INTRODUCTION TO FINANCIAL MANAGEMENT

WHAT IS FINANCE?

Finance is the soul of any business concern, and we cannot imagine a world without Finance. When we say finance, it generally means money for a layman but it is not only the money, it is a wider concept that is related to money and its flow. The word finance is a French word and it means 'Management of Money'.

Finance is such a powerful source that it performs an important role to operate and co-ordinate the various economic activities of the business. Like other resources finance is also limited and a business entity needs to manage its finances efficiently and effectively.

The figure below shows the different perspectives of finance:

General

Finance is the administration of funds and other valuables that can be converted into cash.

Experts

Finance is a simple task of providing the necessary funds (money) required by the business entities like companies, firms, individuals

Entrepreneurs

Finance is all about money. This is because every financial transaction involves cash, either directly or indirectly.

Academicians

Finance is the acquisition (to get, obtain) and effective (well-planned) use of funds. It also relates with profits that adequately compensate for the

Finance is the lifeline of any Business whether large scale, medium scale or small scale because all the activities depend on finance. For any business to be successful, business needs to have a sufficient amount of finance. As a result, it is essential to fully understand the concept of financial management.

WHAT IS FINANCIAL MANAGEMENT?

To understand financial management let's see some definitions of Financial Management,

“Financial management is the activity concerned with planning, raising, controlling and administering of funds used in the business.” – **Guthman and Dougal**

“Financial management is that area of business management devoted to a judicious use of capital and a careful selection of the source of capital in order to enable a spending unit to move in the direction of reaching the goals.” – **J.F. Brandley**

“Financial management is an application of general managerial principles to the area of financial decision-making”. - **Howard and Uptron**

“Financial management is an area of financial decision making, harmonizing individual motives and enterprise goal”. - **Weston and Brigham**

“Financial management is concerned with the efficient use of an important economic resource, namely capital funds” - **Solomon Ezra & J. John Pringle.**

“Financial Management is the operational activity of a business that is responsible for obtaining and effectively utilizing the funds necessary for efficient operations” - **Joseph & Massie**

“Financial Management is concerned with managerial decisions that result in the acquisition and financing of long-term and short-term credits of the firm. As such, it deals with the situations that require selection of specific assets (or combination of assets), the selection of specific liability (or combination of liabilities) as well as the problem of size and growth of an enterprise. The analysis of these decisions is based on the expected inflows and outflows of funds and their effects upon managerial objectives”. - **Phillippatus.**

Financial Management is a managerial process that is concerned with the planning, organizing, directing, and controlling of financial resources.

Initially, financial management was concerned only with the collection of funds. Later on, proper utilization of funds also became an important aspect of Financial Management. In today's world, Financial Management examines all financial issues of a company.

Financial Management involves functions like

- Fund procurement
- Working capital management
- Capital budgeting and capital structure designing of an organization
- Controlling and managing an organization's financial assets
- Making strategies related to expansion, diversification, joint venture, and mergers & acquisitions.

Financial Management influences both profit-oriented firms and non-profit firms. Since Financial Management has acquired a vital role in every type of organization, the financial manager has become an important constituent of any organization.

The financial manager provides a significant contribution to all business activities by estimating the requirement of funds, planning the different sources of funds, and performing the functions of collection of funds and their effective utilization.

He must be clear about the financial objectives of the firm and also his duties and responsibilities about the business activities like production, purchase, marketing, sales, etc. which include the creation and utilization of funds.

EVOLUTION OF FINANCIAL MANAGEMENT

The evolution of Financial Management can be divided into two phases

1. Traditional approach
2. Modern approach

Traditional Method

The traditional approach of financial management refers to its subject matter as a separate branch of academic study in the early stages of its evolution in academic literature. The term 'corporation finance' was used to define what is now called as 'financial management' in academia. Corporation finance, as the name implies, was concerned with the funding of corporate enterprises. In other words, the traditional approach limited the finance function to the procurement of funds by companies to meet their funding requirements. The term "procurement" was used broadly to encompass the entire process of raising funds from outside sources.

Limitations of the traditional approach

- The traditional approach focuses on the procurement system and the issues that may arise. It does not provide a system for maximizing the use of funds obtained.
- The traditional approach considers budgetary allocation as a contingency for unpredictable incidents, neglecting everyday financial difficulties that a business enterprise may face. Working capital financing choices are also kept outside of the purview of a conventional approach.
- The traditional approach's primary focus is on corporate entities. Non-corporate entities, such as partnership firms, are not covered.

Modern approach –

The modern approach takes a broad view of the term financial management and provides an analytical and conceptual framework for financial decision making. As such, the finance function includes both the

acquisition and allocation of funds. Apart from the issues involved in acquiring external funds, the primary goal of financial management is the efficient and prudent allocation of funds to various uses. In a broader context, it is regarded as an essential component of overall management.

The new method is an analytical way of looking at a company's financial problems. What is the total amount of funds that an enterprise should commit? What specific assets should a company purchase? How should the necessary funds be raised? These are the main aspects of this method.

Alternatively, the following are the main components of the modern approach to financial management:

1. How large should an enterprise be, and how quickly should it grow?
2. In what form should assets be held?
3. How should its liabilities be structured?

The three questions raised above cover the major financial issues confronting a company. In other words, according to the new approach, financial management is concerned with the resolution of three major problems relating to a firm's financial operations, pertaining to the three questions of investment, financing, and dividend decisions. Thus, financial management in the modern sense can be divided into three major decisions such as:

1. the investment decision;
2. the financing decision;
3. the dividend policy decision.

The modern method will make provision for a variety of irregular events. The main components of this method are as follows:

- Planning your finances
- Continuous operation and appropriate capital budgeting evaluation
- Provision for optimal working capital management
- A broad range of capabilities for measuring a company's performance

As a result, the modern approach contributes to the establishment of a financial standard for the company's success.

OBJECTIVE OF FINANCIAL MANAGEMENT

Financial management generally deals with procurement, allocation and control of financial resources and the two most widely used objectives are

- a) Profit Maximization
- b) Wealth maximization

Profit maximization: Profit maximization is considered as the basic objective of financial management. It should focus on increasing profit rather than decreasing profit.

The term 'profit' is used in two senses

1. Owner oriented concept: It means the amount of net profit, which goes in the form of dividends to the shareholders.
2. Operational concept- It refers to profitability, which is an indicator of the economic efficiency of the firms.

Earning profit is the main aim of any business concern and so profit is the main parameter that is considered to measure the efficiency of the business concern. Profit maximization objectives help to reduce the risk of the business. To attain the objective of Profit maximization, the enterprise should consider the assets, projects and decisions that are profitable and the non-profitable ones shouldn't be considered. Let us now discuss some merits and drawbacks of Profit Maximization.

Benefits of Profit Maximization

1. It is the best criteria for decision making since it helps in judging the economic performance of the firm.
2. It helps in the efficient allocation of resources so that the firm can make maximum profit.
3. It helps the firm to allocate and utilize its available resources in the best possible manner.
4. It helps in payment of maximum returns on investments in the form of dividends to the shareholders, regular payment to lenders, higher wages, increase in jobs, better quality products, and reduce the price of products which in turn benefits the society at large.

Drawbacks of Profit Maximization

1. The term profit is not clearly stated which can lead to unnecessary assumptions regarding earning habits of the organization. It can be
 - a. long term or short term
 - b. total profit or rate of profit
 - c. net profit before tax or net profit after tax
 - d. return on total capital employed or total assets or shareholders equity
2. It does not consider the time value of money or the net present value of the cash inflow.
3. It affects the overall operation of the organization since it ignores internal or external risk factors.

Wealth Maximization:

Wealth maximization is also called value maximization or net present worth maximization. It involves the latest innovations and improvements in the field of business concern. The term wealth means shareholder wealth or the wealth of the persons who are involved in the business concern.

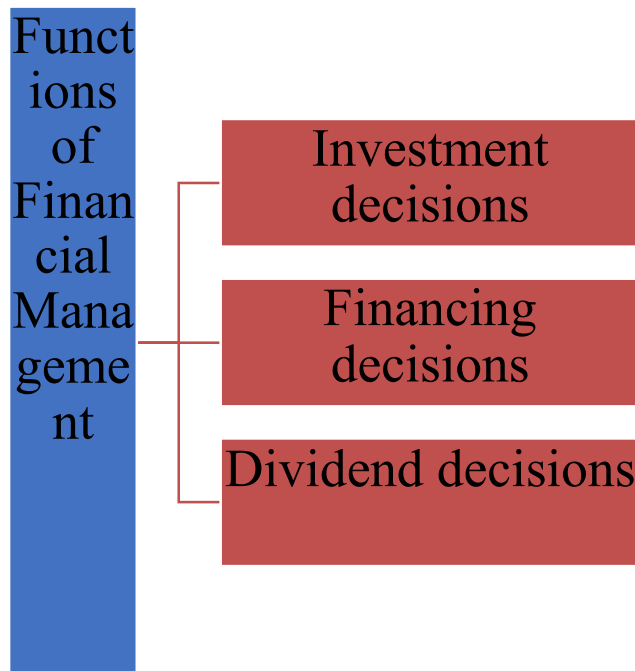

It helps in the better valuation of the organization. It takes into account both the factors i.e. time and risk. It provides efficient allocation of resources and considers the generation of cash flows and not accounting for profit. The computation of inflows and outflows of cash is accurate. It considers the time value of money concept. A right financial decision increases market value whereas poor financial decisions reduce the market value of the owners' equity.

The concept of wealth maximization is universally accepted, because it takes care of the economic welfare of people who are directly or indirectly involved in the overall development of the company such as shareholders, lenders, workers, society, etc.

It eliminates the technical drawbacks of profit maximization therefore it is considered as the modern objective of Financial Management.

FUNCTIONS OF FINANCIAL MANAGEMENT:

It is concerned with providing solutions to problems like investment, financing and dividend decisions of the financial activities of an organization.

1. Investment Decision

It is concerned with the selection of both long-term and short-term assets in which a firm's funds will be invested. Long-term assets, or fixed assets, will generate a return over time, whereas short-term assets, or current assets, are those that can be converted into cash within a financial period, such as a year.

Capital budgeting refers to long-term investment decisions, while working capital management refers to short-term investment decisions. Capital budgeting can also refer to long-term planning for allocating funds among various investment options. Risk and uncertainty analysis is a critical component of capital budgeting decisions. Because the return on investment proposals can be derived for a longer period of time in the future, the capital budgeting decision should be weighed against the risk associated with it. This method aids in determining the assets' 'Net Present Value.'

The financial manager, on the other hand, is also in-charge of the efficient management of current assets, also known as working capital management. Working capital is an essential component of financial management. These decisions include whether to invest funds in inventory, cash, bank deposits, or other short-term investments. They have a direct impact on the liquidity and performance of the business.

2. Financing Decision

The second critical function is financial decision-making. It is concerned with a company's capital – mix, financing – mix, or capital structure. The proportion of debt capital and equity capital is referred to as capital structure. A firm's financing decision is related to the financing – mix. Finance acquisition decisions must be made by the finance manager.

It must be decided whether the entire required capital should be raised in the form of equity capital or whether the amount should be from the loan fund. Even the timing of capital acquisition should be well defined. In a firm's financing decisions, there is a conflict between return and risk. As a result, the financial manager must strike a balance between risk and return by maintaining the proper balance of debt and equity capital. On the other hand, it is also the financial manager's job to identify an appropriate capital structure. The ideal capital structure would always maximize wealth.

3. Dividend Decision

The dividend policy decision is the third major function. Decisions on dividend policy are concerned with the distribution of a company's profits to its shareholders. How much of the profits should be distributed as dividends, specifically, the dividend pay-out ratio.

The decision will be based on the shareholder's preferences, investment opportunities within the firm, and opportunities for future growth of the

firm. The dividend payout ratio must be determined in light of the goal of increasing the share's market value. As a result, the dividend decision has become a critical component of the financing decision. Dividend decision-making must be evaluated with respect to the firm's financing decisions to decide the part of retained earnings to be used as direct financing for the company's future expansions.

IMPORTANCE OF FINANCIAL MANAGEMENT

Finance is the lifeblood of a business organization. It needs to meet the requirements of the business concern. Each and every business concern must maintain an adequate amount of finance for the smooth running and achieve the goal of the business concern. The business goal can be achieved only with the help of effective management of finance. We can't neglect the importance of finance at any time and at any situation. Some of the importance of financial management is as follows:

Employees

Efficient financial management helps in profit maximization and also welfare of the employees by payment of incentives, bonus and increment in salary.

Shareholders

Financial management plays an important role towards dividend payment to the shareholders by taking correct and timely financial decisions.

Government

Financial management helps the firm to fulfill the duties and responsibilities towards the government by payment of tax, licence fees, etc.

Customers

Proper planning of financial matters leads to customers satisfaction by providing good and quality products and services at reasonable prices.

Management

Efficient Financial management helps the management in overall image building, increase in the market share, optimizing shareholders wealth and profit.

