## Preamble

This syllabus is framed as per National educational policy (NEP2020) to provide in depth basic knowledge with understanding of statistics subject to undergraduate students of first year of three-year Bachelor of Science degree course. The field of Statistics addresses how to collect, analyze and interpret results of collected data. There is growing demand for highly skilled statisticians in the 21<sup>st</sup> century in many fields including government, banking sector, health sciences, veterinary sciences, agricultural sciences, business and social sciences etc.

The course mainly focuses on how to gain core knowledge of subject and train students to solve real life problems. The course will be benefitting students for shaping their future as data scientist, Business analyst, Biostatisticians, investigators and teachers in government and private organization.

The thrust of the course is to prepare students to enter a promising professional life even after graduation, as also provide to them a platform for pursuing higher studies leading to post-graduate or doctorate degrees.

## Objectives of the Programme.

1. To train the students to solve real life problems using statistical techniques.
2. Statistics graduates cultivate professional and ethical attitudes with effective communication skills, teamwork and multidisciplinary approach related to data analysis.
3. Statistics graduates shall be suitably employed in Central/State government organizations, financial and banking industries, corporate and insurance sectors for data analysis and drawing conclusions for socio-economic issues.
4. Statistics graduates can pursue Master's studies in Statistics, Quantitative Finance, Data Science, Operations Research, Actuarial Science and Population Studies in leading universities in India and abroad
5. To create a skilled workforce to meet the requirements of the society.

## Learning Outcome: Student will learn

1. To understand the basic concepts of data and scale of measurement of data.
2. To understand comparison of data by using measures of central tendency and dispersion.
3. To explore relationship between two or more variables and predict the value by regression analysis.
4. To study probability structure of Discrete and continuous random variables for discrete and continuous distributions.
5. To make inferences about population from sample data.
6. To enable use of statistical techniques in time series, industry, demography, etc.
7. To understand and develop skill to solve real life problems by using MS Excel, R-programming.

### • Structure of the course

The Board of Studies in Statistics, University of Mumbai, Mumbai in its meeting held on 20<sup>th</sup> November 2023 have discussed, finalized and unanimously accepted the revised syllabus as per NEP2020 prepared by committee. The titles of the papers for F. Y. B. Sc. (Statistics) are as given below.

## 5) Credit Structure of the Program (Sem I, II, III, IV, V & VI)

### Under Graduate Certificate in Statistics.

#### Credit Structure (Sem. I & II)

**Mandatory  
Sem-I**

**Course Name: Fundamentals of Statistics**

**Type: Theory**

**Vertical: Major**

**Credit: 2 credit**

**Hours allotted: 30 hrs**

(1 credit= 15 Hours for Theory or 30 Hours of Practical work in a semester)

**Marks: 50**

| SEMESTER 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                     |          |

**Format of Question Paper:**

**Internal Continuous Assessment: (20 marks)**

| <b>Assignment/viva</b><br>Quizzes, Class Tests, presentation,<br>project, assignment etc | <b>Class Test</b> | <b>Total</b> |
|------------------------------------------------------------------------------------------|-------------------|--------------|
| 05                                                                                       | 15                | 20           |

**Semester End Examination: (30 marks)**

Semester End Examination will be of 30 marks of 01 hour duration covering entire syllabus of the semester. Examiners should frame sub questions for Q.1, Q2 and Q3. Each question carrying 15 marks. Attempt any two out of three questions.

**Theory Question Paper Pattern:**

|     |                |                                          |
|-----|----------------|------------------------------------------|
| Q 1 | Max. marks: 15 | Attempts any two questions out of Three. |
| Q 2 | Max. marks: 15 |                                          |
| Q 3 | Max. marks: 15 |                                          |

## Skill Enhancement Course (SEC)

### Semester-I

### Skill Enhancement Course(SEC)

**Name of The Course: Statistical Analysis using Microsoft SQL-I**

| Sr.No. | Heading                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Particulars |

| 1      | <b>Description the course:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |             |
|        | <b>Introduction:</b> The SQL (structured query language) programming language is often used to pull data from the various tables in a database and to assemble the data in a format amenable to statistical analysis or review. The purpose of this course is to teach students how to extract data from a relational database using SQL so they can perform statistical operations.<br>The focus is on structuring queries to extract structured data (not on building databases or methods of handling big data). This is an introductory course that will help students think “like” a relational database in order to manipulate matrices and vectors of data using SQL queries. It covers all techniques and tools used to collect all type of data, organize, manipulate, analyse and present it |             |
|        | <b>Usefulness:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |             |

### Format of Question Paper:

#### Internal Continuous Assessment: (20 marks)

| Assignment/viva<br>Quizzes, Class Tests, presentation,<br>project, assignment etc | Class Test | Total |
|-----------------------------------------------------------------------------------|------------|-------|
| 05                                                                                | 15         | 20    |

#### Semester End Examination: (30 marks)

Semester End Examination will be of 30 marks of 01 hour duration covering entire syllabus of the semester. Examiners should frame sub questions for Q.1, Q2 and Q3. Each question carrying 15 marks. Attempt any two out of three questions.

