

University of Mumbai

No. AAMS_UGS/ICC/2024-25/178

CIRCULAR:-

Attention of all the Principals of the Affiliated Colleges, Directors of the Recognized Institutions is invited to this office Circular No. AAMS_UGS/ICC/2024-25/115 dated 23rd August, 2024 relating to the introduction of the syllabus of M3 Pattern (Scheme –III) Major 4 Credits Science Programs.

They are hereby informed that the recommendations made by the Board of Deans at its meeting held on 23rd October, 2024 vide item No. 6.2 (N) has been accepted by the Hon'ble Vice Chancellor as per the powers confirmed upon him under Section 12(7) of the Maharashtra Public Universities Act, 2016 and that in accordance therewith the syllabus of **M1, M2 Pattern (Scheme –II)** of following Science Programs is introduced as per appendix (NEP 2020) with effect from the academic year 2024-25.

M1, M2 Pattern (Scheme –II)

- 1) B.Sc. (Botany) Sem. I & II
- 2) B.Sc. (Mathematics) Sem. I & II
- 3) B.Sc. (Zoology) Sem. I & II
- 4) B.Sc. (Physics) Sem. I & II
- 5) B.Sc. (Microbiology) Sem. I & II

(The said circular is available on the University's website www.mu.ac.in).

MUMBAI – 400 032

30th October, 2024

To,

(Dr. Prasad Karande)
REGISTRAR

All the Principals of the Affiliated Colleges, Directors of the Recognized Institutions.

BOD/6.2 (N)/23/10/2024

Copy forwarded with Compliments for information to:-

- 1) The Chairman, Board of Deans,
- 2) The Dean, Faculty of Science & Technology,
- 3) The Chairman, Board of Studies,
- 4) The Director, Board of Examinations and Evaluation,
- 5) The Director, Department of Students Development,
- 6) The Director, Department of Information & Communication Technology,
- 7) The Director, Institute of Distance and Open Learning (IDOL Admin), Vidyanaagari.
- 8) The Deputy Registrar, Admissions, Enrolment, Eligibility & Migration Department (AEM).

Preamble

1) Introduction

The National Education Policy 2020 emphasizes upon quality education for development, self-learning aptitude, scientific temper moral values and social responsibilities in students. The FYBSc syllabus has been designed as per the objectives and guidelines of National Education Policy 2020.

2) Aims and Objectives

The syllabus aims in imparting knowledge related to Plant Sciences, Current trends and advanced developments in the field of Plant Sciences and its interdisciplinary branches.

The objectives of the syllabus are to enable learners to understand the basic concepts of Botany.

3) Learning Outcomes

The Semester I and II will culminate in students acquiring the following skills:

- a. Identify the major groups of organisms amongst plants and be able to classify them.
- b. Compare and contrast the characteristics of plants.
- c. Understand ecological interconnectedness and genetics.
- d. Apply the ayurvedic knowledge gained for common ailments.
- e. Demonstrate proficiency in the experimental techniques.

4) Any other point (if any)

The present syllabus also aims to develop Entrepreneur skills and Research aptitude in the learners.

5) Credit Structure of the Program (Sem I, II, III, IV, V & VI)

Undergraduate Certificate in Botany

Credit Structure (Sem. I & II)

	R: _____A										
Level	Seme ster	Major (M 1)		Minor (M 2)	OE	VSC, SEC (VSEC)	AEC, VEC, IKS	OJT, FP, CEP, CC, RP	Cum. Cr. / Sem.	Degree/Cu m.Cr.

Sem. – I

Syllabus

B.Sc. (Botany)

(Sem.- I)

Course Objectives (CO): To enable the students

- CO 1.: Recognize different plant types
- CO 2.: Understand the concept of plant communication, plant defense mechanism, and Aesthetic Botany.
- CO 3.: Comprehend the role of plants in providing food, significance of microgreens, plant-derived beverages like tea, coffee, and squash.
- CO 4.: Explore the diverse applications of plants in everyday products, traditional uses of plants in cultural practices.
- CO 5.: Acquire the knowledge of hydroponics and aeroponics, vertical gardening, *Spirulina* farming

Course Outcomes (OC): The learner will be able to

- OC 1.: Differentiate plant types.
- OC 2.: Describe the concept of plant communication, plant defense mechanism, and Aesthetic Botany.
- OC 3.: Explain the role of plants in providing food, the significance of microgreens, and plant-derived beverages like tea, coffee, and squash.
- OC 4.: Utilize plants in everyday products, and traditional cultural practices.
- OC 5.: Illustrate the techniques of hydroponics and aeroponics, vertical gardening, and *Spirulina* farming.

Course I

Name of the Course: Plant Science and Human Welfare

30 Hours

Credits: 2

Module-1: Plant Science (15 Lectures)	
1. Biodiversity and Significance of Plants	5 Lectures
1.1.1. General classification of plants. 1.1.2. Various plants types: Herb, Shrub, Tree, Climbers, Creepers. 1.1.3. Botanical marvels: Pitcher plant (<i>Nepenthes</i>), Sun dew (<i>Drosera</i>), Touch-me-not (<i>Mimosa</i>), <i>Rafflesia</i> , <i>Cuscuta</i>	
2. Interesting Facts about plants:	5 Lectures
1.2.1. Do plants talk? (Communication in plants) 1.2.2. Plant movements (example- flower, tendrils etc.) 1.2.3. Plant Defense and mimicry.	
3. Aesthetic and Traditional Aspects of Plants	5 Lectures
1.3.1. Aesthetic Botany: Concept, Significance 1.3.2. Gardens and landscapes (Indoor gardening, Terrace and gallery gardening) 1.3.3. Traditional practices involving plants (Example- Banana leaves, coconut, Rice etc.)	
Module-2: Plants in Human Welfare (15 Lectures)	
1. Plants as Food	5 Lectures
2.1.1. Plants as Food (Root, stem, leaves, tuber, corm, flower, rhizome, fruit, seed used as food with one example) 2.1.2. Microgreens (Fenugreek, Wheatgrass etc.) 2.1.3. Plant derived beverages (Tea, Coffee and Squash)	
2. Plants in Daily Life	5 Lectures
2.2.1. Plants used for cosmetics, perfumes, ecofriendly colours, fabrics, soap, shampoo, toothpaste. 2.2.2. Plants used in sports and musical instruments, building infrastructure, furniture, writing- drawing. 2.2.3. Importance of Medicinal Plants - Amla, Brahmi, Chakramuni (Multivitamin plant) and <i>Stevia</i> (Madhuparni).	
3. Next Generation Plant Cultivation	5 Lectures
2.3.1. Hydroponics and Aeroponics 2.3.2. Vertical gardening 2.3.3. <i>Spirulina</i> farming	