Other departments

Financial management through efficient management of funds has to ensure that adequate funds are made available to all departments like productions, marketing, etc for their smooth functioning.

lenders

lenders rely on effective financial management for safety of their funds, timely repayment of the principal amount as well as interest on the same.

Helps to study Risk-Return Relationship

The prospective investors expect higher returns on investment from the firm, therefore there is a need for Financial Management.

Promoting Savings

Savings are possible only when the business concern earns higher profitability and maximizes wealth. Effective financial management helps to promote and mobilize individual and corporate savings.

Nowadays financial management is also popularly known as business finance or corporate finances. The business concern or corporate sectors cannot function without the importance of financial management.

NATURE OF FINANCIAL MANAGEMENT

The nature of financial management includes the following –

Estimates the amount of funds needed

Financial management aids in the planning of funds by estimating the amount of working and fixed capital required to carry out business operations. Financial management aids in the estimation of money for the firm's short, medium, and long term operations.

Determine the capital structure

A proper balance of debt and equity should be achieved in order to reduce the cost of capital. Financial management determines the appropriate allocation of various securities like equity and debt.

Select source of fund

Source of funds is one of the crucial decisions in every organization. Every organization should properly analyze various sources of funds (shares, bonds, debentures etc.) and must select appropriate funds which involve minimal risk.

Fund Management

All cash movements (inflow and outflow) are monitored by the finance manager to ensure that there are no cash shortages or surpluses.

Suitable to all concern

The financial management concept is relevant to all types of businesses, whether they are small, medium, or large, profit or non-profit, educational or corporate, and so on.

Goal

Financial management establishes the firm's objectives and goals, as well as the path for achieving current and future objectives.

Decision Making

Financial management assists the firm's top management in making accurate and timely decisions.

Optimum use of resources

Financial management aids in the efficient and appropriate utilization of available financial resources, resulting in the firm's success and profit.

SCOPE OF FINANCIAL MANAGEMENT

Financial management is concerned with acquiring finance as well as utilizing it to the best of one's ability for the firm's growth and development.

Cash management

The financial manager must manage cash because sufficient cash availability is required to meet the cash requirements of the firm's various departments.

Profit maximization

Financial manager has to plan the activities to achieve profit maximization and future prospects of the firm by adopting profit maximization approach.

Capital budgeting

Financial managers has to study the area of future long term projects and its profitability through the systematic investment programme, that is capital budgeting. As per firm's cash flows and availability of funds capital budgeting should be essentially done.

Capital structure - Finance manager need to ensure proper and regular financing for the firm by assuring appropriate capital structure of the firm.

Working capital management

Financial manager has to study the regular working capital changes and accordingly assigns the finance required as per the changes so as to ensure adequate liquidity in the firm.

Financial performance evaluation

Management information and control systems (MICS) constantly review the financial performance of the entire organization and assist in evaluating how funds have been used in various divisions and what can be done to improve it.

LIMITATIONS OF FINANCIAL MANAGEMENT

It is critical that financial management objectives are properly understood. Organizational leaders must make the necessary efforts to understand regulatory requirements and develop procedures that meet the standards without incurring excessive costs. To better understand the limitations of financial management, let us first take a look at them.

Uncertainty regarding the future

The assumption about the project's future circumstances is a major drawback of financial management. The nature of the future is unexpected, and things do not always turn out the way we expect them to. The dependability of financial data is greatly influenced by future uncertainty.

Rigidity

Financial management contributes to organizational rigidity by establishing specific criteria for evaluating performance. All of the standards are set in accordance with a set of criteria. As a result of the rigidity of standards, it is impossible to meaningfully compare real and standard performance.

Inaccuracy in the Data Used to Make Decisions

Financial management is the process method of predicting the future based on past or researched data gathered from various sources. If financial management data has limitations, the data's foundation is faulty, as the results purpose of financial planning could be impacted incorrectly. Because all predictions may be incorrect, the credibility and quality of the data on which the computations are based are critical.

Criteria standardization and determination

Financial management necessitates the development of performance criteria for assessing actual performance, which would be a time-consuming and complex process. There are no appropriate setup prerequisites for establishing standards, and the standards may be formed inaccurately.

Rapid changes in the environment and public policy

Government laws and regulations guiding the economic environment may change significantly, which can have a significant effect on financial management. If the strategy does not have the agility to adapt to changing conditions, it may go from being a perfect financial plan to a financial failure.

Inadequate availability of essential information

Financial records can be altered for a variety of reasons. This is the most major drawback of financial management. It could, for example, be presented in accordance with management's wishes or formed from the

viewpoint of shareholders. Profits and financial circumstances, as well as the rate of profitability, are the only things that are made publicly available when it comes to financial management.

Warning

Business executives must have systems in place to keep ahead of the rapidly changing regulatory environment. The employer is responsible for making changes to company policies to accommodate this change. Penalties are imposed regardless of whether or not business owners are aware of the change. To overcome the disadvantages of financial management, one should always have up-to-date business information.

Costly

For commercial enterprises, financial management is a time-consuming and costly activity. Financial management comprises the use of various financial control instruments to manage and measure costs. These tools are both costly and time-consuming to operate.

A challenge in setting a reasonable price

Financial management is assigned with the primary responsibility of generating income streams for the firm. Each time new manufacturing processes, business models, or customer preferences are introduced, new needs are created. Financial management's dependability and limitations are debatable, and its effectiveness is strongly questioned.

External Sources Factors

External factors which are not directly involved in your business strategy but have the potential to have a negative impact on your planning, such as war, natural disasters, pandemics, and other such events, are extremely difficult or impossible to predict. To avoid these types of financial management constraints, you must take appropriate steps, such as insurance, to minimize the financial loss that can result from such difficulties.

PREPARATION OF FINANCIAL STATEMENT ADHERING TO CURRENT STATUTORY REQUIREMENT

[The below content has been adapted from Institute of Chartered Accountant of India (ICAI)]

GENERAL INSTRUCTIONS FOR PREPARATION OF BALANCE SHEET AND STATEMENT OF PROFIT AND LOSS OF A COMPANY

GENERAL INSTRUCTIONS

1. Where compliance with the requirements of the Act including Accounting Standards as applicable to the companies require any change in treatment or disclosure including addition, amendment, substitution or deletion in the head or subhead or any changes, inter se, in the financial

statements or statements forming part thereof, the same shall be made and the requirements of this Schedule shall stand modified accordingly.

2. The disclosure requirements specified in this Schedule are in addition to and not in substitution of the disclosure requirements specified in the Accounting Standards under the Companies Act, 2013. Additional disclosures specified in the Accounting Standards shall be made in the notes to accounts or by way of additional statement unless required to prescribed be disclosed on the face of the Financial Statements. Similarly, all other disclosures as required by the Companies Act shall be made in the notes to accounts in addition to the requirements set out in this Schedule.

3. (i) Notes to accounts shall contain information in addition to that presented in the Financial Statements and shall provide where required

(a) narrative descriptions or dis-aggregations of items recognized in those statements; and

(b) information about items that do not qualify for recognition in those statements.

(ii) Each item on the face of the Balance Sheet and Statement of Profit and Loss shall be cross-referenced to any related information in the notes to accounts. In preparing the Financial Statements including the notes to accounts, a balance shall be maintained between providing excessive detail that may not assist users of financial statements and not providing important information as a result of too much aggregation.

4. (i) Depending upon the turnover of the company, the figures appearing in the Financial Statements may be rounded off as given below:—

| Sr. No. | Turnover | Rounding off |
|----------------|------------------------------------|---|
| 1 | Less than one hundred crore rupees | To the nearest hundreds, thousands, lakhs or millions, or decimals thereof. |
| 2 | One hundred crore rupees or more | To the nearest lakhs, millions or crores, or decimals thereof. |

(ii) Once a unit of measurement is used, it shall be used uniformly in the Financial Statements.

5. Except in the case of the first Financial Statements laid before the Company (after its incorporation) the corresponding amounts (comparatives) for the immediately preceding reporting period for all

items shown in the Financial Statements including notes shall also be given.

6. For the purpose of this Schedule, the terms used herein shall be as per the applicable Accounting Standards.

Note: This part of Schedule sets out the minimum requirements for disclosure on the face of the Balance Sheet, and the Statement of Profit and Loss (hereinafter referred to as “Financial Statements” for the purpose of this Schedule) and Notes. Line items, sub-line items and sub-totals shall be presented as an addition or substitution on the face of the Financial Statements when such presentation is relevant to an understanding of the company’s financial position or performance or to cater to industry/sector-specific disclosure requirements or when required for compliance with the amendments to the Companies Act or under the Accounting Standards.

PART I — BALANCE SHEET

Name of the Company.....

Balance Sheet as at

| Particulars | Note No. | Figures as at the end of current reporting period | Figures as at the end of previous reporting period |

| | | | |
| TOTAL (1+2) | | | |

See accompanying notes to the Financial Statements.

General Instructions for Preparation of Balance Sheet

1. An **operating cycle** is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. Where the normal operating cycle cannot be identified, it is assumed to have a duration of twelve months.
2. An asset shall be classified as current when it satisfies any of the following criteria:—
 - a) it is expected to be realised in, or is intended for sale or consumption in, the company's normal operating cycle;
 - b) it is held primarily for the purpose of being traded;
 - c) it is expected to be realised within twelve months after the reporting date; or
 - d) it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets shall be classified as non-current.

3. A liability shall be classified as current when it satisfies any of the following criteria:—
 - (a) it is expected to be settled in the company's normal operating cycle;
 - (b) it is held primarily for the purpose of being traded;
 - (c) it is due to be settled within twelve months after the reporting date; or
 - (d) the company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities shall be classified as non-current.

4. A receivable shall be classified as a "**trade receivable**" if it is in respect of the amount due on account of goods sold or services rendered in the normal course of business.
5. A payable shall be classified as a "**trade payable**" if it is in respect of the amount due on account of goods purchased or services received in the normal course of business.
6. A company shall disclose the following in the notes to accounts.

A. Share Capital

For each class of share capital (different classes of preference shares to be treated separately):

- (a) the number and amount of shares authorised;
- (b) the number of shares issued, subscribed and fully paid, and subscribed but not fully paid;
- (c) par value per share;
- (d) a reconciliation of the number of shares outstanding at the beginning and at the end of the reporting period;
- (e) the rights, preferences and restrictions attaching to each class of shares including restrictions on the distribution of dividends and the repayment of capital;
- (f) shares in respect of each class in the company held by its holding company or its ultimate holding company including shares held by or by subsidiaries or associates of the holding company or the ultimate holding company in aggregate;
- (g) shares in the company held by each shareholder holding more than 5 per cent. shares specifying the number of shares held;
- (h) shares reserved for issue under options and contracts/commitments for the sale of shares/disinvestment, including the terms and amounts;
- (i) for the period of five years immediately preceding the date as at which the Balance Sheet is prepared:
 - (A) Aggregate number and class of shares allotted as fully paid-up pursuant to contract(s) without payment being received in cash.
 - (B) Aggregate number and class of shares allotted as fully paid-up by way of bonus shares.
 - (C) Aggregate number and class of shares bought back.
- (j) terms of any securities convertible into equity/preference shares issued along with the earliest date of conversion in descending order starting from the farthest such date;
- (k) calls unpaid (showing aggregate value of calls unpaid by directors and officers);
- (l) forfeited shares (amount originally paid-up).

B. Reserves and Surplus

- (i) Reserves and Surplus shall be classified as:
 - (a) Capital Reserves;
 - (b) Capital Redemption Reserve;
 - (c) Securities Premium Reserve;
 - (d) Debenture Redemption Reserve;

- (e) Revaluation Reserve;
 - (f) Share Options Outstanding Account;
 - (g) Other Reserves—(specify the nature and purpose of each reserve and the amount in respect thereof);
 - (h) Surplus i.e., balance in Statement of Profit and Loss disclosing allocations and appropriations such as dividend, bonus shares and transfer to/ from reserves, etc.;
- (Additions and deductions since last balance sheet to be shown under each of the specified heads)
- (ii) A reserve specifically represented by earmarked investments shall be termed as a “fund”.
 - (iii) Debit balance of statement of profit and loss shall be shown as a negative figure under the head “Surplus”. Similarly, the balance of “Reserves and Surplus”, after adjusting negative balance of surplus, if any, shall be shown under the head “Reserves and Surplus” even if the resulting figure is in the negative.

C. Long-Term Borrowings

- (i) Long-term borrowings shall be classified as:
 - (a) Bonds/debentures;
 - (b) Term loans:
 - (A) from banks.
 - (B) from other parties.
 - (c) Deferred payment liabilities;
 - (d) Deposits;
 - (e) Loans and advances from related parties;
 - (f) Long term maturities of finance lease obligations;
 - (g) Other loans and advances (specify nature).
- (ii) Borrowings shall further be sub-classified as secured and unsecured. Nature of security shall be specified separately in each case.
- (iii) Where loans have been guaranteed by directors or others, the aggregate amount of such loans under each head shall be disclosed.
- (iv) Bonds/debentures (along with the rate of interest and particulars of redemption or conversion, as the case may be) shall be stated in descending order of maturity or conversion, starting from farthest redemption or conversion date, as the case may be. Where bonds/debentures are redeemable by instalments, the date of maturity

for this purpose must be reckoned as the date on which the first instalment becomes due.

