1.4 Feedback System				
1.4.1 Whether structured feedback received from all the stakeholders.				
1) Students	2) Teachers	3) Employers	4) Alumni	5) Parents
Yes	Yes	Yes	Yes	Yes
1.4.2 How the feedback obtained is being analyzed and utilized for overall development of the institution? (maximum 500 words)				
Analysis of this feedback contributes to improvement in terms of Teaching Methods, Teaching-Learning Process, Examination Process, Industrial Visits, Guest Lecture Arrangements, Revision in Syllabus, New Course Formation, Help in On Job Training and Internships, Projects etc.				

However some departments have their individual best practices in this aspect. Some of which are (a) Student's feedback is always discussed in the Faculty meeting of the Department and the issues if any are resolved in the interest of the students, (b) A written analysis by faculty about the feedback and actions to be taken on further development, (c) The Director/Head may discuss the feedback with the faculty individually, (d) Each Departmental IQAC has student representative who also provide direct feedback and inputs, which are then discussed and implemented in the best possible way and (e) Each Departmental IQAC has teacher representative who also provide direct feedback and inputs, which are then discussed and implemented in the best possible way.

1.4.3. Curricula developed/ adopted have relevance to local/ national/ regional/ global developmental needs with learning objectives including programme outcomes, programme specific outcomes and course outcomes of all the programme offered by the university (maximum 500 words)

Various Departments and Institutes have attended to developmental needs at various levels; theoretical, research and training level. Teaching faculty ensures a multidisciplinary approach towards their learning outcomes, in order to make it practically relevant. Programme outcomes cater to the industry for e.g. the biotechnology curricula would introduce topics like Plant Tissue Culture (PTC) and Animal Tissue Culture (ATC) cater to which Tissue culture industry. Students are also prepared to understand industry specific needs and related entrepreneurial skills. The course outcome directly translates into effective placements in industries, academia and research institutes. Many students also qualify and are absorbed by Universities abroad for higher education. To make the course locally relevant students also engage in extension activities through collaborative efforts as a part of their programme. For example the Alkesh Dinesh Mody Institute has conducted Organ Donation Drive in association with Nanavati Hospital & Speciality Care. The Institute also conducted Joy of Giving Drive wherein people have donated their books, toys and clothes for under privileged section of the society. Based on the discipline courses are designed to meet the needs of the industry such as commerce, management, banking and finance, accountancy and taxation etc. as well as the society such as understanding environment conservation, Human Rights in the Global Context, Women and Political Representation, Democracy, Pluralism and Citizenship etc. The Language based courses are designed to not only develop language proficiency but to understand the rich literary traditions, cultural know how, translation skills and research competence. Understanding the use of technology in the field is a central learning objective for e.g. a Computer Science Student would engage with ideas such as robotics and artificial intelligence, while a geography student would engage with the application of Remote Sensing and Geographic Information System, and a psychology student would learn to design their cognitive psychology experiments using computer based applications. The Choice based Credit System introduced mainly in this academic year gives students the opportunity to exercise choice in their learning goals, and also look out for interdisciplinary, ability enhancement and project based courses.

1.4.4. Institution integrates cross cutting issues relevant to Gender, Environment and Sustainability, Human Values and Professional Ethics into the Curriculum (Maximum 500 words)

Many courses have addresses issues of Environment and Sustainability, such as courses on Environmental Biotechnology, Conservation Psychology, Economics of Climate Change, Green Computing, Environment Management or a course in Political Science on Environment Conservation and Development in India. Gender and other socially relevant themes addressing human values are common across coursework and curricula in issues of human rights, political representation, feminist theories and literature, dalit literature, multiculturalism, security and terrorism, peace studies, social justice and equality, power and inequality, social class and caste

etc. These themes find space not only in literature and academic discourse, but also in disciplines acting through the medium of folk art, music, poetry, theatre etc. Students also through field based projects, field work, internships engage in social outreach programs which inculcate social sensitivity and human values. Every discipline includes in its academic programme both relevant professional and research ethics, based on standards and guidelines prescribed as best practices in the academic field.

6.2 Strategy Development and Deployment

6.2.1 Quality improvement strategies adopted by the institution for each of the following (with in 100 words each):

- ❖ *Curriculum Development:* The curriculum/ syllabus have been developed based on choice based credit system. Project based courses, interdisciplinary courses and ability enhancement courses have been introduced, along with new elective papers to carter to advancements in each field of study and related

industries. Latest books and journal articles are introduced in the reading and reference list to keep the learner upto date with contemporary literature in the field of study. The syllabus of the courses offered by the Institute is approved by the BOS of various subjects of University of Mumbai. Some faculty members have been part of the BOS and have actively contributed in the curriculum development. In line with the approved syllabus and requirements mentioned in it course teachers plan out teaching methods, class activities and outside the class activities internships, field visits other form of practical exposures.

