve – meaning, diagram and explanation

\*\*\*\*\*