- (v) Particulars of any redeemed bonds/debentures which the company has power to reissue shall be disclosed.
- (vi) Terms of repayment of term loans and other loans shall be stated.
- (vii) Period and amount of continuing default as on the balance sheet date in repayment of loans and interest, shall be specified separately in each case.

D. Other Long-term Liabilities

Other Long-term Liabilities shall be classified as:

- (a) Trade payables;
- (b) Others.

E. Long-term provisions

The amounts shall be classified as:

- (a) Provision for employee benefits;
- (b) Others (specify nature).

F. Short-term borrowings

(i) Short-term borrowings shall be classified as:

- (a) Loans repayable on demand;
 - (A) from banks.
 - (B) from other parties.
- (b) Loans and advances from related parties;
- (c) Deposits;
- (d) Other loans and advances (specify nature).

(ii) Borrowings shall further be sub-classified as secured and unsecured. Nature of security shall be specified separately in each case.

(iii) Where loans have been guaranteed by directors or others, the aggregate amount of such loans under each head shall be disclosed.

(iv) Period and amount of default as on the balance sheet date in repayment of loans and interest, shall be specified separately in each case.

(v) current investment of long term borrowings shall be disclosed separately.

G. Other current liabilities

The amounts shall be classified as:

- (a) Current maturities of finance lease obligations;
- (b) Interest accrued but not due on borrowings;
- (c) Interest accrued and due on borrowings;
- (d) Income received in advance;
- (e) Unpaid dividends;
- (f) Application money received for allotment of securities and due for refund and interest accrued thereon. Share application money includes advances towards allotment of share capital. The terms and conditions including the number of shares proposed to be issued, the amount of premium, if any, and the period before which shares shall be allotted shall be disclosed. It shall also be disclosed whether the company has sufficient authorised capital to cover the share capital amount resulting from allotment of shares out of such share application money. Further, the period for which the share application money has been pending beyond the period for allotment as mentioned in the document inviting application for shares along with the reason for such share application money being pending shall be disclosed. Share application money not exceeding the issued capital and to the extent not refundable shall be shown under the head Equity and share application money to the extent refundable, i.e., the amount in excess of subscription or in case the requirements of minimum subscription are not met, shall be separately shown under “Other current liabilities”;
- (g) Unpaid matured deposits and interest accrued thereon;
- (h) Unpaid matured debentures and interest accrued thereon;
- (i) Other payables (specify nature).

H. Short-term provisions

The amounts shall be classified as:

- (a) Provision for employee benefits.
- (b) Others (specify nature).

I. Tangible assets

(i) Classification shall be given as:

- (a) Land;
- (b) Buildings;
- (c) Plant and Equipment;

(d) Furniture and Fixtures;

(e) Vehicles;

(f) Office equipment;

(g) Others (specify nature).

(ii) Assets under lease shall be separately specified under each class of asset.

(iii) A reconciliation of the gross and net carrying amounts of each class of assets at the beginning and end of the reporting period showing additions, disposals, acquisitions through business combinations, amount of change due to revaluation (if changes 10% or more in the aggregate in the net carrying value of each class of tangible assets) and other adjustments and the related depreciation and impairment losses/reversals shall be disclosed separately.

(iv) Where sums have been written-off on a reduction of capital or revaluation of assets or where sums have been added on revaluation of assets, every balance sheet subsequent to date of such write-off, or addition shall show the reduced or increased figures as applicable and shall by way of a note also show the amount of the reduction or increase as applicable together with the date thereof for the first five years subsequent to the date of such reduction or increase.

J. Intangible assets

(i) Classification shall be given as:

(a) Goodwill;

(b) Brands /trademarks;

(c) Computer software;

(d) Mastheads and publishing titles;

(e) Mining rights;

(f) Copyrights, and patents and other intellectual property rights, services and operating rights;

(g) Recipes, formulae, models, designs and prototypes;

(h) Licences and franchise;

(i) Others (specify nature).

(ii) A reconciliation of the gross and net carrying amounts of each class of assets at the beginning and end of the reporting period showing additions, disposals, acquisitions through business combinations, amount of change due to revaluation (if changes 10% or more in the aggregate in the net carrying value of each class of intangible assets) and other adjustments

and the related amortization and impairment losses/reversals shall be disclosed separately.

(iii) Where sums have been written-off on a reduction of capital or revaluation of assets or where sums have been added on revaluation of assets, every balance sheet subsequent to date of such write-off, or addition shall show the reduced or increased figures as applicable and shall by way of a note also show the amount of the reduction or increase as applicable together with the date thereof for the first five years subsequent to the date of such reduction or increase.

K. Non-current investments

(i) Non-current investments shall be classified as trade investments and other investments and further classified as:

- (a) Investment property;
- (b) Investments in Equity Instruments;
- (c) Investments in preference shares;
- (d) Investments in Government or trust securities;
- (e) Investments in debentures or bonds;
- (f) Investments in Mutual Funds;
- (g) Investments in partnership firms;
- (h) Other non-current investments (specify nature).

Under each classification, details shall be given of names of the bodies corporate indicating separately whether such bodies are (i) subsidiaries, (ii) associates, (iii) joint ventures, or (iv) controlled special purpose entities in whom investments have been made and the nature and extent of the investment so made in each such body corporate (showing separately investments which are partly-paid). In regard to investments in the capital of partnership firms, the names of the firms (with the names of all their partners, total capital and the shares of each partner) shall be given.

(ii) Investments carried at other than at cost should be separately stated specifying the basis for valuation thereof;

(iii) The following shall also be disclosed:

- (a) Aggregate amount of quoted investments and market value thereof;
- (b) Aggregate amount of unquoted investments;
- (c) Aggregate provision for diminution in value of investments.

L. Long-term loans and advances

- (i) Long-term loans and advances shall be classified as:
 - (a) Capital Advances;
 - (b) Loans and advances to related parties (giving details thereof);
 - (c) Other loans and advances (specify nature).
- (ii) The above shall also be separately sub-classified as:
 - (a) Secured, considered good;
 - (b) Unsecured, considered good;
 - (c) Doubtful.
- (iii) Allowance for bad and doubtful loans and advances shall be disclosed under the relevant heads separately.
- (iv) Loans and advances due by directors or other officers of the company or any of them either severally or jointly with any other persons or amounts due by firms or private companies respectively in which any director is a partner or a director or a member should be separately stated.

M. Other non-current assets

Other non-current assets shall be classified as:

- (i) Long-term Trade Receivables (including trade receivables on deferred credit terms);
 - (a) Security Deposits;
- (ii) Others (specify nature);
- (iii) Long term Trade Receivables, shall be sub-classified as:
 - (a) (A) Secured, considered good;
 - (B) Unsecured, considered good;
 - (C) Doubtful.
 - (b) Allowance for bad and doubtful debts shall be disclosed under the relevant heads separately.
 - (c) Debts due by directors or other officers of the company or any of them either severally or jointly with any other person or debts due by firms or private companies respectively in which any director is a partner or a director or a member should be separately stated.
- (iv) For trade receivables outstanding, following ageing schedule shall be given:

Trade Receivables ageing schedule

(Amount in Rs.)

| Particulars | Outstanding for following periods from due date of payment # | | | | | Total |
|---|--|-----------------|-----------|-----------|-------------------|-------|
| | Less than 6 months | 6 months-1 year | 1-2 years | 2-3 years | More than 3 years | |
| (i) Undisputed Trade receivables - considered good | | | | | | |
| (ii) Undisputed Trade receivables - considered doubtful | | | | | | |
| (iii) Disputed Trade receivables - considered good | | | | | | |
| (iv) Disputed Trade receivables - considered doubtful | | | | | | |

similar information shall be given where no due date of payment is specified, in that case disclosure shall be from the date of the transaction.

Unbilled dues shall be disclosed separately

N. Current Investments

(i) Current investments shall be classified as:

- (a) Investments in Equity Instruments;
- (b) Investment in Preference Shares;
- (c) Investments in Government or trust securities;
- (d) Investments in debentures or bonds;
- (e) Investments in Mutual Funds;
- (f) Investments in partnership firms;
- (g) Other investments (specify nature).

Under each classification, details shall be given of names of the bodies corporate [indicating separately whether such bodies are: (i) subsidiaries, (ii) associates, (iii) joint ventures, or (iv) controlled special purpose entities] in whom investments have been made and the nature and extent of the investment so made in each such body corporate (showing separately investments which are partly paid). In regard to investments in the capital of partnership firms, the names of the firms (with the names of all their partners, total capital and the shares of each partner) shall be given.

(ii) The following shall also be disclosed:

- (a) The basis of valuation of individual investments;
- (b) Aggregate amount of quoted investments and market value thereof;
- (c) Aggregate amount of unquoted investments;
- (d) Aggregate provision made for diminution in value of investments.

O. Inventories

(i) Inventories shall be classified as:

- (a) Raw materials;
- (b) Work-in-progress;
- (c) Finished goods;
- (d) Stock-in-trade (in respect of goods acquired for trading);
- (e) Stores and spares;
- (f) Loose tools;
- (g) Others (specify nature).

(ii) Goods-in-transit shall be disclosed under the relevant sub-head of inventories.

(iii) Mode of valuation shall be stated.

P. Trade Receivables

(i) For trade receivables outstanding, following ageing schedule shall be given:

Trade Receivables ageing schedule

(Amount in Rs.)

| Particulars | Outstanding for following periods from due date of payment # | | | | | Total |
|---|--|-----------------|-----------|-----------|-------------------|-------|
| | Less than 6 months | 6 months-1 year | 1-2 years | 2-3 years | More than 3 years | |
| (i) Undisputed Trade receivables - considered good | | | | | | |
| (ii) Undisputed Trade receivables - considered doubtful | | | | | | |
| (iii) Disputed Trade receivables - considered good | | | | | | |
| (iv) Disputed Trade receivables - considered doubtful | | | | | | |

similar information shall be given where no due date of payment is specified, in that case disclosure shall be from the date of the transaction.

Unbilled dues shall be disclosed separately\

(ii) Trade receivables shall be sub-classified as:

(a) Secured, considered good;

(b) Unsecured, considered good;

(c) Doubtful.

(iii) Allowance for bad and doubtful debts shall be disclosed under the relevant heads separately.

(iv) Debts due by directors or other officers of the company or any of them either severally or jointly with any other person or debts due by firms or private companies respectively in which any director is a partner or a director or a member should be separately stated.

Q. Cash and cash equivalents

(i) Cash and cash equivalents shall be classified as:

(a) Balances with banks;

- (b) Cheques, drafts on hand;
- (c) Cash on hand;
- (d) Others (specify nature).
- (ii) Earmarked balances with banks (for example, for unpaid dividend) shall be separately stated.
- (iii) Balances with banks to the extent held as margin money or security against the borrowings, guarantees, other commitments shall be disclosed separately.
- (iv) Repatriation restrictions, if any, in respect of cash and bank balances shall be separately stated.
- (v) Bank deposits with more than twelve months maturity shall be disclosed separately.

R. Short-term loans and advances

- (i) Short-term loans and advances shall be classified as:
 - (a) Loans and advances to related parties (giving details thereof);
 - (b) Others (specify nature).
- (ii) The above shall also be sub-classified as:
 - (a) Secured, considered good;
 - (b) Unsecured, considered good;
 - (c) Doubtful.
- (iii) Allowance for bad and doubtful loans and advances shall be disclosed under the relevant heads separately.
- (iv) Loans and advances due by directors or other officers of the company or any of them either severally or jointly with any other person or amounts due by firms or private companies respectively in which any director is a partner or a director or a member shall be separately stated.

S. Other current assets (specify nature)

This is an all-inclusive heading, which incorporates current assets that do not fit into any other asset categories.

T. Contingent liabilities and commitments (to the extent not provided for)

- (i) Contingent liabilities shall be classified as:
 - (a) Claims against the company not acknowledged as debt;

(b) Guarantees;

(c) Other money for which the company is contingently liable.

(ii) Commitments shall be classified as:

(a) Estimated amount of contracts remaining to be executed on capital account and not provided for;

(b) Uncalled liability on shares and other investments partly paid;

(c) Other commitments (specify nature).

U. The amount of dividends proposed to be distributed to equity and preference shareholders for the period and the related amount per share shall be disclosed separately. Arrears of fixed cumulative dividends on preference shares shall also be disclosed separately.

V. Where in respect of an issue of securities made for a specific purpose, the whole or part of the amount has not been used for the specific purpose at the balance sheet date, there shall be indicated by way of note how such unutilised amounts have been used or invested.

Where the company has not used the borrowings from banks and financial institutions for the specific purpose for which it was taken at the balance sheet date, the company shall disclose the details of where they have been used.