#### Theory Question Paper Pattern:

|     |                |                                          |
|-----|----------------|------------------------------------------|
| Q 1 | Max. marks: 15 | Attempts any two questions out of Three. |
| Q 2 | Max. marks: 15 |                                          |
| Q 3 | Max. marks: 15 |                                          |

**Mandatory  
Sem-II**

**Course Name: Statistical Methods.**

**Type: Theory**

**Vertical: Major**

**Credit: 2 credit**

**Hours allotted: 30 hrs**

(1 credit= 15 Hours for Theory or 30 Hours of Practical work in a semester)

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                     |

**Format of Question Paper:**  
**Internal Continuous Assessment: (20 marks)**

| <b>Assignment/viva</b><br>Quizzes, Class Tests, presentation,<br>project, assignment etc | <b>Class Test</b> | <b>Total</b> |
|------------------------------------------------------------------------------------------|-------------------|--------------|
| 05                                                                                       | 15                | 20           |

**Semester End Examination: (30 marks)**

Semester End Examination will be of 30 marks of 01 hour duration covering entire syllabus of the semester. Examiners should frame sub questions for Q.1, Q2 and Q3. Each question carrying 15 marks. Attempt any two out of three questions.

**Theory Question Paper Pattern:**

|     |                |                                          |
|-----|----------------|------------------------------------------|
| Q 1 | Max. marks: 15 | Attempts any two questions out of Three. |
| Q 2 | Max. marks: 15 |                                          |
| Q 3 | Max. marks: 15 |                                          |

## Mandatory

|           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                     |

| <b>Marks Allotted:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <b>50 marks</b>                             |
| <b>Course Objectives:</b><br><b>Students will able to,</b><br>CO 01. Know about advance concepts of MS-Excel.<br>CO 02. Know how to write a macro in MS-Excel.<br>CO 03. Learn advance statistical functions of MS-Excel.                                                                                                                                                                                                                                                           |                                             |
| <b>Course Outcomes</b><br><b>On successful completion of the course Students Should be able to,</b><br>OC 01. Know how to sort, filter in MS-Excel.<br>OC 02. Know lookup, referencing and logical functions.<br>OC 03. Know drawing scatter diagram and fit a simple linear regression using MS-Excel.<br>OC 04. Know plotting of probability functions of standard statistical distributions.<br>OC 05. Solve testing problems for one and two populations based on large sample. |                                             |
| <b>Modules</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                             |
| <b>Module I</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Advance concepts of MS-Excel.               |
| <b>Module II</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Advance Statistical analysis using MS-Excel |

| •                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                             |

## Detailed Syllabus

### Course Name: Data Analysis Using Advance Excel

| Module |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Number of lectures |
|--------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| I      | Advance concepts of MS-Excel. <ul style="list-style-type: none"> <li>• Sorting, filtering, lookup and reference functions, logical functions,</li> <li>• Writing macro</li> <li>• advanced statistical functions like count, countif, countblank, maxifs, minifs, frequency, averageif, averageifs, confidence.norm, intercept.</li> </ul>                                                                                                                                                                                     | 30                 |
| II     | Advance Statistical analysis using MS-Excel <ul style="list-style-type: none"> <li>• Scatter diagram, correlation, simple linear regression, (pearson, correl,</li> <li>• Finding probabilities (prob), pmf/pdf, cdf plots for different parameters for binomial, Poisson, hypergeometric, normal distributions. Plots for convergence of binomial to Poisson, plots for application of central limit theorem (norm.dist, norm.inv, norm.s.dist, norm.s.inv, binom.dist, hypgeom.dist)</li> <li>• Large sample test</li> </ul> | 30                 |

## Format of Question Paper:

### Internal Continuous Assessment: (20 marks)

| Assignment/viva<br>Quizzes, Class Tests, presentation,<br>project, assignment etc | Class Test | Total |
|-----------------------------------------------------------------------------------|------------|-------|
| 05                                                                                | 15         | 20    |

### Semester End Examination: (30 marks)

Semester End Examination will be of 30 marks of 01 hour duration covering entire syllabus of the semester. Examiners should frame sub questions for Q.1, Q2 and Q3. Each question carrying 15 marks. Attempt any two out of three questions.