Reference books:

1. "Botany for the Future" by Peter H. Raven
2. "Medicinal Plants: A Comprehensive Guide" by S. K. Jain
3. "Plant Physiology" by Lincoln Taiz and Eduardo Zeiger
4. "The Physiology of Flowering Plants: Their Growth and Development" by Roger F. E. Schumacher –
5. "Edible Medicinal and Non-Medicinal Plants: Volume 1, Fruits" by T. K. Lim
6. "Landscaping principles and practices" by Jack E. Ingels
7. "Hydroponics: The Essential Hydroponics Guide: A Step-By-Step Hydroponic Gardening Guide to Grow Fruit, Vegetables, and Herbs at Home" by Andy Jacobson
8. "Vertical Gardening for Beginners: Ideas for Growing Beautiful Space-Saving Gardens Indoors and Outdoors" by Julie Ruth
9. "*Spirulina* in Human Nutrition and Health" by M. E. Gershwin and Amha Belay

**Internal Continuous Assessment:
40% (20 marks)**

Field report, Assignments,
Presentation and Quiz

**Semester End Examination: 60%
(30 marks)**

Any 2 questions out of 4 (15 marks each)

Course II

Name of the Course: Practical- I

60 Hours

Credits: 2

Microscopy

- Handling of compound microscope and Dissecting microscope

Cryptogamic Botany

- Study of vegetative and reproductive structures of *Zygnema*.
- Study of vegetative and reproductive structures of *Rhizopus*.
- Study of vegetative and reproductive structures of *Riccia*.

Introduction to microbial techniques

- Gram staining of Bacteria.
- Aseptic techniques, preparation of media (PDA, NA), preparation of plates and slants. (Demonstration)

Entrepreneurship skills

- Prepare Face mask, Gel, Lotion using botanicals.
- Mushroom cultivation (Demonstration).

Nature Exploration and Digital skills (Internal assignments ANY ONE)

- Field Visit: Exploration of Natural Biodiversity
- Blog writing on Field visits.
- Digital photography.
- Short film on Nature and Biodiversity.

Vocational Skill Courses

Name of the Course: Entrepreneurial Botany 60 Hours Credits:02

Course Objectives (CO):

- CO 1. To enable the students, learn the different algal and fungal cultivation practices.
- CO 2. To enable the students, develop the skills of designing and carving of natural material.
- CO 3. To enable the students, understand the making of aroma candles and incense sticks.
- CO 4. To enable the students, comprehend the process of preparing herbal teas, natural dyes, organic pesticides, and composting.
- CO 5. To enable the students, prepare business plan, marketing strategies and branding products.

Course Outcomes (OC): Learner will be able to

- OC 1. Practice the different algal and fungal cultivation practices.
- OC 2. Develop the skills of designing and carving of natural material.
- OC 3. Understand the making of aroma candles and incense sticks.
- OC4. Comprehend the process of preparing herbal teas, natural dyes, organic pesticides, and composting.
- OC 5. Prepare business plan, marketing strategies and branding products.

List of Practicals:

1. To study the process of Mushroom Cultivation.
2. To study the techniques of Spirulina Farming.
3. Designing of jewellery using natural material. (Bio jewellery)
4. Vegetable and Fruit Carving techniques.
5. Preparation of Jam, Jelly, Squash.
6. Preparation of ketchup, Pickles, Candies.
7. To study the technique of Resin Art using plant material.
8. Making of Aroma candles.
9. Making of incense sticks.
10. Making of eco-friendly articles.
11. To study the technique of growing Microgreens.
12. Preparation of Herbal teas.
13. Preparation of Natural Dyes.
14. Preparation of organic pesticides.
15. To study the process of Composting.
16. Preparation of Business Plan.
17. Drafting of Marketing strategies.
18. Product Branding.

Vocational Skill Courses

Name of the Course: Indoor Gardening 60 Hours Credits:02

Course Objectives (CO):

- CO 1. To enable students, identify indoor plants, suitable containers, soils and growth media to grow them.
- CO 2. To enable students, learn different methods and techniques of potting, repotting of indoor plants.
- CO 3. To train students, in care and maintenance of indoor plants.
- CO 4. To enable students, control and manage the insect pests affecting indoor plants.
- CO 5. To enable students, prepare different types of indoor gardens.

Course Outcomes (OC): Learner will be able to

- OC 1. Identify indoor plants, suitable containers, soils and growth media to grow them.
- OC 2. Perform different methods and techniques of potting, repotting of indoor plants.
- OC 3. Take care and maintain the indoor plants.
- OC 4. Control and manage the insect pests affecting indoor plants.
- OC 5. Prepare different types of indoor gardens.

List of Practicals:

1. To Study of different Indoor plants: Foliage and flowering plants.
2. To Study of different types of containers and equipments used in indoor gardening.
3. Selection of soil and media for indoor plants.
4. To Study different methods of application of plant growth regulators.
5. Types of accessories used in indoor gardening.
6. Methods of growing indoor plants: Potting.
7. Technique of Repotting of indoor plants.
8. Care and Maintenance of Indoor plants.
9. Insect pest and their control.
10. Preparation of Terrarium/ Bottle Garden.

11. Preparation of Dish Garden.
12. Preparation of kokidama.
13. Techniques of Growing indoor plants in Different Medias. (Soil, Sand, Sphagnum moss etc.)

Reference Books

1. Complete Gardening in India – Gopal Swamiengar
2. Complete Home Gardening – Dey, S.C.
3. Floriculture and Landscaping – Bose, T.K.
4. Floriculture and Landscaping – Deshraj
5. Floriculture in India – Randhawa and Mukhopadhyay
6. Introduction to Landscaping, Designing, Construction and Maintenance – Ronald J. Biondo and Charles B. Schroder
7. Landscape Gardening & Design with Plants – Supriya Kumar Bhattacharjee 8)
Landscaping principles and practices – Jack E. Ingels
8. The Art of Home Landscaping. Eckbo, G. 1956.

Vocational Skill Courses

Name of the Course: Gardening and Management 60 Hours Credits:02

Course Objectives (CO):

- CO 1. To enable the students, recognise and use the Horticulture and gardening tools.
- CO 2. To enable students, understand the making and caring of Lawns.
- CO 3. To enable students, identify suitable horticulture plants for plantation in different seasons, and locations.
- CO 4. To enable students, learn different vegetative propagation techniques, irrigation methods, pruning practices and garden management techniques.
- CO 5. To enable students, know the common diseases and pests of horticulture plants and use of organic and biopesticides to control them.