W. If, in the opinion of the Board, any of the assets other than fixed assets and non-current investments do not have a value on realisation in the ordinary course of business at least equal to the amount at which they are stated, the fact that the Board is of that opinion, shall be stated.

PART II – STATEMENT OF PROFIT AND LOSS

Name of the Company.....

Profit and loss statement for the year ended

| | Particulars | Note No. | Figures as at the end of current reporting period | Figures as at the end of the previous reporting period |

(c) Any item of income or expenditure which exceeds one per cent of the revenue from operations or Rs.1,00,000, whichever is higher;

(d) Interest Income;

(e) Interest expense;

(f) Dividend income;

(g) Net gain/loss on sale of investments;

(h) Adjustments to the carrying amount of investments;

(i) Net gain or loss on foreign currency transaction and translation (other than considered as finance cost);

(j) Payments to the auditor as

(a) auditor;

(b) for taxation matters;

(c) for company law matters;

(d) for management services;

(e) for other services; and

(f) for reimbursement of expenses;

(k) In case of Companies covered under section 135, amount of expenditure incurred on corporate social responsibility activities;

(l) Details of items of exceptional and extraordinary nature;

(m) Prior period items;

(ii) (a) In the case of manufacturing companies,—

(1) Raw materials under broad heads.

(2) goods purchased under broad heads.

(b) In the case of trading companies, purchases in respect of goods traded in by the company under broad heads.

(c) In the case of companies rendering or supplying services, gross income derived from services rendered or supplied under broad heads.

(d) In the case of a company, which falls under more than one of the categories mentioned in (a), (b) and (c) above, it shall be sufficient compliance with the requirements herein if purchases, sales and consumption of raw material and the gross income from services rendered is shown under broad heads.

(e) In the case of other companies, gross income derived under broad heads.

(iii) In the case of all concerns having works in progress, works-in-progress under broad heads.

(iv) (a) The aggregate, if material, of any amounts set aside or proposed to be set aside, to reserve, but not including provisions made to meet any specific liability, contingency or commitment known to exist at the date as to which the balance sheet is made up.

(b) The aggregate, if material, of any amounts withdrawn from such reserves.

(v) (a) The aggregate, if material, of the amounts set aside to provisions made for meeting specific liabilities, contingencies or commitments.

(b) The aggregate, if material, of the amounts withdrawn from such provisions, as no longer required.

(vi) Expenditure incurred on each of the following items, separately for each item:—

(a) Consumption of stores and spare parts;

(b) Power and fuel;

(c) Rent;

(d) Repairs to buildings;

(e) Repairs to machinery;

(f) Insurance;

(g) Rates and taxes, excluding, taxes on income;

(h) Miscellaneous expenses,

(vii) (a) Dividends from subsidiary companies.

(b) Provisions for losses of subsidiary companies

(viii) The profit and loss account shall also contain by way of a note the following information, namely:—

(a) Value of imports calculated on C.I.F basis by the company during the financial year in respect of—

- I. Raw materials;
- II. Components and spare parts;
- III. Capital goods;

(b) Expenditure in foreign currency during the financial year on account of royalty, know-how, professional and consultation fees, interest, and other matters;

(c) Total value if all imported raw materials, spare parts and components consumed during the financial year and the total value of all indigenous raw materials, spare parts and components similarly consumed and the percentage of each to the total consumption;

(d) The amount remitted during the year in foreign currencies on account of dividends with a specific mention of the total number of non-resident shareholders, the total number of shares held by them on which the dividends were due and the year to which the dividends related;

(e) Earnings in foreign exchange classified under the following heads, namely:—

- I. Export of goods calculated on F.O.B. basis;
- II. Royalty, know-how, professional and consultation fees;
- III. Interest and dividend;
- IV. Other income, indicating the nature thereof.

(ix) Undisclosed income: The Company shall give details of any transaction not recorded in the books of accounts that has been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (such as, search or survey or any other relevant provisions of the Income Tax Act, 1961), unless there is immunity for disclosure under any scheme and also shall state whether the previously unrecorded income and related assets have been properly recorded in the books of account during the year.

(x) Corporate Social Responsibility (CSR)

Where the company covered under section 135 of the companies act the following shall be disclosed with regard to CSR activities:

- (a) amount required to be spent by the company during the year,
- (b) amount of expenditure incurred,
- (c) shortfall at the end of the year,
- (d) total of previous years shortfall,

- (e) reason for shortfall,
- (f) nature of CSR activities,
- (g) details of related party transactions, e.g., contribution to a trust controlled by the company in relation to CSR expenditure as per relevant Accounting Standard,
- (h) where a provision is made with respect to a liability incurred by entering into a contractual obligation, the movements in the provision during the year should be shown separately.
- (xi) Details of Crypto Currency or Virtual Currency

Where the Company has traded or invested in Crypto currency or Virtual Currency during the financial year, the following shall be disclosed:

- (a) profit or loss on transactions involving Crypto currency or Virtual Currency
- (b) amount of currency held as at the reporting date, deposits or advances from any

Note:— Broad heads shall be decided taking into account the concept of materiality and presentation of true and fair view of financial statements.

ANALYSIS OF FINANCIAL STATEMENTS

Unit Structure

- 2.0 Learning Objectives
- 2.1 The Financial Statements
- 2.2 Need and Importance of Financial Statement
- 2.3 Analysis and Interpretation
- 2.4 Balance Sheet
- 2.5 Income Statement

2.0 LEARNING OBJECTIVES

After studying the unit, the students will be able to:

- Understand the objectives and nature of Financial Statements.
- Know the characteristics of Financial Statements.
- Discuss about the qualities of Ideal Financial Statements.
- Interpret the financial statements.

2.1 THE FINANCIAL STATEMENTS

- (i) "Financial Statements" is a set of documents consisting of:
 - (a) **Balance Sheet** as on date - shows position of assets and liabilities as on date.
 - (b) **Profit and loss** account- shows profit or loss for the period.
 - (c) **Cash Flow Statement**- wherever applicable
 - (d) **Statements and Explanatory Notes** – part of balance sheet
 - (e) **Supplementary Schedule and Information**
- (ii) The financial statements help one to realize,
 - the progress made by a business,
 - the resources utilized by the business or
 - the failure suffered by a business.
- (iii) Financial statement does not include
 - Report by directors
 - Statement by the chairman
 - Management discussion & analysis report (MDAR)

2.2 NEED AND IMPORTANCE OF FINANCIAL STATEMENT

The users of these financial statements need to have an honest assurance that the statements have been properly

- Compiled,
- Prepared, and
- Presented.

They want a reasonable degree of assurance as regards the reliability and accuracy of the financial statement.

Limitations of Financial statements

The company releases financial statements, and hence the obvious limitation is that the information an analyst gets is limited to what the company wants to show and how it plans to manipulate the information.

Limitations of Financial Statements

Interim

1. Only Interim Reports

The data in financial statements is based on approximation and do not give a clear picture. The actual results can only be known in condition of sale or liquidation of business. Generally statements are prepared for different accounting period say yearly, during the lifetime of concern. Cost and income be apportioned to different periods with a view to determine profits etc.

Accountant, on his personal judgement do allocation of income and expenses. The existence of contingent assets and liabilities also make statements imprecise. So financial statements do not actual picture and at the most they are interim reports

2. Exact position not known

The financial statements are expressed in monetary terms, so they tend to give final and accurate position. The fixed asset value in the balance sheet neither represents the value for which fixed assets can be sold nor the amount which will be required to replace these assets. The balance sheet is prepared on the presumption of a going concern.

So, fixed assets are shown at cost less accumulated depreciation. There are certain assets in the balance sheet such as preliminary expenses, goodwill, discount on issue of shares which will realize nothing at the time of liquidation though they are shown in the balance sheet.

3. Historical cost

The financial statements are prepared on the basis of historical costs or original costs. The diminishing value in asset is not accounted for. The statements are not prepared keeping in view the present economic conditions.

The balance sheet loses the significance of being an index of current economic realities. Similarly, the profitability shown by the income statement may not represent the earning capacity of the concern. The increase in profits may be due to an increase in prices or due to some abnormal causes and not due to increase in efficiency. The conclusions drawn from financial statements may not give a fair picture of the concern

4. Non-monetary factors impact left unseen

There are certain factors which have a relevance on the financial position and operating results of the business but they do not become a part of these statements because they cannot be measured in monetary terms.

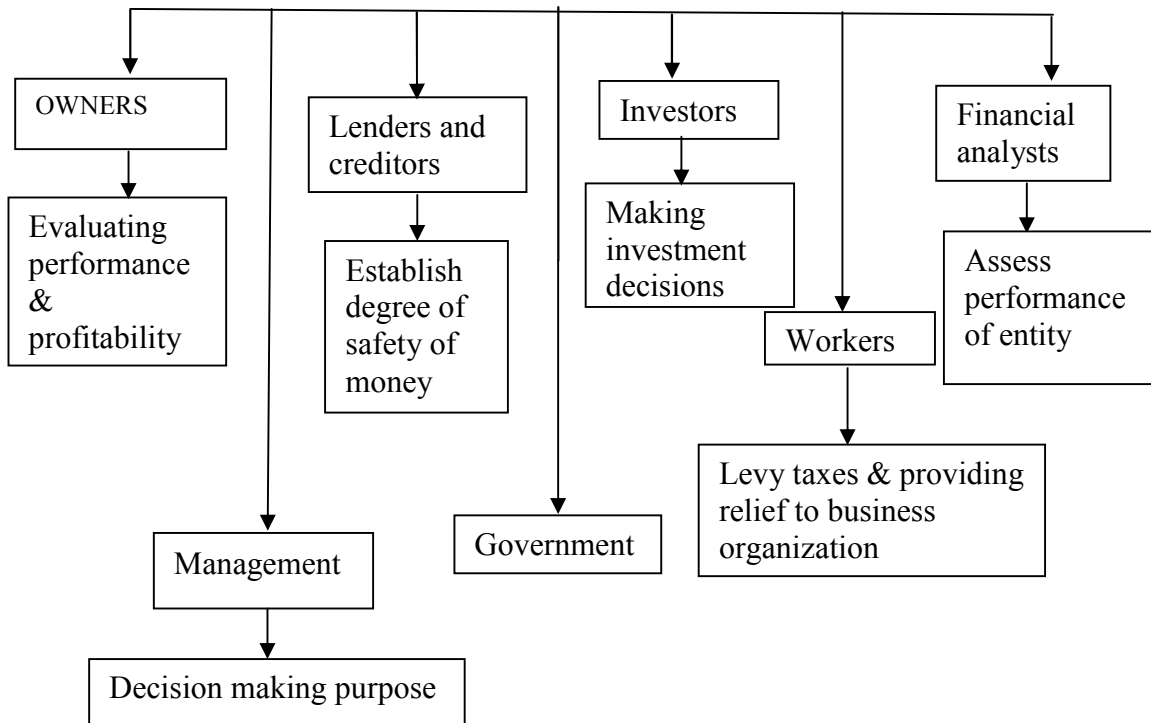

Such factors may include the management reputation credit worthiness of the concern, sources and commitments for purchases and sales, co-operation of the employees, etc. The financial statements only show the position of the financial accounting for business and not the financial position.

5. No precision in Financial Statements

There is no possibility in precision of financial statements because the statements deal with matters which cannot be precisely stated. The data are recorded by conventional procedures followed over the years. Various conventions, postulates, personal judgments etc. are used for developing the data.

USERS AND THEIR PURPOSE

Analysis of Financial Statements

2.3 ANALYSIS AND INTERPRETATION

(1) Need for Analysis and Interpretation : A typical Financial Statement of a company may run into many pages. It normally contains a huge mass of data and figures. A common user would be at a loss to understand which figures are important and what is the exact significance of all the figures shown in the Financial Statements. The Financial Statements are basically prepared for the owners or managers and outsiders such as Creditors, Lenders or researchers have re-organise the figures appearing in the Financial Statements for the purpose of their study.

(2) Meaning of Analysis: 'Analysis' means - to resolve something into its elements or components, For an outside user, the details in the Financial Statements signify only raw data or 'raw material'! This raw material' needs to be re-organised, processed and converted into an easy to understand form. The process of breaking up a large mass of raw data into manageable form is called 'analysis' of the Financial Statements.

(3) Financial Statement Analysis : Financial statement analysis is a process of evaluating the relationship between the component parts of a financial statement to obtain a better understanding of a firm's financial position and performance (Metcalf and Tigard). Analysis of Profit and Loss Account, therefore, means breaking down the Profit and Loss Account

into its various components or segments i.e. Gross Sales, Net Sales, Cost of Goods Sold, Operating Profit and so on. This is done by converting the T Form Profit and Loss Account into a Vertical Income Statement. Analysis of Balance Sheet means breaking down or "analysing" the Funds into Total Funds Available and Total Funds Employed. The Total Funds Available are further broken down into Owners' Funds and Loan Funds. The Total Funds employed are broken down into Fixed Assets and Working Capital. This is done by converting the T Form Balance Sheet into a Vertical Balance Sheet.