#### Theory Question Paper Pattern:

|     |                |                                          |
|-----|----------------|------------------------------------------|
| Q 1 | Max. marks: 15 | Attempts any two questions out of Three. |
| Q 2 | Max. marks: 15 |                                          |
| Q 3 | Max. marks: 15 |                                          |

**Semester-II**  
**Skill Enhancement Course(SEC)**  
**Name of The Course: Statistical Analysis using Microsoft SQL-II**

| Sr.No. | Heading                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Particulars |

| 1      | <p><b>Description the course:</b></p> <p><b>Introduction:</b> The SQL (structured query language) programming language is often used to pull data from the various tables in a database and to assemble the data in a format amenable to statistical analysis or review. The purpose of this course is to teach students how to extract data from a relational database using SQL so they can perform statistical operations.</p> <p>The focus is on structuring queries to extract structured data (not on building databases or methods of handling big data). This is an introductory course that will help students think “like” a relational database in order to manipulate matrices and vectors of data using SQL queries. It covers all techniques and tools used to collect all type of data, organize, manipulate, analyse and present it</p> <p><b>Usefulness:</b></p> <ul style="list-style-type: none"> <li>• SQL is a unique program, designed with inputs from eminent academicians and industry leaders, to focus on building skillsets for the growing requirement of data scientists in the industry.</li> <li>• SQL is widely used in business and in other types of <a href="#">database administration</a>.</li> <li>• This course focuses on applied as well as theoretical aspects of Statistics along with subjects from Economics, Mathematics, Computers, IT, Commerce, Arts &amp; Analytics.</li> <li>• Extensive use of SQL to solve practical problems and projects.</li> <li>• Opportunity to improve soft skills as well as scientific writing.</li> <li>• SQL upgrade students at par with international standards.</li> </ul> <p><b>Application, and Demand</b></p> <ul style="list-style-type: none"> <li>• Finance Industry: Financial Reporting, Risk Management, and regulatory Compliance.</li> <li>• Marketing and Social Media: Market research, consumer behaviour analysis.</li> <li>• Business statistics are used improve product quality, minimize defects, and optimize manufacturing processes.</li> <li>• It is used as Database Administration in Healthcare: <b>Electronic Health Records, Data Retrieval and Analysis, Quality Improvement and Administrative Tasks.</b></li> <li>• Music industry: User optimizer analysis, <b>Metadata Storage</b> and predictive data analyst.</li> </ul> <p><b>Job Prospects:</b><br/> SQL is used in <b>marketing, healthcare, and finance for data and business analytics, development, and data science.</b></p> <p><b>Connection with Other Courses:</b> This course focuses on applied as well as</p> |             |

|   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                             |

**Format of Question Paper:****Internal Continuous Assessment: (20 marks)**

| Assignment/viva<br>Quizzes, Class Tests, presentation,<br>project, assignment etc | Class Test | Total |
|-----------------------------------------------------------------------------------|------------|-------|
| 05                                                                                | 15         | 20    |

**Semester End Examination: (30 marks)**

Semester End Examination will be of 30 marks of 01 hour duration covering entire syllabus of the semester. Examiners should frame sub questions for Q.1, Q2 and Q3. Each question carrying 15 marks. Attempt any two out of three questions.

**Theory Question Paper Pattern:**

|     |                |                                          |
|-----|----------------|------------------------------------------|
| Q 1 | Max. marks: 15 | Attempts any two questions out of Three. |
| Q 2 | Max. marks: 15 |                                          |
| Q 3 | Max. marks: 15 |                                          |

**C) Practical Question Paper Pattern PER PRACTICAL COURSE:**

|  |                             |                  |       |
|--|-----------------------------|------------------|-------|
|  | Time : 2 hours              | Total marks = 50 | Marks |
|  | Practical Based on Paper    |                  | 40    |
|  | Journal and viva voce       |                  | 10    |
|  | Grand Total Practical Marks |                  | 50    |

A student must have a certified journal before appearing for the practical examination.

In case a student does not possess a certified journal, he/she is not qualified for journal marks

For each paper minimum 75% of the practical must be completed to the journal certified.

**Letter Grades and Grade Points:**

| Semester GPA/ Programme<br>CGPA Semester/ Programme | % of Marks       | Alpha-Sign/<br>Letter Grade Result | Grading<br>Point |
|-----------------------------------------------------|------------------|------------------------------------|------------------|
| 9.00 - 10.00                                        | 90.0 - 100       | O (Outstanding)                    | 10               |