Course Outcomes (OC): Learner will be able to

- OC 1. Recognise and use the Horticulture and gardening tools.
- OC 2. Understand the making and caring of Lawns.
- OC 3. Identify suitable horticulture plants for plantation in different seasons, and locations.
- OC 4. Perform different vegetative propagation techniques, irrigation methods, pruning practices and garden management techniques.
- OC 5. Know the common diseases and pests of horticulture plants and use of organic and biopesticides to control them.

List of Practicals:

1. Introduction to Horticulture and Garden tools.
2. Study of Lawn making and its care (suitable soil for lawns and drainage systems, types of grasses).
3. Identification of suitable horticulture plants for plantation in different seasons (Flowering annuals, vines and climbers, ornamental trees)
4. Identification of suitable horticulture plants for plantation bulbous and foliage plants, cacti and succulents).
5. Identification of suitable horticulture plants for plantation locations (Outdoor, roof-top, balcony, rock gardens, hanging basket).
6. Study of Vegetable Garden (Sowing, raising seedlings, transplantation methods; choosing the right vegetables for the season).
7. Garden management (Weeding, manuring)
8. Irrigation methods used in lawns, parks, and vegetable gardens.
9. Submission of Horticulture plants or hanging basket.
10. Vegetative Propagation techniques by layering.
11. Vegetative Propagation techniques by cutting.
12. Vegetative Propagation techniques by grafting & budding.
13. Pruning Practices: pruning roses, shrubs, and trees.
14. Common diseases and pests of horticulture plants
15. Study of Seed germination, viability tests and storage.
16. Use of organic and biopesticides to control diseases and pests.
17. Field visit to any garden/ park/organisation (Landscape Design) and submission of report.
18. Report writing - Some selected gardens of India.

Vocational Skill Courses

Name of the Course: Ayurvedic Aahar

60 Hours Credits:02

Course Objectives (CO):

- CO 1. To enable students, understand the concept of Tridosha and aahar.
- CO2.To enable students, identify the foods with relation to rutuchakra, taste and composition.
- CO 3. To enable students, prepare immunity boosting, iron rich nutritious food.
- CO 4. To enable students, estimate proteins and vitamins in foods.
- CO 5. To enable students, gain knowledge of managing diseases with ayurvedic aahar.

Course Outcomes (OC): Learner will be able to

- OC 1. Understand the concept of Tridosha and aahar.
- OC 2. Identify the foods with relation to rutuchakra, taste and composition.
- OC 3. Prepare immunity boosting, iron rich nutritious food.
- OC 4. Estimate proteins and vitamins in foods.
- OC 5. Manage diseases with ayurvedic aahar.

List of Practicals:

1. Study of Tridosha concept (Prakriti nidaan)
2. Study of Ahar According to Different Prakriti.
3. Study of sattvic, tamasic and Rajasic foods (any two examples of each)
4. Identification of foods as per rutuchakra
5. Study of food based on six taste (Rasa) (two examples of each).
6. Preparation of Iron rich ayurvedic aahar (Nachani satva, aliv laddu)
7. Preparation of immunity boosting dish (amala palak, amala candy)
8. Making a diet plan to manage diseases (diabetes, constipation) with ayurvedic aahar.
9. Study of Examples of incompatibility/antagonistic (*Viruddha-Aahara*)

10. Estimation of Proteins from plant resources used in ayurvedic aahar (Lowry's method)
11. Estimation of vitamin **C** from fruits. (Amla, Citrus)
12. Study (identification) of Fiber rich vegetables (carrot, sweet potato), leafy vegetables (spinach, fenugreek) and dalia.
13. Preparation of medicated mattha, nachani satva, ambil.
14. Preparation of medicated soup
15. Preparation of nutritious foods (methi ladu, dink ladu, dry fruit ladu, urad daal ladu).
16. Preparation of ayurvedic energy drink.

Skill Enhancement Courses

Name of the Course: Tools and Techniques in Plant Science
60 Hours

Credits:02

Course Objectives (CO): Students will be able to:

- CO 1. understand the essential laboratory techniques used in plant sciences.
- CO 2. perform different microscopic and sectioning techniques.
- CO 3. apply chromatographic techniques to separate simple biomolecules.
- CO 4. demonstrate basic biochemical and molecular techniques.
- CO 5. understand the techniques in soil and data analysis.

Course Outcomes (OC): Learner will be able to

- OC 1. apply the essential laboratory techniques used in plant sciences.
- OC 2. identify different specimens based on microscopy and sectioning techniques.
- OC 3. separate simple biomolecules using chromatographic techniques.
- OC 4. detect biomolecules using basic biochemical and molecular techniques.
- OC 5. comprehend soil and data analysis to draw valuable outputs.

List of Practicals:

Module 1: Introduction to Laboratory Tools and Instruments

- 1.1 Study of Basic Laboratory Instruments (Microscope, Colorimeter, Autoclave, Oven, Incubator, Laminar Air Chamber, Tilak Air Sampler)
- 1.2 Study of stains and staining techniques

Module 2: Microscopy and Sectioning Techniques

- 2.1 Microslide Preparation—Whole Mounts, Smears, Squashes
- 2.2 Plant Microtechnique (T.S., L.S., R.L.S., T.L.S.)

Module 3: Separation techniques

- 3.1 Separation of Amino Acids by Paper Chromatography
- 3.2 Separation of Sugars by Thin-Layer Chromatography

Module 4: Biochemical analysis

4.1 Qualitative Tests for plant Metabolites (Proteins, Carbohydrates, Alkaloids, Tannins)

4.2 Study and verification of Beer and Lambert's Law

Module 5: Basic Molecular Technique

5.1 Genomic DNA Extraction

Module 6. Soil Analysis Techniques

6.1 Determination of temperature and pH of different Soil Samples

Module 7. Computer Techniques

7.1. Study of photo micrographic techniques

7.2. Use of computer for preparation of Tables, Graphs and Presentations (MS Office)

Suggested Readings:

5. Plummer, D.T. (1996). *An Introduction to Practical Biochemistry*. Tata McGraw-Hill Publishing Co. Ltd. New Delhi. 3rd edition.
6. Ruzin, S.E. (1999). *Plant Microtechnique and Microscopy*, Oxford University Press, New York, U.S.A.
7. Ausubel, F., Brent, R., Kingston, R. E., Moore, D.D., Seidman, J.G., Smith, J.A., Struhl, K. (1995). *Short Protocols in Molecular Biology*. John Wiley & Sons. 3rd edition.
8. Zar, J.H. (2012). *Biostatistical Analysis*. Pearson Publication. U.S.A. 4th edition.

