Introduction to The IEEAC-2017:

Indian Engineering Educators and Administrators Conference 2017 is a platform for the Principals, Directors, Rectors, Deans, Heads of the departments and Future Leaders to discuss various issues plaguing engineering institutions and education. As most of the colleges are replications, Areas like Leadership and Governance, Institutional Branding, Strategic Development, Institutional Planning & Development, Research-Development & Consultancy, Financial Planning and Management, Faculty Management, Employability and skill gap, Accreditation, Institute-Industry-International relations are some of the areas Engineering Educators and Administrators need an advice or two to improve upon. IEEAC-2017 is being organized to bring the Engineering Educators and Administrators together so that good practice is shared among the participants for the benefit of all. As Data, Analytics, Algorithms and programming is the next paradigm shift that is occurring world over, IEEAC-2017 will be the right place to know how the institutional structures and processes can be changed for better quality using Data Analytics.

IITs and NITs with expansion in numbers also face quality issues. IEEAC-2017 tries to share the experiences of these institutions in maintaining standards so that the participants will acquire insights into problems engineering educators face and use the solutions at their respective institutions.

IEEAC2017 employs **Case Based Discussion** where in success and failures of Institutions are presented as case studies, followed by discussion and Q & A session. **The details of the available slots, registration, tentative program schedule are available on the website www.terna.org/ieeac**