2.4 BALANCE SHEET

ASSETS

Definitions

(1) Expenditure means a payment made by a business to obtain some benefit i.e., assets, goods or services (Guidance Note - ICAI). While an expenditure on obtaining goods or services by a concern in the course of its business activity is known as revenue expenditure, an expenditure in the course of its investing activity (obtaining an asset) is known as capital expenditure.

(2) Capital expenditure means an expenditure carrying probable future benefits (Guidance Note. ICAI. Capital expenditure gives rise to 'assets'.

Types and Valuation

Following are the different types of assets as defined by the ICAI in its Guidance Note, and the mode of valuation:

(1) 'Assets' are tangible objects or intangible rights, owned by a concern, carrying probable future benefits. Thus, assets include tangible items (capital assets, current assets) and intangible rights (intangible assets).

(2) 'Capital assets' means assets including investments not held for sale, conversion or consumption in the ordinary course of business. Capital assets thus include fixed assets and investments.

(3) 'Capital work-in-progress means expenditure on capital assets which are under construction or completion. It is valued at cost incurred till date.

(4) Current assets are cash and other assets that are (i) expected to be converted into cash or

(ii) consumed in the production of goods or rendering of services in the normal course of business. Thus, current assets, as opposed to capital assets, are short-term assets (debtors, stock etc.. Debtors and stocks are shown at their Net Realisable Value, if and only if, it is lower than cost.

(5) Fixed asset is an asset held for the purpose of providing or producing goods or services, and which is not held for resale in the normal course of business. Fixed assets may be either depreciable assets (machinery etc.) or wasting assets (mines etc.). Fixed assets are valued at cost incurred upto installation, i.e. Invoice price + Tax + Delivery charges + Installation cost + Cost of trial runs + Initial spares.

(6) Depreciable asset' is a fixed asset which has a limited useful life. These are valued at the WDV (Cost less Depreciation).

(7) Wasting assets' are natural resources like mine, oil-well etc. which are exhausted or depleted due to extraction or use. These are valued at WDV (Cost less amount amortised).

(8) Investment' is expenditure on assets held, not for business operations, but to earn interest, income, profit or other benefits e.g. shares, debentures, immovable properties etc. Investments are normally valued at cost.

(9) Intangible asset' is an asset which does not have a physical identity e.g. goodwill, patent, copyright etc. Intangible assets are valued at WDV (cost less amount amortised).

(10) 'Fictitious asset' is an item shown under assets in the balance sheet which has no real value (e.g. debit balance of profit and loss account which indicates accumulated losses)

(In) Hidden assets do not appear on the balance sheet. Examples are : self created good will, assets Written off in books but still in use, options on lease, exclusive trading agreements, secret process or designs and so on. Hidden assets are like 'secret reserves'

Deferred Revenue Expenditure

(1) Meaning: Deferred Revenue Expenditure' is that expenditure which is carried forward on the presumption that it will be of benefit over subsequent period(s) (Guidance Note-ICAL. It is also known as "deferred expenditure'. To defer' means to postpone. Deferred revenue expenditure has a mixed nature and has some features of both revenue and capital expenditure. It may be either a basically revenue expenditure whose benefits can be enjoyed for a number of years; or a capital expenditure not represented by any real asset.

(2) Accounting : The items of expenditure having medium term benefits (say 3 years) are treated as deferred revenue expenditure. The proportionate cost (1/3 cost) related to current year is charged as expenses. The balance (unexpired) cost (2/3) is carried forward as "fictitious asset' in the balance sheet and written off in next years. Such gradual and systematic writing off is known as 'amortisation' (Guidance Note -ICAL).

(3) Applicable Only to Companies : Earlier, research expenses, heavy advertisement expenditure, preliminary expenses, expenses on shifting the business etc. used to be treated as deferred revenue expenditure and written off over 3 to 5 years. However, Accounting Standard 26 (Intangible Assets) requires that such items should be treated as revenue expenses. However, according to the ICAI Guidance Note on Revised Schedule VI to the Companies Act, a Limited Company may treat the following as deferred revenue expenditure - (1) Share issue expenses (2) Discount on issue of Shares (3) Debenture issue expenses (4) Discount on issue of debentures, and (5) Premium payable on redemption of debentures. Many companies amortize share issue expenses, discount on shares etc. over the period of benefit, i.e., normally 3 to 5 years. Expenses on issue, discount or premium relating to debentures can be amortized over the period of debentures. Proportionate amount related to current year is charged as expenses in the profit and loss statement of the company. Balance amount not yet written off is shown as 'Unamortized Expenditure' on the Assets side of the company balance sheet.

LIABILITIES

Definitions

Capital means the amounts invested in the concern by its owners e.g. paid-up capital in a corporate enterprise. It is also used to refer to the interests of the owners in the assets of the enterprise (ICAI). Capital is refunded to the owners only when the concern finally stops its business and is closed .

Liability means the financial obligation of an enterprise other than owner's funds (ICAN).

Long term (Non-current) Liability is a liability which does not fall due for payment in a short period i.e. twelve months (ICAI) Current Liability is a liability including loans, deposits and bank overdraft which falls due for payment in a relatively short period, normally not more than 12 months (ICAL).

Disclosure in Final Accounts

Capital and Liabilities are shown in Balance Sheet. Capital receipt from sale of asset or

Investment is deducted from the concerned fixed asset or investment shown on the Assets side in the balance

CONVENTIONAL OR T'FORM

The conventional form of Balance Sheet (also called the T form or the Account form), shows the Assets on the right hand side and the Liabilities on the left hand side.

In this form the Assets are normally shown in order of Permanence. The least Liquid assets, i.e.-the fixed Assets are shown First, followed by the

most Liquid assets, ie. the current asses: [Even under cash head, items of assets are arranged in the order of Permanance e.g. under Current A sos stace spears first and Cash & Bank balance which is the most liquid, appears last]. The Liabilities are shown in order of priority of e-amont. Permanent Liabilities (e.g. Capital) are shown first followed by long term Loans and short term Loans. Current Liabilities appear last. This form is used by non. corporates e.g. sole trader or firm. Thus, the Balance Sheet in conventional form appears like this:

EXHIBIT 1 : BALANCE SHEET IN 'T' FORM

| Liabilities | ₹ | Assets | ₹ |
|---------------------|----|--------------------|----|
| Capital | XX | Fixed Assets | XX |
| Reserves & Surplus | XX | Investments | XX |
| Long term Loans | XX | Current Assets | XX |
| Short term Loans | XX | Loans and Advances | XX |
| Current Liabilities | XX | | |
| Provisions | XX | | |
| | XX | | XX |

Note: If the items are shown in order of liquidity, the above sequence is reversed. On the assets side, current assets are shown first, followed by fixed assets. On the liabilities side, current liabilities are shown first, followed by short term loans, long term loans and capital.

NEED FOR VERTICAL FORMAT

The horizontal format of Balance Sheet is designed from the point of view of the owner of a concern It enables the owner to know at a glance the amount of Total Funds Owned (Total Assets) and the amount of Total Funds Owed (Total Liabilities). It also enables the owner to know which assets will take time to sell (Fixed Assets) and which assets can be realised quickly (Current Assets). The order of payment of liabilities in the event of Liquidation can also be ascertained from such a Balance Sheet in conventional form.

However, the Conventional Form of Balance Sheet is not suitable for financial analysis, precisely because.

- (1) It is designed for the owner. It does not serve the purpose of the other users such as a potential investor or lender.
- (2) Its presentation and sequence or order of items is relevant only in the event of Liquidation; it is unsuitable for financial analysis of a 'going concern'.

Hence, a user or Financial Analyst, generally converts the horizontal Balance Sheet, into a Vertical Format, which is more suitable for financial analysis especially in Ratio Analysis. Even the vertical financial statements for a limited company prepared under Schedule VI of the Companies Act need to be converted into the following format for financial analysis. The Balance Sheet in Vertical Format for financial analysis will appear as follows :-

VERTICAL FORMAT

Notes

(1) Thus, a Vertical Analytical Balance Sheet differs from a Horizontal Balance Sheet in following respects

(a) Current Liabilities are deducted from the Current Assets;

(b) Fictitious Assets are deducted from the Owners' Funds. This should be kept in mind while converting a Horizontal Balance Sheet into a Vertical Balance Sheet.

(2) At times, Application of Funds (FA and WC) is shown first, followed by Sources of Funds (OF and LF).

EXPLANATION (MAIN HEADINGS)

The vertical form has two parts - I. Source of Funds and II. Application of Funds.

I. SOURCES OF FUNDS

A concern has two main sources of funds - 1. Own Funds and 2. Loan Funds.

1. Proprietors' or Own Funds OF

Proprietors' or Own Funds (or internal sources) mean (a) capital of the owners (proprietor, partners, or shareholders) and (b) Retained Earnings (or Reserves & Surplus). To arrive at the Net Worth or Owners' Funds, Capital and Reserves are added and the accumulated losses and fictitious assets are deducted. The accumulated losses (Profit and Loss A/c - Dr.

balance) and fictitious assets (Misc. Expenditure Not Written off) reduce the amount of funds available or attributable to the owners and hence have to be deducted to ascertain the owners' net worth.

2. Borrowed or Loan Funds [LF]

Borrowed or Loan Funds (Long Term Borrowings) constitute another major source of funds. Loan funds may be (a) Secured Loans like Debentures, bonds, Loans from banks, loans from financial institutions, or (b) Unsecured Loans e.g. public deposits. The total of Secured Loans and Unsecured Loans give the total amount of Loan Funds or 'Owed' funds.

Total Funds Available: The total of Own Funds and Owed Funds is the total amount of Funds Available to the concern as on date of the Balance Sheet. How these funds were actually employed or used is shown in the second part of vertical Balance Sheet, viz. Application of Funds.

II. APPLICATION OF FUNDS

The Total Funds Available are used to finance 1. Fixed Assets and 2. Net Current Assets (called Working capital).

1. Fixed Assets [FA]

The Fixed Assets (also known as Non-Current Assets) may be classified into Tangible, Intangible and Investments.

A. Tangible Assets have definite physical existence. ('Tangible' means that which can be 'touched'). Thus Land, Building, Machinery, Vehicle are tangible fixed assets. These are shown at net cost, i.e. cost less depreciation.

B. Intangible Assets cannot be seen (or 'touched'), but do earn income for the concern-such as Goodwill, Trade-mark etc.

Net Fixed Assets mean Fixed Assets less accumulated depreciation thereon till date (ICAN).

2. Long Term or Trade Investments

Long term or trade investments are those investments which are intended to be held for a long term (such as investments in immovable properties) or those which are held in the normal course of business (e.g. investment in the capital of a partnership firm). Investments in Government Securities shares, bonds, etc. may be Long Term or Short Term depending upon the circumstances.

3. Working Capital [WC]

Working Capital is represented by the excess of current assets over current liabilities including short-term loans (ICAD). It means the funds available for conducting the day-to-day operations of the enterprise.

A. Current Assets [CA] : Investments in Fixed Assets is a permanent or long-term investment. A concern also has circulating funds, i.e. short-term assets like stock, debtors, etc. called current assets. These assets keep getting converted into cash. Those current assets which can be quickly converted into cash are called Liquid or Quick Assets.

B. Current Liabilities [CL]: Current Liabilities, on the other hand, are short-term liabilities payable within a year. These arise out of purchase of goods on credit, outstanding expenses etc. The excess of current assets over current liabilities is called Net Current Assets or Working Capital.

Total Fund or Capital Employed [CE]

Capital Employed means the finances deployed by an enterprise in its Net Fixed Assets, Investments and Working Capital (ICAI).

The amount of Total Funds used or employed is equal to Net Fixed Assets + Working Capital.

Vertical Balance Sheet structure can be analysed through the following equations:

$$(1) \text{ Own Funds} + \text{Loan Funds} = \text{Fixed Assets} + \text{Investments} + \text{Working Capital} \text{ or } \text{OF} + \text{LF} = \text{FA} + \text{Inv.} + \text{WC}$$

$$(2) \text{ TA (Total Assets)} = \text{FA} + \text{Inv.} + \text{CA} = \text{TL (Total Liabilities)} = \text{OF} + \text{LF} + \text{CL}$$

$$(3) \text{ CE (Capital Employed)} = \text{FA} + \text{WC} = \text{FA} + (\text{CA} - \text{CL}) = \text{OF} + \text{LE}$$

$$(4) \text{ OF (Owners' Funds)} = \text{TA} - \text{CL} - \text{LF}$$

The items to be included under each of the above main headings are described in detail below.

EXPLANATION (DETAILED ITEMS)

I. SOURCES OF FUNDS

1. Proprietors' Funds

A. Capital

Capital refers to the amount invested in an enterprise by its owner. It also refers to the interest of the owners in the assets of an enterprise (Guidance Note on Terms used in Financial Statements -ICAI henceforth mentioned as "GN by ICAI".)