Note: This course is designed to provide foundational skills in plant science laboratory techniques. The practical assessments and final project are structured to evaluate students' proficiency and understanding, preparing them for potential careers in plant science research and related fields.

Skill Enhancement Courses

Name of the Course: Aromatics and Perfumery
60 Hours

Credits:02

Course Objectives(CO):

- CO 1. To enable students, understand the aromatic plants and their cultivation.
- CO 2. To enable students, to Understand the various raw materials for cosmetics and perfumes.
- CO 3. To enable students, to develop the various perfumes and cosmetics products.
- CO 4. To enable students, to understand essential laboratory techniques for extraction of essential oils.

Course Outcomes (OC): Learner will be able to

- OC 1. Understand the basics of cultivation aromatic plants a.
- OC 2. Develop perfumes and cosmetics products w.r.t. raw materials, large scale manufacturing.
- OC 3. Functional and physiochemical evaluation of essential oils.
- OC 4. Learn physical and chemical properties for the classification of essential oils.
- OC 5. Learn to develop value added products using essential oil.

List of Practicals:

Module 1. Introduction to Aromatic plants

- 1.1 Introduction and cultivation of some common aromatic flowering plants (Rose, Jasmine)
- 1.2 Cultivation practices of aromatic grasses like – Lemongrass, citronella

Module 2. Extraction techniques of essential oil

- 2.1. Laboratory scale distillation of aromatic plants (hydro distillation and hydro-steam distillation.
- 2.2. Types of solvents and Laboratory scale solvent extraction by soxhlet apparatus

Module 3. Classification and Analysis of Essential oil.

- 3.1. Classification of essential oil based on chemical composition
- 3.2. Physical Properties of oil
- 3.3. Chemical properties of oil

Module 4. Essentials of perfume making

- 4.1. Determination of oil content
- 4.2. Measurements, Dilution Rates & Calculations for perfumes

Module 5. Understanding the Essential Oil Profiles and Odor Profiling

- 5.1. Citrus Odor Types (Grapefruit, Lemon, Sweet Orange)
- 5.2. Herbal Odor Types (Basil, Peppermint, Rosemary)

- 5.3. Floral Odor Types (Geranium, Rose)
- 5.4. Woody Odor Types (Cedarwood, Cypress)
- 5.5. Spicy Odor Types (Black Pepper, Ginger)
- 5.6. Earthy Odor Types (Patchouli, Vetiver)
- 5.7. Camphorous Odor Types (Eucalyptus, Tea Tree)

Module 6. Basic perfume product development

- 6.2 Preparation of Oil based perfumes
- 6.4. Preparation of alcohol based perfumes
- 6.5. Preparation of gel based room and car fresheners using essential oil

Module 7. Value addition using essential oil

- 7.1. First Aid Applications with Essential Oils
- 7.2. Essential Oils and Meditation
- 7.3. Making of house hold products (Incense sticks, mosquito repellent sticks, dhoops)

Module 8. Field experience and Project

- 8.1. Field Visit to essential oils and perfumery Institute/Industry.
- 8.2. Submission of any two products developed by students.

Suggested Readings:

1. Eiri Board. (2008). Handbook of Essential Oils Manufacturing and Aromatic Plants 5/E edition, Engineers India Research Institute (India), New Delhi.
2. Kochhar, S.L. (2016). Economic Botany – A Comprehensive Study, 5th Edition. New Delhi, India: Cambridge University Press.
3. Başer, K.H.C., Buchbauer, G. (2020). Handbook of Essential Oils: Science, Technology, and Applications, 3rd edition, CRC Press.
4. Earnest Guenther, "The Essential Oils" vol. I Robert E. Kreiger Publishing Co. Huntington, New York, 1972.
5. M.S. Balsem, S.D. Genshon, M.M. Rieger, E. Sagarin, S.J. Strianase, "Cosmetics, Science and Technology, Vol. I, II and III, Wiley-Interscience, A Division of John Wiley and Sons., Inc., New York, London, Sydney, Toronto, 1972, Ed. By M.S. Balsam and M.S. Sagarin.
6. Paul Z. Bedoukian, "Perfumery and Flavouring Synthetics" II Edn, Elsevier Publishing Co., Amsterdam, London, New York, 1967. 4. J. Stephan Jellinick, "Formulation and Functions of Cosmetics", Wiley Interscience, a Division of John Wiley & Sons., Inc.
7. Mareel I. Billot, F.V. Wells, "Perfumery Technology" Ellis Harwood Ltd., Halsted Press, a Division of John Wiley & Sons., Inc. New York, London. 1975

Note: This course is designed to provide foundational entrepreneur skills to influence students for small scale startups. The practical assessments and final project are structured to evaluate students' proficiency and understanding, preparing them for potential careers in Aromatics and Perfumery and related fields.

Sem. – II

Course I

Name of the Course: Cytogenetics, Ecology and Environment

Conservation

30 Hours

Credits: 2

Course Objectives (CO):

CO 1. To enable the students, to identify the structure and functions of the Cell and cell organelles in plants.

CO 2. To enable the students to understand the Cell cycle and cell division in plants.

CO 3. To enable the students to apply the biostatistical concepts.

CO 4. To enable the students, to comprehend ecology and environment conservation.

CO 5. To enable the students, to carry out a thorough study of the active constituents of medicinal plants

Course Outcomes (OC): The Learner will be able to

OC 1. Identify the structure and functions of the Cell and cell organelles in plants.

OC 2. Understand the Cell cycle and cell division in plants.

OC 3. Comprehend the biostatistical application.

OC 4. Apply the biostatistical concepts.

OC 5. Carry out a thorough study of the active constituents of medicinal plants with an emphasis on the use of plant-based food as medicine.