- ❖ *Teaching and Learning:* The faculty members actively use ICT in their teaching methods. Majority of teachers use at least PPTs and audio-visual clips to aid their teaching. Faculty members use case study, student presentation and group presentation and assignment method to improve teaching-learning outcome. Teachers follow a democratic style of teaching-learning experience, where in student reading, participation, inputs to understanding are encouraged to make learning a two way, rather than a one way process. Remedial classes and additional contact hours are also assigned to meet individual needs of students, or special needs of a small group of students. Seminars, Guest lectures, Video recording of Lectures uploaded online, Workshops are organized, to enhance learning process.

- ❖ *Examination and Evaluation:* Internal evaluation is conducted by course teachers and can vary from student presentations, internal test, submission of assignments or other forms depending on the requirement of the course. University teachers actively participate as members of Examination committee to ensure smooth conduct of examinations, through paper setting, translation, evaluation and moderation of papers and also being present to answer queries in the control room on the day of their respective papers. Papers (Non-language courses) are available in English and translated in Marathi to assist regional language speaking students. Online Assessment and Evaluation through On-Screen Marking (OSM) is carried out to ensure that there is no scope for ‘malpractices’ in generating results with obtained marks.

- ❖ *Research and Development:* University provides minimal grants for supporting minor research projects, Shashtri Indo-Canadian Organisation. Faculty are encouraged to take up major and minor projects funded by UGC, DST, Shashtri Indo-Canadian Organisation, ICSSR etc. University provides all support for research and development like sanctioning duty leaves, encouraging faculty to interact with faculty from other institutions, including those from abroad. Research seminars, symposiums, can be partially funded by departmental budgetary provisions. Several workshops are also conducted to train, enhance and update research skills of research scholars and faculty alike. The research culture in the University is enhanced through the various seminars, symposiums and conferences which are held on a regular basis through out the year, where in cross-disciplinary participation is encouraged.

- ❖ *Library, ICT and Physical Infrastructure / Instrumentation:* The University has two central libraries in the fort campus and Kalina campus which is partially digitalised using softwares like ‘opac’ to manage a catalogue and access to books. The library also provides access to e-database. Apart from which many departments also house independent departmental libraries, with budgetary provisions to purchase subject specific books. Every departmental infrastructure is well equipped with LAN, Wifi, LCD Projectors, Laptops and Required softwares. The University also houses the Western region Instrumentation Centre, has a University Computerisation Centre and AMC’s with external organisations for maintenance of instrumentation and ICT based infrastructure.

- ❖ *Human Resource Management:* TAU (Teachers Appointment Unit) and Establishment Section (Staff Appointment) are the relevant sections that handle the appointments at University level. University sometimes also considers the temporary appointments on basis of requirement and recommendation of Institute. The temporary appointments are for period of six-six months for non-teaching staff. Extension is granted with some break period in between two extension periods. Based on requirement and work load of the teaching staff, budgetary provisions are in place to rope in visiting faculties with different expertise to meet the teaching-learning demands. The University upon consideration may also appoint adhoc faculty (contractual positions). Retired teaching faculty may be given a honorary

<p>position of adjunct faculty. Most departments also have positions of research assistants appointed on a full time basis, to assist in regulating academic work and processes. The Women Development Cell not only organises programmes on Gender Sensitisation and sexual harrasement, but looks into cases of sexual harassment at the workplace. Teaching faculty are encouraged to participate in academic-development programmes like orientation course, refresher course, short term training programmes, summer schools, winter schools and training workshops. Many of which may also be alumni of the University. Industry linkages optimize internship programmes, on field training, and field visits. The industry linkages also act as shadowing exposures which help students shape their career. For e.g. the Academy of Theatre arts has tie ups with the Marathi and Hindi theatre and Film industry, that acts as a plus point for the passout students for understand different career roles and make important career decisions. Industry linkages also facilitate placement drives and initiatives.</p>

1. Preliminary Energy Audit was carried during year 2016-2017 by Dr. Suhas Jejurikar from the National Centre for Nanoscience and Nanotechnology and his team. Following buildings were considered for the audit 1. National Centre for Nanoscience and Nanotechnology Building, 2. Pherozeshah Mehta Bhavan, 3. C.D. Deshmukh Bhavan, 4. Green Technology Building, Department of Biophysics Building and Savitribai Phule Girls Hostel Building. During the energy audit, load was allowed and actual load was calculated physically and a comparison of electrical consumption in the electrical bills from last 12 months was carried out. Load per building, per floor, per electrical appliance/ equipment was calculated. It was observed that the actual load increased for few departments due to lights, light fixtures used, air conditioning system (not maintained timely), old connecting wires as well as tapping electrical connections, use of lifts, etc. Suggestions are given to replace existing lights with LEDs, use of electricity while required, use of air conditioning with regular maintenance and topping cooling gas, appreciate use of lifts provided, avoid unauthorized connections, replacement of problematic light fixtures, etc. Use of solar energy is highly recommended in order to reduce the existing cost of energy.
2. Clean campus initiative was Dr. Varsha Kelkar Mane from the Dept. of Biotechnology audited certain issues in regards to keeping the campus clean in lines with the SWM rules published In the Gazette of India, Part---II, Section-3, Subsection (ii) Ministry of Environment, Forest and Climate Change