In case of a Proprietor, Capital would be equal to
Opening Balance

Add Profit during year
Additional Capital brought in during year

Less Loss during year
Drawing during year
Closing Balance.

In case of a firm, capital would be the total of the closing balances of the Capital Accounts, determined as above, for all partners.

In case of a Limited Company; Capital would include (i) Equity Share Capital and (ii) Preference Share Capital. Under each type of share capital, the amount paid-up is shown. The paid-up amount is equal to Called up Amount Less Unpaid Calls Plus Forfeited Shares. Money received against share warrants (to be converted into shares) is also part of shareholders' funds.

B. Reserves & Surplus:

Reserves means the profit retained or ploughed back in business and not distributed as dividends. Reserves are defined as the portion of the earnings receipts or other surplus of an enterprise (whether capital or revenue appropriated by the management for a general or specific purpose (GN by ICAI).

(i) Capital Reserves: Capital Reserves are those reserves of a company which are not available for distribution as dividend (GN by ICAN. These are not created out of normal business profits of the company. They are created out of premium received on issue of shares, profit on sale of fixed assets. Capital redemption reserve (reserve created on redemption of preference shares), profit on forfeiture of shares etc. These are not available for payment of dividends.

(ii) General Reserve: General Reserve is a Revenue Reserve not earmarked for any specific purpose (GN by ICAD. This represents undistributed normal profits of the company. Profits may be distributed by way of dividends or retained by way of reserves.

(iii) Funds: Fund is a Reserve or a Provision represented by specifically earmarked asset (GN by ICAD. A Fund as Sinking Fund, Provident Fund, or Staff Benefit Fund denotes that the amount shown under that Fund has been invested in specific (earmarked) securities. In a vertical balance sheet, the amount of such earmarked investments is adjusted against the amount of Fund and only the net amount (Fund less Investment), is shown under 'reserves

C. Losses and Fictitious Assets The accumulated losses (Profit & Loss Account - Dr. balance) and Fictitious Assets, i.e. Misc Expenditure Not Written off are shown on the Assets side of the conventional balance sheet. However, in the Vertical balance sheet, these are deducted from the total of (a) Capital and (b) Reserves & Surplus to determine the net Equity or net Worth. These include- (i) Profit & Loss A/c - Dr. balance (ii) Miscellaneous expenses not written off (also known as Unamortized Expenses) –

- (1) Share issue expenses
- (2) Discount on issue of Shares
- (3) Debenture issue expenses

- (4) Discount on issue of debentures, and
- (5) Premium payable on redemption of debentures.

Net Worth, also known as Shareholders Funds, means the excess of the book value of the assets (other than fictitious assets) of an enterprise over its liabilities (ICAI). Net worth is the same as Owners Funds or Proprietors Funds.

Owners' Funds = Capital + Reserves & Surplus - Losses & Fictitious Assets

2. Loan Funds

Loan or Liability means the financial obligation of an enterprise other than owner's funds (GN by ICAI). These are the long-term Borrowings.

This is the Second Source of finance for a concern. The distinction between the Proprietors Funds (own Funds) and the Loan Funds (owed Funds) is as follows:

EXHIBIT 2: OWN FUNDS VS. OWED FUNDS

| No. | Own Funds | Owed Funds |
|-----|--|--|
| 1 | Internal source of finance | External source of finance. |
| 2 | Represents claim of outsiders on the assets of the concern. | Represents claims of owners on the assets of the concern. |
| 3 | Own Funds i.e. Capital earns dividends. | Owed Funds, i.e. Loans earn interest |
| 4 | Dividends are paid out of profits ('appropriations out of profits') and the rate may vary. | Interest is charged against profits (i.e. paid irrespective of profit or loss), at a fixed rate |
| 5 | In liquidation, own funds are returned last. Hence Own Funds are called 'Permanent Funds.' | In Liquidation, Owed Funds are repaid before capital. Even otherwise, loans have to be repaid according to the terms of the agreement. Hence, Owed Funds are called 'Semipermanent Funds.' |
| 6 | Own Funds are not 'secured' by charge on assets. | Loans may be secured by charge on Fixed or Current Assets. |

A. Secured Loans:

Loans may be for Secured or Unsecured.

Secured loans (also called Fixed Liabilities) consist of:

(i) **Debentures** or Bonds repayable after a fixed period.

(ii) Bank Loans

(iii) Loans from Financial Institutions

B. Unsecured Loans:

Public Deposits are deposits kept by public for a fixed period which are unsecured. All Loans, other than Secured Loans, would be shown as Unsecured Loans.

(1) Total Owed Funds = Secured Loans + Unsecured Loans

(2) Total Funds Available = Own Funds + Owed Funds

I. APPLICATION OF FUNDS

1. Fixed Assets:

Following items are included under Fixed Assets (also known as Non-Current Assets):

A. Tangible Assets (at cost less depreciation)

(i) Land and Buildings

(ii) Leasehold Property

(iii) Railway Sidings

(iv) Plant & Machinery

(v) Furniture & Fittings

(vi) Development of Property

(vii) Live Stock

(viii) Vehicles etc.

B. Intangible Assets

(i) Goodwill

(ii) Patents, Copyrights, Trade-marks and designs

Fixed Assets = Tangible Assets (net cost) + Intangible Assets

2. Long Term Investments

Investments may be long-term or short-term. If for example, bonds of an Electricity Undertaking have to be compulsorily purchased so as to obtain power connection, these will be held as long as the concern exists. Hence these will be Long Term Investments. If any investment represents a Fund shown under Reserves (e.g., Provident Fund Investment), it is adjusted against the balance of the Fund. If the net balance is Debit (i.e.,

Investment exceeds Fund), only the net Dr. is shown as Investment; if the Fund exceeds Investment the net Cr. balance is shown under Reserves. Short Term Investments are shown as a part of Current Assets.

3. Working Capital

Working Capital means the net current assets or the excess of Current Assets over Current Liabilities.

A. Current Assets:

Current Assets (or Floating Assets) mean those assets which move through the operating cycle of the business viz. through the stages of purchase of raw materials (Stock) production of finished goods (Stock) sales of goods (Cash/Debtors) Realisation of Debtors (cash) and so on. Current assets mean the assets like stock, debtors and cash which move in a cycle. Thus stock is converted by sales into debtors, debtors get converted by realisation of dues into cash, cash is used for buying goods and again the cycle is repeated. Current assets are short term assets unlike fixed assets which are long term assets.

The following item are included under Current Assets:

(a) Stock

1. Stores and spare parts
2. Stock-in-trade

(Raw Materials - Finished Goods + Packing Materials)

3. Work-in-progress.

(b) Debtors

Gross amount

Less : Provision for bad & doubtful debts

(c) Cash and Bank

1. Cash on hand
2. Bank balances
3. Cash Equivalents e.g. liquid deposits

(d) Loans & Advances Given

1. to subsidiaries
2. to firms etc.

(e) Marketable Investments i.e. temporary investments made out of surplus funds.

(f) Other Current Assets

1. Interest accrued on investments
2. Loose tools
3. Bills of exchange
4. Pre-payments (pre- paid expenses, advance for goods, advance tax paid)
5. Balances with customs. Port trust etc. (Payable on demand).

Thus,

Current Assets = Stock + Debtors + Cash and Bank + Loans & Advances + Marketable Investments + Other Current Assets

Quick Assets :

Quick assets are the following items of Current Assets, which are 'quickly realisable'-

- (a) Cash & Bank
- (b) Debtors (net) / Trade Receivables
- (c) Bills Receivable
- (d) Loans
- (e) Marketable (Current / Short-term) Investments
- (f) Other e.g. Accrued Income

Or

Quick Assets = Current Assets Less Inventories & Pre-payments

(Note: Pre-payments : Pre-paid Expenses, Advances for Goods & Advance tax)

B. Current Liabilities:

Current Liabilities include the following items

- (a) Sundry creditors for supply of goods or services (Trade Payables).
- (b) Bills Payable
- (c) Advances Received
- (d) Outstanding expenses
- (e) Accrued Interest
- (f) Provision for tax
- (g) Unclaimed Dividends
- (h) Short Term Loans

Notes :

(1) Current maturities of long-term debts e.g. Debentures / Loans (whether Secured or Unsecured) repayable within 1 year should be shown as Current Liabilities

(2) Dividends proposed but not yet approved by shareholders are shown by way of a Note toAccounts. No provision is made for proposed dividends w.e.f. FY. 2016-17 (vide MCA/ICAI Amended Accounting Standard 4)

Quick Liabilities:

Quick Liabilities are those current liabilities which are payable in a short period of time. Bank Overdraft is not, in practice, immediately payable. So,

Quick Liabilities = Current Liabilities - Bank Overdraft

Working Capital = Current Assets - Current Liabilities

Total Funds Applied = Net Fixed Assets + Investments + Working Capital

This is always equal to Total Funds Available.

| XV. Closing Retained Earnings (XV = XIII - XIV) | | | XX |

*Bad Debts can be alternatively treated as Financial Expenses.

From the above rearrangement of operating statements, the following accounting equations may be given:

1. Net Sales = Cost of sales + operating expenses + Nonoperating expenses
2. Gross Profit = Net sales – Cost of goods sold
3. Net operating profit = Gross profit – operating expenses
4. Gross Sales: Gross sales also called ‘ Turnover’ is the amount of total sales of goods and services. This includes both cash and credit sales.

$$\text{Gross sales} = \text{Credit sales} + \text{cash sales}$$

5. Cost of Goods Sold: This is the cost of purchases or cost of manufacturing the goods, which are sold during the year.

$$\text{Cost of Goods Sold} = \text{Opening stock} + \text{Purchases} + \text{Direct}$$

$$\text{Expenses} + \text{Depreciation} - \text{less closing stock}$$

6. Gross Profit:

This is the major source of operating income of an organization. This is the amount of profit earned on purchases, manufactures and sales of goods and services.

$$\text{Gross Profit} = \text{Net Sales} - \text{Cost of goods sold}$$

7. Operating Expenses: These are the expenses incurred in the course of normal conduct of business, which are related to the business

activities. Broadly, operating expenses are classified into the following categories.

a) Administrative Expenses: These are the expenses pertaining to general office administrative of an organization.

b) Selling and Distribution Expenses: These are the expenses incurred for the purpose of increasing and maintaining the sales, distributing and delivering the goods.

c) Finance Charges: This includes: Cash discount, Bad debts (Abnormal), Bank charges, bank Commission.

Operating Expenses = Administrative Expenses + Selling & Distribution Expenses + Finance Expenses

8. Operating Profit: Excess of operating income over operating expenses is called net operating profit. This is the amount of profit earned during the normal course of business.

Operating profit may be:

a) Operating Profit before Interest: Gross Profit - Operating expenses (Before Interest)

b) Operating Profit After Interest : Operating profit (before Interest) – Interest

9. Non-operating Income: Income not related to the ordinary course of business i.e., Interest on investment is not an operating income to a company, which is engaged in buying and selling of goods and services of goods. But for an investment company, interest will be considered as an operating income.

10. Non-Operating Expenses: These are the expenses, which do not relate to day-to-day conduct of business operations. These expenses arise due to certain unusual events and unexpected occurrences.

11. Net Profit: This is the excess of total operating and nonoperating income over the total operating and non-operating expenses. It is therefore, ultimate profit earned by the organization.

a) Net Profit before Tax = Net operating profit + Net non-operating Income

b) Net profit After Tax = Net profit before tax - Income tax

12. Retained Earnings: Net profit after tax - dividend

Illustration 01:

Following is the Profit & Loss Account of Leena Ltd. for the year ended 31s March 2020. You are required to prepare Vertical Income Statement for the purpose of analysis.

| Particulars | Amount | Particulars | Amount | Amount |
|-------------------------------|-----------|--------------------------------|-----------|-----------|
| To Opening Stock | 14,00,000 | By Sales: | | |
| To Purchases | 18,00,000 | Cash | 10,40,000 | |
| To Wages | 3,00,000 | Credit | 30,00,000 | |

Statements

Problem 07:

The balance sheet of Diana Ltd. is given for the year 2020. Convert them into vertical balance sheet.

Balance Sheet as on 31st March, 2004

| Liabilities | Amount | Assets | Amount |
|-----------------------------|---------------|------------------------|---------------|
| Equity Shares | 4,39,300 | Building | 4,60,000 |
| Capital Reserve | 1,61,000 | Plant and Machinery | 1,26,500 |
| Revenue Reserve and Surplus | 69,000 | Furniture | 46,000 |
| Trade Creditors | 92,000 | Freehold Property | 27,600 |
| Bills Payable | 1,38,000 | Goodwill | 69,000 |
| Bank Overdraft | 1,84,000 | Cash Balance | 46,000 |
| Provisions | 46,000 | Sundry Debtors | 80,500 |
| | | Inventories | 1,31,100 |
| | | Investment (Temporary) | 96,600 |
| | | Bills Receivable | 46,000 |
| | 11,29,300 | | 11,29,300 |

Problem 08:

Following is the Trial balance of M/s. Vanraj Ltd. as on 31" March, 2020.