Module 1: Cytogenetics	15 Lectures
8. Ultrastructure and functions of Cell wall, Plasma membrane (2 Lectures)	
9. Ultrastructure and functions of the cell organelles – Chloroplast, Endoplasmic reticulum, Mitochondrion (2 Lectures)	
10. Cell cycle, Mitosis in Plant Cells and its significance (2 Lectures)	
11. History, Concept and Definition, Genetic Terminologies- Gene, Genome, Allele, Locus, Traits, Genotype, Phenotype, Dominant, Recessive, Co-dominance, Heredity, Inheritance, Variation, Homozygous, Heterozygous, Back Cross and Test Cross. (1 Lecture)	
12. Mendelian Genetics - Law of Dominance, Law of Segregation, Law of Independent Assortment, Monohybrid Cross, Dihybrid Cross, Incomplete Dominance and Co-Dominance. (3 Lectures)	

13. Multiple alleles and Multiple genes **(2 Lectures)**

14. Gene Interaction – Introduction and definition, Concept of epistatic and non-epistatic interactions. **(3 Lectures)**

Module 2: Ecology and Environment conservation

15 Lectures

6. Introduction to Ecology: Concept, need and Scope. **(1 Lectures)**

7. Ecosystem - Types of ecosystems (Terrestrial & Aquatic), functions of ecosystem. **(2 Lectures)**

8. Environmental problems and its Impact - Natural & artificial ecological imbalance, climate change (ozone depletion, greenhouse effect). **(3 Lectures)**

9. Environment Health and its management: Waste disposal, water, sanitation & recycling of wastes, Nuclear hazards and human health risks. **(3 Lectures)**

10. Conservation - Introduction, Definition & importance of Conservation, in situ and ex situ conservation. **(6 Lectures)**

- Ex-situ conservation: botanical gardens and zoological parks, seed bank, gene bank.
- In-situ conservation: Wildlife sanctuaries, National parks, Biosphere reserves.
- Ecotourism.

Course II

Name of the Course: Plant Anatomy and Applications of Botanicals
30 Hours **Credits: 2**

Course Objectives (CO):

- CO 1. To enable the students, correlate anatomy, taxonomy, physiology, and ecology.
- CO 2. To enable the students, understand the plant tissue system and their functions.
- CO 3. To enable the students, apply the knowledge of medicinal botany to daily life.

Course Outcomes (OC): The Learners will be able to

- OC 1. Correlate anatomy, taxonomy, physiology, and ecology.
- OC 2. Understand the plant tissue system and their functions.
- OC 3. Apply the knowledge of medicinal botany to daily life.

Module 1: Plant Anatomy**15 Lectures**

1. Introduction to Anatomy. **(1 Lectures)**
2. Functional Tissue System: **(3 Lectures)**
 - Storage tissues - Parenchyma,
 - Mechanical Tissues - Collenchyma, Sclerenchyma
 - Conducting tissues - Xylem and Phloem.
3. Adaptive and protective Epidermal Tissue System: **(3 Lectures)**
 - Epidermal Tissue System- Functions of epidermis,
 - Epidermal appendages - A) Hair-Root hair, Unicellular hair, and Multicellular hair; B) Scales; C) Colleters; D) Water vesicles/Bladders.
4. Internal Primary architecture of dicot and monocot root, stem, and leaf. **(3 Lectures)**
5. Types of stomata: Diacytic, Paracytic, Anomocytic, Anisocytic and Graminaceous **(1Lecture)**
6. Types of vascular bundles **(2 Lecture)**
7. Cell Inclusions – Starch, protein, Calcium oxalate and calcium carbonate crystals **(2 Lectures)**

Module 2: Botanicals and its applications**15 Lectures**

1. Medicinal Botany - Plant resources used in cosmetics, aromatics and pharmaceuticals
 - Introduction and scope **(1 Lecture)**
 - Herbal preparations - Emulsion making technique for Mask, Lotion, Gel **(2 Lectures)**
 - Methods of extraction – Maceration, digestion, decoction, aromatic waste, leachates and tinctures **(3 Lectures)**
2. Study of Plants with reference to Botanical name, family, part used, products and uses: **(4 Lectures)**
 - Cosmetics - Aloe, Henna,
 - Aromatics - Lemon grass and Rose
 - Pharmaceuticals - Turmeric and Neem
3. Ethnobotany **(3 Lectures)**
 - Definition, Application of Ethnobotany
 - Plants used in Ethnobotany: *Tinospora cordifolia*, *Coleus aromaticus*, *Aegle marmelos*
4. Grandma's Pouch: Botanical name, common name, family, constituents, biological source and uses of: Tulsi, Ginger, Adulsa, Clove **(2 Lectures)**

Reference Books:

1. Genetics by Russel. Wesley Longman Inc. publishers.
2. Plant Physiology by Taiz and Zeiger Sinauer Associates Inc. Publishers
3. Fundamentals of Ecology by E P Odum and G W Barrett. Thompson Asia Pvt Ltd. Singapore.
4. Cell Biology by De Robertis
5. Biostatistics and Biometry by Parihar and Parihar
6. Introduction to Biostatistics by Pranab Kumar Banerjee

List of Practicals:**Vascular cryptogams**

- Study of vegetative and reproductive structures of *Adiantum*.

Phanerogams

- Study of vegetative and reproductive structures of *Cycas*.
- Morphology of Non-essential whorls-Calyx and Corolla.
- Morphology of Essential whorls. Androecium and Gynoecium.

Cytology

- Study of various stages of mitosis in root tip cells (*Allium*).
- To perform karyotyping on root tip cells of *Allium cepa* to observe and analyse chromosome morphology.

Biostatistics

16. Calculation of mean, median and mode, standard deviation.
17. Graphical representation of data: Frequency polygon, Histogram, Ogive, Bar diagram, Pie-charts. (Using Excel Sheet)

Ecological Adaptations (Morphology)

18. Morphological Adaptations of plants. (Mesophytes, Xerophytes).
(Identification)
19. Morphological Adaptations of plants. (Hydrophytes, Halophytes, Epiphytes).
(Identification)

Plant Anatomy

- Primary structure of dicot and monocot root.
- Primary structure of dicot and monocot stem.
- Study of vascular bundles from suitable plant material.
- Study of Dicot and monocot stomata.
- Epidermal outgrowths mountings with reference to hair / trichomes:
 - Unicellular: *Gossypium*/Radish

- Multicellular: *Lantana*/Sunflower
- T-shaped: *Avicennia*
- Cell Inclusion - Mounting of
 - Starch grains (potato and rice) aleurone layer (Maize).
 - Raphides (*Pistia* / Money plant / *Eichhornia*), Sphaeraphides (*Opuntia*), Cystoliths (*Ficus*).

Medicinal Botany

- Grandma's Pouch: Botanical name, common name, family, constituents, biological source and uses of: Tulsi, Ginger, Adulsa and Clove.

Nature Conservation

- Field Visit: Exploration of In-Situ / Ex-Situ Conservation Methods in Botany (Visit)
- Collection of seed of wild plants from natural habitat and preparation of Seed bank (Ex-situ) and Seed ball.