Trial Balance

| Particulars | Amount (₹) | Amount (₹) |
|----------------------------------|------------|------------|
| Sales | - | 2,40,000 |
| Fixed Assets | 1,20,000 | - |
| Bills Receivable & Bills Payable | 24,000 | 18,000 |
| Cash and Bank Balance | 6,000 | - |
| Opening Stock | 12,000 | - |
| Bank overdraft | - | 12,000 |
| Purchases | 1,50,000 | - |
| Administrative Expenses | 3,600 | - |
| Legal Expenses | 2,400 | - |
| Salaries | 6,000 | - |
| Advertisement | 4,800 | - |
| Warehouse Rent | 2,400 | - |
| Depreciation on machinery | 6,000 | - |
| Interest on Bank overdraft | 1,200 | - |
| Equity share capital | - | 72,000 |
| General Reserve | - | 12,000 |
| Lap Top Repairs | 2,400 | - |
| Direct Expenses | 2,400 | - |
| Investment | 4,800 | - |
| Debtors and creditors | 12,000 | 6,000 |
| Total | 3,60,000 | 3,60,000 |

Additional Information:

Closing stock on 31st March 2020 was valued at Rs.6,000

Cash sales were 1/3 of credit sales.

You are required to prepare vertical income statement for the year ended 31st March 2020 and

Vertical balance sheet as on that date for financial analysis.

Problem 09:

From the following Trial Balance of Urmila Ltd. as on 31st March, 2020.

| Particulars | Amount Rs. | Amount Rs. |
|---------------------------|-------------|-------------|
| Equity Share Capital | - | 25,74,000 |
| Plant and Machinery | 28,08,000 | - |
| Sales | - | 86,58,000 |
| Purchases | 39,78,000 | - |
| Sundry Debtors | 21,06,000 | - |
| Sundry Creditors | - | 19,89,000 |
| Wages | 8,19,000 | - |
| Opening Stock | 2,80,800 | - |
| Salaries | 4,21,200 | - |
| Advertisement | 1,75,500 | - |
| Telephone Charges | 81,900 | - |
| Furniture | 4,68,000 | - |
| Investment (Long Term) | 11,70,000 | - |
| Interest Received | - | 93,600 |
| Loss on Sale of Furniture | 46,800 | - |
| Commission | 1,40,400 | - |
| Profit and Loss A/c | - | 2,80,800 |

| General Reserve | - | 2,34,000 |
| Cash At Bank | 7,48,800 | - |
| Bills Receivable | 4,68,000 | - |
| | 1,38,29,400 | 1,38,29,400 |

Prepare vertical Revenue statement for the year ended 31st March, 2020 and vertical Balance sheet as on that date after making the necessary adjustments.

COMPARATIVE STATEMENTS, COMMON SIZE STATEMENTS & TREND ANALYSIS COMPARATIVE BALANCE SHEET

Unit Structure

3.0 Learning Objectives

3.1 Introduction to Comparative Statement

3.0 LEARNING OBJECTIVES

After studying this unit, the learners will be able to:

- Analyses the financial statements.
- Understand the limitations of financial statements.
- Solve the practical problems of analyses.

3.1 INTRODUCTION TO COMPARATIVE STATEMENT

A comparative balance sheet is a statement that shows the financial position of an organization over different periods for which comparison is made or required. The financial position is compared with 2 or more periods to portray the trend, direction of change, analyse and take suitable actions.

Advantages of Comparative Balance Sheet

1. Easy Comparison – It is easy to compare the figures for the current year with the previous years as it gives both the years' figures in one place. It also help in analysing the data of two or more companies or subsidiaries of one company.

2. Indicates Trend – It shows the company's trend by putting several years' financial figures at one place like an Increase or decrease in current assets, current liabilities, profit, loans, reserves & surplus, or any other items that help investors make decision.

3. Ratio Analysis – Financial ratio is obtained from the balance sheet items. The comparative balance sheet's financial ratio of two years of two companies can be derived to analyse the company's financial status. For example, the current ratio is obtained with the help of current assets and current liabilities. If the current ratio of the current year is more than the last year, it shows the company's liabilities have been reduced from last year against the existing assets.

4. Comparison with Industry Performance – Helps to compare one company’s performance with another company or the industry’s average performance.

5. Helps in Forecasting – It also helps in forecasting because it provides the past trend of the company based on which the management can forecast the company’s financial position.

Limitation/Disadvantages

1.Uniformity in Principles and Policy– If two companies have adopted different policies and accounting principles while preparing the balance sheet ,Comparative balance sheet will not give the correct comparison.

2. Inflationary Effect is not Considered – The inflation effect is not considered, while preparing the comparative balance sheet. Therefore, only a comparison with other balance sheets will not give the correct picture of the company’s trend.

3. Market Situation and Political Conditions not Considered – While preparing the comparative balance sheet, marketing conditions, political environment, or any factor affecting the company’s business are not considered. Therefore, it does not give the correct picture every time. For example, suppose the overall economy is going down in the current year, or the political condition is unstable compared to last year. In that case, it will decrease the demand, and general company sales will experience de-growth, not because of its performance but due to external factors.

4. Misleading Information – Sometimes, it gives misleading information, thus, misguiding the person who reads the comparative balance sheet.

Illustration 01: Following is the Balance Sheet of M/s Rohan Ltd.

| Liabilities | 2019 ₹ | 2020 ₹ | Assets | 2019 ₹ | 2020 ₹ |
|---------------------|----------|-----------|----------------|----------|-----------|
| Share Capital | 5,55,000 | 5,85,000 | Fixed Assets | 5,70,000 | 5,25,000 |
| Reserve and Surplus | 1,50,000 | 2,10,000 | Investment | 1,35,000 | 1,80,000 |
| Current Liabilities | 1,50,000 | 1,98,600 | Current Assets | 2,70,000 | 4,35,000 |
| 13 % Debentures | 1,20,000 | 1,46,400 | | | |
| | 9,75,000 | 11,40,000 | | 9,75,000 | 11,40,000 |

Prepare comparative balance sheet from the above in vertical form.

Solution 01**In the books of M/s Rohan Ltd.**

Comparative Balance Sheet

| Particulars | 2019 | 2020 | Absolute Increase/Decrease | % Increase/Decrease |

Complete the following Comparative Statement of Barkha Products by ascertaining the missing figures.

| Particular | Year Ended 31-03-16 ₹ | Year Ended 31-03-17 ₹ | Increase/ (Decrease) ₹ | % Increase/ (Decrease) |
|----------------------|--------------------------|--------------------------|---------------------------|---------------------------|
| Gross Profit | ? | ? | ? | ? |
| Less: Expenses | | | | |
| - Administrative | 1,12,000 | ? | 22,400 | 20.00 |
| - Selling | 56,000 | 67,200 | 11,200 | ? |
| - Financial | ? | 28,000 | 5,600 | 25.00 |
| Operating Net Profit | ? | 2,24,000 | 1,12,000 | 100.00 |

Solution 06:

Comparative Statement of Barkha Product

| Particular | Year Ended 31-03-16 ₹ | Year Ended 31-03-17 ₹ | Increase/ (Decrease) ₹ | % Increase/ (Decrease) |
|----------------------|-----------------------------|-----------------------------|-----------------------------|---------------------------|
| Gross Profit | 3,02,400⁶ | 4,53,600⁵ | 1,51,200⁷ | 50.00 |
| Less: Expenses | | | | |
| - Administrative | 1,12,000 | 1,34,400¹ | 22,400 | 20.00 |
| - Selling | 56,000 | 67,200 | 11,200 | 20.00² |
| - Financial | 22,400³ | 28,000 | 5,600 | 25.00 |
| Operating Net Profit | 1,12,000⁴ | 2,24,000 | 1,12,000 | 100.00 |

Working Note:

1. $1,12,000 + 22,400 = 1,34,400$
2. $11,200 \div 56,000 \times 100 = 20.00$
3. $5,600 \div 25\%$ or $28,000 - 5,600 = 22,400$
4. $1,12,000 \div 100\%$ or $2,24,000 - 1,12,000 = 1,12,000$
5. $2,24,000 + (1,34,400 + 67,200 + 28,000) = 4,53,600$
6. $1,12,000^4 + (1,12,000 + 56,000 + 22,400) = 3,02,400$
7. $4,53,600 - 3,02,400 = 1,51,200$
8. $1,51,200 \div 3,02,400 = 50.00\%$

Common Size Statement

A common size income statement is an income statement in which each line item is expressed as a percentage of the value of revenue or sales. It is used for vertical analysis, in which each line item in a financial statement is represented as a percentage of a base figure within the statement.

Use of Common Size Income Statement:

It helps the business owner in understanding the following points

1. Whether profits are showing an increase or decrease in relation to the sales obtained.
2. Percentage change in cost of goods that were sold during the accounting period.
3. Variation that might have occurred in expense.
4. If the increase in retained earnings is in proportion to the increase in profit of the business.
5. Helps to compare income statements of two or more periods.
6. Recognises the changes happening in the financial statements of the organisation, which will help investors in making decisions about investing in the business.

Limitations of Common Size Statement

1. It is not helpful in the decision-making process as it does not have any approved benchmark.
2. For a business that is impacted by fluctuations due to seasonality, it can be misleading.

| 2 Total Funds Employed (1 + 2) | 8,50,000 | 100.00 |

Trend Analysis

Meaning: Trend Analysis treats year 1 as the base year and compares the figures of all the (year 2/year 3) with those of the base year to find out the trend in figures. Thus trend analysis of purchase will reveal whether as compared to the base year, i.e. Year 1, the purchase show a trend increase or decrease in subsequent years, i.e. Year 2, Year 2, Year 3 and so on.

Use: It is useful because: (1) It shows the direction (up or down) of the changes. (2) Trends are easy to calculate and interpret. (3) It is a quick method of analysis.

Advantages:

- (1) Trend Analysis helps in analysing the growth in the financial activities of the firm with a brief look.
- (2) Graphical presentation of trend line helps the management to take a quick decision matter.
- (3) Trend values also help the management in the controlling process as well.
- (4) Trend analysis proves to be very useful for taking rational investment decisions.

Disadvantages:

(1) Choice of Base Year & No. of Years: If different year is chosen as the base year, the trend may be different. Further, the total number of years covered should not be too large (say 30 years) or too small (say 3 years). Data for a large number of years show large variations due to inflation and figures for a few years are not representative.

(2) Different Accounting Policies: The trend will give a distorted figure, or a wrong picture if the accounting policies in respect of depreciation, valuation of closing stock etc. have changed.

| 9 Less: Income Tax (40%) | 12,730 | 18,090 | 25,460 | 100.00 | 142.11 | 200.00 |
| 10 Net Profit after Tax [8 - 9] | 19,095 | 27,135 | 38,190 | 100.00 | 142.11 | 200.00 |

Illustration 19:

Calculate Trend Percentage from the following information extracted from financial statement of M/s. Lalita Ltd., after arranging in vertical from.

Balance Sheet as on 31st March

| Particulars | 2018 (Amount in Rs) | 2019 (Amount in Rs) | 2020 (Amount in Rs) |
|---------------------|---------------------|---------------------|---------------------|
| Assets | | | |
| Fixed Assets | 32,400 | 34,020 | 40,500 |
| Investment | 2,700 | 1,350 | 2,700 |
| Current Assets | 36,450 | 45,306 | 52,785 |
| | 71,550 | 80,676 | 95,985 |
| Liabilities | | | |
| Share Capital | 39,150 | 45,900 | 55,350 |
| Bank Loan | 8,100 | 8,100 | 10,935 |
| Current Liabilities | 24,300 | 26,676 | 29,700 |
| | 71,550 | 80,676 | 95,985 |

Income Statements for the year ended 31st March

| Particulars | 2018 (Amount in Rs) | 2019 (Amount in Rs) | 2020 (Amount in Rs) |
|--------------------------|---------------------|---------------------|---------------------|
| Net Sales | 30,000 | 33,000 | 36,000 |
| Less Cost of Sales | 22,500 | 27,000 | 27,000 |
| Gross Margin | 7,500 | 6,000 | 9,000 |
| Less: Operating Expenses | 3,000 | 1,500 | 2,700 |
| Operating Profit | 4,500 | 4,500 | 6,300 |

| 1 Own Funds | 1,35,000 | 1,68,750 | 2,02,500 | 100.00 | 125.00 | 150.00 |
| 2 Loan Funds | | | | | | |
| Secured Loan | 22,500 | 22,500 | 22,500 | 100.00 | 100.00 | 100.00 |
| 3 Capital Employed (1 + 2) | 1,57,500 | 1,91,250 | 2,25,000 | 100.00 | 121.43 | 142.86 |
| II APPLICATION OF FUNDS | | | | | | |
| 1 Fixed Assets | 90,000 | 99,000 | 1,12,500 | 100.00 | 110.00 | 125.00 |
| 2 Long Term Investments | 22,500 | 36,000 | 45,000 | 100.00 | 160.00 | 200.00 |
| 3 Working Capital | | | | | | |
| a Current Assets | | | | | | |
| Stock and Debtors | 56,250 | 67,500 | 78,750 | 100.00 | 120.00 | 140.00 |
| Bank | 11,250 | 22,500 | 33,750 | 100.00 | 200.00 | 300.00 |
| Current Assets | 67,500 | 90,000 | 1,12,500 | 100.00 | 133.33 | 166.67 |
| b. Less: Current Liabilities | 22,500 | 33,750 | 45,000 | 100.00 | 150.00 | 200.00 |
| C. Working Capital (a - b) | 45,000 | 56,250 | 67,500 | 100.00 | 125.00 | 150.00 |
| 4 Capital Employed (1 + 2 + 3) | 1,57,500 | 1,91,250 | 2,25,000 | 100.00 | 121.43 | 142.86 |

Exercise:

TRUE AND FALSE

1. Comparative statement includes comparative income statement and balance sheet. T
2. Common size statement is horizontal analysis. F
3. In Vertical Income Statement, preliminary expenses written off will be shown under Operating Expenses. F
4. Own funds is internal source of finance, whereas Owed funds is an external source of finance. T
5. Comparative financial statements in which each amount is expressed as a percent of a base amount are called Trend statements. F
6. The managerial accounting system produces information for external users. F
7. Vertical analysis is a tool to evaluate each financial item or group of items in terms of a specific base amount.
8. Using the common size statement, a company's net income as a percentage of sales is 20% therefore, the cost of goods sold as a percentage of sale must be 80%. F
9. Liquidity is ability of firm to pay, as and when the debts fall due for payment. T
10. Current assets and liabilities are listed in alphabetical order, in vertical balance sheet for financial analysis. F

SHORT NOTES.