Reference Books

1. College Botany Volume I and II Gangulee, Das and Dutta latest edition. Central Education enterprises
2. Cryptogamic Botany Volume I and II by G M Smith McGraw Hill.
3. Taxonomy of Angiosperms by A.V.S.S. Sambamurty
4. Taxonomy of Angiosperms – Taxonomy, Systematic Botany, Economic Botany, Ethnobotany, Saras Publication
5. A Text Book of Botany: Angiosperms by B.P.Pandey
6. Manual of Ethnobotany by S. K. Jain (latest edition)
7. An introduction to Ethnobotany by S. K. Jain and Ashok K. Jain, deep Publications.
8. Herbal Remedies by Urjita Jain.

Vocational Skill Courses

Name of the Course: Flower Arrangement 60 Hours Credits:02

Course Objectives (CO):

- CO 1. To enable students, identify the foliage and cut flowers used in different occasions.
- CO 2. To enable students, learn the basic styles and shapes in flower arrangement.
- CO 3. To enable students, prepare different flower arrangements.
- CO 4. To enable students, study methods of Drying and preservation of flowers.
- CO 5. To enable students, select the suitable types of containers and accessories for flower arrangement.

Course Outcomes (OC): Learner will be able to

- OC 1. Identify the foliage and cut flowers used in different occasions.
- OC 2. Understand the basic styles and shapes in flower arrangement.
- OC 3. Prepare different flower arrangements.
- OC 4. Perform Drying and preservation of flowers.
- OC 5. Select the suitable types of containers and accessories for flower arrangement.

List of Practicals:

- 16. Identification of cut flowers: flowers on special occasions.
- 17. Study of different foliage used in flower arrangement.
- 18. Different types of containers and accessories for flower arrangement.
- 19. To study basic styles and shapes in flower arrangement.
- 20. Preparation of various type of garlands, Gajra, Venni etc.
- 21. Preparation of Rangoli by using various types of flowers.
- 22. Preparation of various types of bouquets.
- 23. Japanese style of flower arrangement: Ikebana, Moribana.
- 24. To study methods of Drying and preservation of flowers.
- 25. Dry flower arrangement.
- 26. Preparation of pot pourrie.
- 27. Preparation of Greeting card /Book mark using dry flower arrangement.
- 28. Arrangement of flower for different areas and occasions.
- 29. Visit to nearby florist / Flower market.
- 30. Visit / Organise exhibition of cut flowers and floral arrangement.

Reference Books

1. Jean Taylor Creative Flower Arrangements. Random House UK; New edition (27 November 1993)
2. Purnima Shah. Silence Speaks - A book about Japanese flower arrangements (Ikebana). Buddha Bamboo; 1ST edition (2016)
3. Stella Coe. Art of Japanese Flower Arrangement.
4. Fiona Barnett. Flower Arranging: A Complete Guide to Creative Floral Arrangements. Southwater publisher
5. Charlene Tarbox. Creative Haven Beautiful Flower Arrangements Colouring Book. Dover Publications Inc.; Clr Csm edition

Vocational Skill Courses

Name of the Course: Bonsai Art

60 Hours Credits:02

Course Objectives (CO):

- CO 1. To enable the students, know different types of containers, tools and accessories used in bonsai.
- CO 2. To enable the students, identify suitable plants, soil and media for Bonsai.
- CO 3. To enable the students, learn Bonsai management practices and their care techniques.
- CO 4. To enable the students, prepare different styles of Bonsai.
- CO 5. To enable the students, gain knowledge about Insect pest and diseases and their control.

Course Outcomes (OC): Learner will be able to

- OC 1. Select different types of containers, tools and accessories used in bonsai.
- OC 2. Identify suitable plants, soil and media for Bonsai.
- OC 3. Perform bonsai management practices and their care techniques.
- OC 4. Prepare different styles of Bonsai.
- OC 5. Deal with Insect pest and diseases and their control.

List of Practicals:

- 1. Study of Different types of containers used in bonsai.
- 2. Study of tools and accessories used in Bonsai making.
- 3. Study of best suitable plants for Bonsai.
- 4. Selection of soil and media for bonsai
- 5. Bonsai management practices: Media Potting, Re-Potting and watering.
- 6. Bonsai care techniques: Pruning, pinching and defoliation.
- 7. Study of upright (formal styles) in Bonsai.
- 8. Study of Upright (Informal style) in Bonsai.
- 9. Preparation of Bonsai: Cascade, Semi-cascade.
- 10. Preparation of Bonsai: Forest style.
- 11. Insect pest and diseases and their control.
- 12. Visit to Bonsai exhibition/Nursery.

Reference Books

1. Dr. N. Mangadevi, Bonsai-Emesco Books publisher
2. Dey.S.C.- Bosnai : An art of miniature plant culture- Ankur publisher
3. Paul Lesniewicz., 1994. Bonsai in your home. Sterling publishing Co, New York.
4. A.B. Patil – Bonsai.
5. Bonsai Vaman vriksha kala- Malti Nagarkar and Vijay Nakgarkar. Continental Publisher.
6. Intermediate Bonsai- Thomas Zane

Vocational Skill Courses

Name of the Course: Plant Propagation Practices

60 Hours Credits:02

Course Objectives (CO):

CO 1. To enable the students, identify garden implements and suitable potting mixture.

CO 2. To train the students, in potting, repotting techniques, and preparation of nursery beds.

CO3. To enable the students, learn methods of seed treatment and application of growth hormones.

CO 4.To enable the students, in the skills of plant propagation.

Course Outcomes (OC): Learner will be able to

OC 1. Identify garden implements and suitable potting mixture.

OC 2. Perform potting, repotting and preparation of nursery beds.

OC 3. Apply methods of seed treatment and application of growth hormones for Plant Propagation.

OC 4. Perform plant propagation practices.

List of Practicals:

1. Study of Garden implements.
2. Preparation of Potting Mixture.
3. Potting & Repotting techniques.
4. Preparation of nursery beds.
5. Methods of Seed Treatment.
6. Application & methods of plant growth regulators.
7. Perform various methods of cutting.
8. Perform various methods of layering.
9. Perform various methods of grafting.
10. Perform various methods of budding.
11. Perform propagation by specialized structure- rhizome, suckers, runners, offset, bulb, corm, tuber, etc.
12. Visit to Plant nursery.

Reference Books

7. Ropwatika: Ravindra Katole. Godwa Publication

Vocational Skill Courses

Name of the Course: Marine Botany

60 Hours

Credits:02

Course Objectives (CO):

- CO1. To enable students, understand the characteristics features of the marine phytoplanktons and marine fungi.
- CO 2. To enable students, study the value-added products and medicinal uses of marine algae.
- CO 3. To enable students, identify mangrove plants.
- CO4.To enable students, comprehend the characteristic features of Mangroves, mangrove associates and sea grasses.
- CO 5. To enable students, realise the ecological importance and medicinal uses of mangroves.

Course Outcomes (OC): Learner will be able to

- OC 1. Understand the characteristics features of the marine phytoplanktons and marine fungi.
- OC 2. Study the value-added products and medicinal uses of marine algae.
- OC 3. Identify mangrove plants.
- OC 4. Comprehend the characteristic features of Mangroves, mangrove associates and sea grasses.
- OC 5. Realise the ecological importance and medicinal uses of mangroves.

List of Practicals:

1. Study of marine phytoplanktons.
2. Study of characteristic features (Morphological, Photosynthetic pigments, reserve food material) of Chlorophyta (*Enteromorpha*, *Chaetomorpha*, *Ulva*, *Caulerpa*- any two).
3. Study of characteristic features (Morphological, Photosynthetic pigments, reserve food material) of Phaeophyta (*Padina*, *Dictyota*, *Sargassum*- any two)
4. Study of characteristic features (Morphological, Photosynthetic pigments, reserve food material) of Rhodophyta (*Gracilaria*, *Gelidium*, *Hypnea* - any two).
5. Study of marine fungi.

6. Identification of value-added products from marine algae.
7. Medicinal uses of seaweeds.
8. Identification of mangrove plants.
9. Study of Morphological characteristic features of Mangroves and mangrove associates.
10. Study of characteristic features of sea grasses.
11. Study of sand dune plants (*Ipomea*, *Suaeda*, *Derris*, *Sesuvium*).
12. Study of anatomical features of mangrove plants (Salt gland & pneumatophore).
13. Ecological significances and Medicinal uses of mangroves.
14. Study of pH of soil from mangrove vegetation.

Skill Enhancement Courses

Name of the Course: Field Study Techniques

60 Hours

Credits:02

Course Objectives (CO):

- CO 1. To develop skill among the first-year botany students, focusing on essential field study techniques in botany.
- CO 2. To enable students, to Understand basics of biodiversity analysis and measurement
- CO 3. To inculcate skills that can pave the way for a promising career in field and environmental botany.
- CO 4. To provide hand on training and experiential learning of various aspects of field survey techniques.

Course Outcomes (OC): Learner will be able to

- OC 1. Understand vegetation type and analyze vegetation.
- OC2. Develop skill useful for forest Mensuration for programs like tree census etc. OC
3. Understand basic parameters of soil profiling
- OC 4. Calculate diversity using Simpson's index and comment on biodiversity status of the studied area.
- OC 5. Analyse water samples for hydrobiological assessments

List of Practicals:

Module 1: Field visit and Vegetation Analysis

- Vegetation study by field visit for habit and habitat study
- Study of quadrat Method (List quadrat and Chart quadrat)
- Line and Belt Transect Studies (demonstration)
- Data collection using questionnaires
- Photography technique (Geo tag photographs) and Use of GPS for Field Survey and Plant location

Module 2: Forest Mensuration

- Keys for Identification of trees
- Measurement of Diameter of trees in field
- Measurement of height of trees in field
- Volume measurement of trees

Module 3: Soil analysis

- Soil profiling using pH meter and thermometer

Module 4: Biodiversity Indexing

- Study of Biodiversity by Simpson's Diversity Index

Module 5: Hydrobiological studies

- Collection and Fixing of Plankton Samplings
- Analysis of BOD of water sample
- Analysis of COD of water sample

Suggested Readings:

Bonham, C. D. 1989. Measurements of terrestrial vegetation. John Wiley, New York, New York, USA. 338pp.

Bookhout, T.A. (ed). 1994. Research and management techniques for wildlife and habitats. The Wildlife Society, Bethesda, Maryland. 740 pp.

Standard Methods for the Examination of Water and Wastewater (20th edn). American Public Health Association, Washington DC (1999)

Simpson, E.H. (1949) Measurement of Diversity. Nature, 163, 688.

Krebs, C. H. J. (1989). Ecological methodology Univ. of British Columbia Harper Collins Publisher. PP. 645.

Okpiliya, F. I. (2012). Ecological Diversity Indices: Any Hope for One Again?. Journal of Environment and Earth Science. Vol.2, (10): 45-52

Forest Management. Directorate of Forests, Government of West Bengal, 2016

John A. Kershaw Jr., Mark J. Ducey, Thomas W. Beers, Bertram Husch (2016). Forest Mensuration. John Wiley & Sons, Ltd.

B. U.S. Environmental Protection Agency. March, 1979. Methods for chemical analysis of water and wastes. EPA-600/4-79-020. Environmental Monitoring and Support Laboratory, Office of Research and Development, Cincinnati, OH 45268.

C. Black, C.A. 1965. Methods of soil analysis. Part 2. ASA, 677 Segoe Rd S, Madison, WI 53711

Note: This course emphasizes hands-on learning to equip students with practical skills essential for a successful career in botany. The comprehensive modules cover a wide array of field study techniques, providing a solid foundation for future endeavours in the field.

Skill Enhancement Courses

Name of the Course: Organic Farming

60 Hours

Credits:02

Course Objectives (CO):

- CO 1. To spread knowledge about organic agriculture.
- CO 2. To provide information and abilities needed to engage in organic food production and sustainable agriculture.
- CO 3. To create awareness about certification process, packaging, and marketing of organic products.
- CO 4. To spread idea of an organic ecosystem and educate oneself on biological magnification and its relevance in the modern world.

Course Outcomes (OC): Learner will be able to

- OC 1. Get comprehensive knowledge and practical skills in organic farming practices
- OC 2. To Understand various methods of organic compost preparation,
- OC 3. Acquire skills to control pest and disease using botanicals, natural pesticides.
- OC 4. Get hands on training and experiential learning on vermiculture techniques, bio-pesticide application, and sustainable post-harvest management.

List of Practicals:

Module 1: Organic Compost Making and analysis

- 1.4 Aerobic Composting Methods
- 1.5 Anaerobic Composting Techniques
- 1.6 Physicochemical properties of compost

Module 2: Green Manures and its application

- 2.1 Different plants used as green manures and their applications

Module 3: Biofertilizers and bio inoculants

- 3.1 Different types of biofertilizers and Methods of Biofertilizer Applications
- 3.2. Types of bioinoculants and their applications

Module 4: Pest and Disease Control using biological methods

- 4.1 Preparation of Neem Products

4.2 Use of Other Botanicals for Pest and Disease Control (Custard apple seeds/ garlic/ chilli paste/ Tobacco leaves/ Marigold flowers) (**Any two**)

4.3. Preparation of Panchagavya, Jeevamrutam

4.4. Preparation of dashparni extract

Module 5. Field visit and report submission

Suggested Readings:

1. Sharma, Arun K. 2002. A Handbook of Organic Farming. Agrobios, India.
2. Sathe, T.V. 2004. Vermiculture and Organic Farming. Daya Publishers.
3. Alvares, C. 1996. The Organic Farming Source Book. The Other India Press, Mapusa, Goa.
4. Gupta, M., 2004. Organic Agriculture Development in India. ABD publishers, Jaipur, India.
5. S.P. Palaniappan, K. Annadurai, 1999. Organic Farming- Theory and Practice, Scientific Publishers, Jodhpur, India.
6. Dr.Pratiksha Raghuvanoki. Handbook of Organic Farming.
7. Organic Farming: The Ecological System- Agronomy Monograph 54, ASA, USA.
8. Subha Rao, N.S. 200, Soil Microbiology, Oxford & IBH Publishers, New Delhi.
9. Dongarjal R. P. and Zade S.B. 2019. Insect Ecology and Integrated Pest Management, Akinik Publications, New Delhi.
- 10.10. Guideline of National Project on Organic Farming, Department of Agriculture and Cooperation, INM Division, Ministry of Agriculture, Govt. of India
- 11.Dushyent Gehlot. 2005. Organic Farming- standards, accreditation, certification and inspection. Agribios, India.

Note: This course is meticulously designed to instil practical skills and knowledge in sustainable agriculture and organic farming. The emphasis on hands-on experience, coupled with theoretical insights, aims to empower students to consider a bright career in the field of sustainable agriculture. The final project encourages students to apply their learning to develop a business proposal in the realm of organic farming.

Note:

- A minimum of **Two** field excursions (with at least one beyond the limits of Mumbai / Local Area) for habitat studies are compulsory.
- Field work of not less than **eight hours** duration is equivalent to one period per week.
- Industrial visit / Institutional visit at least **One** per Semester are compulsory.

QUESTION PAPER PATTERN (External and Internal)

Format of Question Paper: External Theory (Mandatory)		30 marks	
Time:- 01 hr			
Q. No.	Descriptor	Module	Marks
Q 1	Answer the following: (any 2)	1	10
A			
B			
C			
D			
Q 2	Answer the following: (any 2)	2	10
A			
B			
C			
D			
Q3	Write Short Notes on: (any 2)	1 and 2	10
A			
B			
C			
D			

Internal Theory (Mandatory) 20 marks

Continuous Evaluation through:	Quizzes, Class Tests, presentation, project, role play, creative writing, assignment etc. (at least 3)
---------------------------------------	--

Practical Internal (Mandatory) 20 MARKS	
Continuous Evaluation through:	Project / Survey /Field Visit/ Industrial Visit etc. - 10 marks
	Report of the same: 5 marks
	Viva: 5 marks

Practical External (Mandatory)

Time: - 2 hr

	Format of Practical Question Paper:30 MARKS	
Q1		10 MARKS
Q2		10 MARKS
Q3	Identification (Two Spots)	05 MARKS
Q3	Journal	05 MARKS

Note: - PRACTICAL BOOK/JOURNAL

The students are required to perform 75% of the Practical for the journal to be duly certified. The students are required to present a duly certified journal for appearing at the practical examination, failing which they will not be allowed to appear for the examination.

Practical External (VSC & SEC)
Time:- 02hrs

	Format of Practical Question Paper:	30 MARKS
Q1		10 MARKS
Q2		10 MARKS
Q3	Identification (Two Spots)	05 MARKS
Q3	Journal	05 MARKS

Practical Internal (VSC & SEC) 20 Marks

Continuous Evaluation through:	Visit report /Skill development Report	05 MARKS
	Project / Product Prototype Submission	10 MARKS
	Viva-voce	05 MARKS

Letter Grades and Grade Points:

Semester GPA/ Programme CGPA Semester/ Programme	% of Marks	Alpha-Sign/ Letter Grade Result	Grading Point
9.00 - 10.00	90.0 - 100	O (Outstanding)	10
8.00 - < 9.00	80.0 - < 90.0	A+ (Excellent)	9
7.00 - < 8.00	70.0 - < 80.0	A (Very Good)	8
6.00 - < 7.00	60.0 - < 70.0	B+ (Good)	7
5.50 - < 6.00	55.0 - < 60.0	B (Above Average)	6
5.00 - < 5.50	50.0 - < 55.0	C (Average)	5
4.00 - < 5.00	40.0 - < 50.0	P (Pass)	4
Below 4.00	Below 40.0	F (Fail)	0
Ab (Absent)	-	Ab (Absent)	0

Signature of the Team

S. No	Name	Mobile Number	Signature
1.	Dr. Vasant P. Mali	9321463140	
2.	Dr. Uttam L. Dethe	9422963964	
3.	Dr. D. Meena S. Rao	9324176760	
4.	Dr. Laxmishree S. Chengala	9320089389	
5.	Dr. Mandakini R. Ingle	9821961060	
6.	Dr. Suraj Gajbhiye	9821331987	
7.	Dr. Vijay Chavan	9421168396	
8.	Dr. Rohan Gavankar	9860086081	

Justification for B.Sc. (Botany)

1.	Necessity for starting the course:	Botany is the foundation of life. It is interdisciplinary and practical based. It enables students to address the future prospects with scientific mindset.
2.	Whether the UGC has recommended the course:	Yes
3.	Whether all the courses have commenced from the academic year 2024-25	The course has already commenced at the University and for academic year 2024-25 it is restructured under NEP 2020.
4.	The courses started by the University are self-financed, whether adequate number of eligible permanent faculties are available?	This course is aided / self financed based on the sanction given by University of Mumbai to affiliated colleges from time to time.
5.	To give details regarding the duration of the Course and is it possible to compress the course?:	1 year Not Possible to Compress
6.	The intake capacity of each course and no. of admissions given in the current academic year:	The intake capacity is variable from College to College based on the sanctions received from the University of Mumbai.
7.	Opportunities of Employability / Employment available after undertaking these courses:	Employability, Self employment