Write short note on-

1. Trend analysis.
2. Inter-firm comparisons
3. Inter-period comparisons
4. Advantages of comparative statements
5. Limitations of comparative statements
6. Common size statements
7. Advantages of trend analysis
8. Use of common size statements
9. Disadvantages of trend analysis
10. Limitations of common size statements.

1. Rearrange the Balance Sheets in Vertical form and calculate the trend percentage taking 2017 figures as 100 and briefly comment on the same.

| Liabilities | 2017 ₹ | 2018 ₹ | 2019 ₹ | 2020 ₹ | Assets | 2017 ₹ | 2018 ₹ | 2019 ₹ | 2020 ₹ |
|-------------------------|--------|--------|--------|--------|---------------------|--------|--------|--------|--------|
| Equity Share Capital | 145.00 | 159.50 | 174.00 | 174.00 | Land & Building | 58.00 | 58.00 | 50.75 | 65.25 |
| 12% Pref. Share Capital | 29.00 | 14.50 | 7.25 | 7.25 | Plant & Machinery | 203.00 | 181.25 | 159.50 | 166.75 |
| Reserve & Surplus | 108.75 | 130.50 | 174.00 | 188.50 | Furniture & Fixture | 36.25 | 43.50 | 36.25 | 29.00 |
| 13% Debentures | 87.00 | 72.50 | 36.25 | 22.00 | Current Assets | 145.00 | 166.75 | 232.00 | 224.75 |
| Current Liabilities | 72.50 | 72.50 | 87.00 | 94.00 | | | | | |
| | 442.25 | 449.50 | 478.50 | 485.75 | | 442.25 | 449.50 | 478.50 | 485.75 |

Calculate Trend % to full integer (without decimal points - Figures to be rounded)

2. Rearrange the following summary Balance Sheet in vertical form suitable for analysis and calculate the trend percentage taking 2017 figures as 100 and briefly comment on the same.

Balance Sheet as on 31st December

| Liabilities | 2017 ₹ | 2018 ₹ | 2019 ₹ | 2020 ₹ | Assets | 2017 ₹ | 2018 ₹ | 2019 ₹ | 2020 ₹ |
|-------------------|--------|--------|--------|--------|----------------------|--------|--------|--------|--------|
| Share Capital | 300 | 300 | 400 | 400 | Building | 250 | 300 | 275 | 400 |
| Reserve | 250 | 225 | 100 | 100 | Goodwill | 250 | 225 | 200 | 200 |
| Surplus | 65 | 160 | 155 | 200 | Machinery | 100 | 200 | 215 | 250 |
| Debentures | 50 | 100 | 100 | 150 | Stock | 25 | 75 | 125 | 25 |
| Secured Loans | 60 | 40 | 50 | 100 | Debtors | 100 | 70 | 75 | 50 |
| Creditors | 30 | 40 | 50 | 15 | Cash | 25 | 5 | 10 | 75 |
| Bank O/D | 5 | 10 | 40 | 20 | Preliminary Expenses | 15 | 10 | 5 | - |
| Other Liabilities | 5 | 10 | 10 | 15 | | | | | |
| | 765 | 885 | 905 | 1,000 | | 765 | 885 | 905 | 1,000 |

3. You are furnished with the following revenue statements of Piya Ltd. for the year ended March 31st 2020

Comparative Statements,
Common Size Statements &
Trend Analysis Comparative
Balance Sheet

| Particulars | 2017 ₹ | 2018 ₹ | 2019 ₹ | 2020 ₹ |
|---|-------------|-------------|-------------|-------------|
| Sales | 37,50,000 | 45,00,000 | 54,00,000 | 64,80,000 |
| Less : Cost of Sales | (24,00,000) | (28,50,000) | (34,50,000) | (42,00,000) |
| Gross Margin | 13,50,000 | 16,50,000 | 19,50,000 | 22,80,000 |
| Management Expenses | 2,25,000 | 2,62,500 | 3,00,000 | 3,37,500 |
| Sales Expenses | 3,75,000 | 4,50,000 | 5,40,000 | 6,48,000 |
| Interest on Borrowings | 2,25,000 | 3,00,000 | 3,75,000 | 4,50,000 |
| Total Expenses | (8,25,000) | (10,12,500) | (12,15,000) | (14,35,500) |
| Net Profit before Depreciation and Taxation | 5,25,000 | 6,37,500 | 7,35,000 | 8,44,500 |
| Depreciation | (3,75,000) | (3,37,500) | (4,50,000) | (4,87,500) |
| Profit before Taxation | 1,50,000 | 3,00,000 | 2,85,000 | 3,57,000 |
| Income Tax | (60,000) | (1,50,000) | (1,38,750) | (1,80,000) |
| Profit after Tax | 90,000 | 1,50,000 | 1,46,250 | 1,77,000 |

(a) You are asked to prepare trend analysis.

(b) Comment on the same.

4. From the following prepare income statement in vertical form showing trend percentages of M/S Lakhani Traders and comment on gross profit trend.

| Particulars | 2017 ₹ | 2018 ₹ | 2019 ₹ | 2020 ₹ |
|-----------------------------------|----------|----------|----------|----------|
| Sales | 5,88,000 | 7,14,000 | 7,56,000 | 8,40,000 |
| Cost of Sales | 2,69,500 | 3,27,250 | 3,45,800 | 3,85,000 |
| Administrative Expenses | 94,500 | 94,500 | 1,05,000 | 1,05,000 |
| Selling and Distribution Expenses | 58,800 | 71,400 | 75,600 | 84,000 |
| Finance Expenses | 28,000 | 28,000 | 28,000 | 28,000 |
| Income tax Provision | 41,160 | 57,855 | 60,270 | 71,400 |

5. Hammu and Pammu are partners of a firm carrying on business

(i) Their position as on 31st December 2018, 2019 and 2020 is as follows

| Liabilities | 2020 ₹ | 2019 ₹ | 2018 ₹ | Assets | 2020 ₹ | 2019 ₹ | 2018 ₹ |
|-------------------|-----------|-----------|-----------|----------------------|-----------|-----------|-----------|
| Partners Capitals | 8,80,000 | 7,48,000 | 6,60,000 | Fixed Assets | 8,80,000 | 7,92,000 | 6,16,000 |
| General Reserve | 2,20,000 | 2,20,000 | 2,20,000 | Current Assets | - | - | - |
| Secured Loans | 1,32,000 | 1,32,000 | 1,10,000 | Stock | 3,52,000 | 3,30,000 | 2,97,000 |
| Unsecured Loans | 3,52,000 | 3,96,000 | 3,08,000 | Debtors | 4,40,000 | 3,52,000 | 3,08,000 |
| Sundry Creditors | 3,52,000 | 1,98,000 | 99,000 | Loans and Advances | 2,20,000 | 1,76,000 | 1,32,000 |
| | | | | Cash & Bank Balances | 44,000 | 44,000 | 44,000 |
| | | | | | | | |
| | 19,36,000 | 16,94,000 | 13,97,000 | | 19,36,000 | 16,94,000 | 13,97,000 |

(ii) Summarised Income Statement for the year ended

| Particulars | 2020 ₹ | 2019 ₹ | 2018 ₹ |
|---------------------|-----------|-----------|-----------|
| Sales | 88,00,000 | 79,20,000 | 66,00,000 |
| Less: Cost of Sales | 61,60,000 | 52,80,000 | 44,00,000 |
| Gross Profit | 26,40,000 | 26,40,000 | 22,00,000 |
| Less: Expenses | 17,60,000 | 17,60,000 | 15,40,000 |
| Net Profit | 8,80,000 | 8,80,000 | 6,60,000 |

Prepare Trend Statement

6. Calculate Trend Percentage from the following information extracted from Financial Statements of Vinayak Limited Company. Give your appropriate comments

Comparative Statements,
Common Size Statements &
Trend Analysis Comparative
Balance Sheet

| Particulars | 2020 ₹ | 2019 ₹ | 2018 ₹ | 2017 ₹ |
|--------------------|--------|--------|--------|--------|
| Sales | 32,802 | 27,290 | 19,768 | 18,224 |
| Cost of Sales | 29,956 | 24,982 | 17,626 | 14,864 |
| Expenses | 178 | 268 | 116 | 90 |
| Interest | 1,006 | 758 | 412 | 202 |
| Profit Before Tax | 1,662 | 1,282 | 1,614 | 3,068 |
| Tax | 788 | 396 | 910 | 1,640 |
| Profit After Tax | 874 | 886 | 704 | 1,428 |
| Fixed Assets (Net) | 10,978 | 10,222 | 9,554 | 8,972 |

| Loans | ? | ? | ? | ? |
| Net Worth | 13,382 | 12,034 | 11,714 | 11,908 |

7. From the following prepare income statement in vertical form showing trend percentages of M/S Ferry Traders and comment on gross profit trend.

| Particulars | 2017 ₹ | 2018 ₹ | 2019 ₹ | 2020 ₹ |
|---------------------------------|----------|--------|--------|--------|
| Profit and Loss Accounts | | | | |
| Sales | 30,000 | 33,000 | 36,000 | 39,000 |
| Cost of Sales | 22,500 | 24,525 | 26,550 | 28,575 |
| Expenses | 2,400 | 2,805 | 3,420 | 3,861 |
| Interest | 675 | 900 | 1,125 | 1,350 |
| Profit Before Tax | ? | ? | ? | 5,214 |
| Tax | 1,770 | 1,908 | 1,962 | 2,085 |
| Profit After Tax | 2,655 | ? | ? | ? |
| | | | | |
| Balance Sheets | | | | |
| Fixed Assets | ? | ? | ? | ? |
| Current Assets | 45,000 | ? | 53,400 | ? |
| Current Liabilities | ? | 32,700 | ? | 38,400 |
| Net Working Capital | 15,000 | 16,500 | 17,850 | 19,350 |
| Net Worth | 3,00,000 | 32,100 | 33,300 | 34,800 |
| Loans (Liabilities) | 15,000 | 18,000 | 21,000 | 24,000 |

8. Prepare a Comparative Revenue Statement in Vertical Form from the following details

| Particular | 2019 ₹ | 2020 ₹ | Particular | 2019 ₹ | 2020 ₹ |
|--------------------------|-----------|-------------|--------------------------------|-----------|-------------|
| To Opening Stock | 3,60,000 | 4,80,000 | By Sales | 72,00,000 | 96,00,000 |
| To Purchases | 36,00,000 | 51,36,000 | By Closing Stock | 4,80,000 | 5,76,000 |
| To Interest on Debenture | 2,40,000 | 2,40,000 | By Dividend | 39,200 | 62,400 |
| To Depreciation : | | | By Profit on Sale of Machinery | 18,400 | |
| Furniture | 24,000 | 24,000 | | | |
| Machinery | 57,600 | 48,000 | | | |
| To Administrative Exp. | 4,70,400 | 7,05,600 | | | |
| To Selling Expenses | 7,29,600 | 12,04,800 | | | |
| To Carriage Outward | 1,20,000 | 5,04,000 | | | |
| To Loss by Fire | - | 24,000 | | | |
| To Wages | 3,12,000 | 4,80,000 | | | |
| To Provision for Tax | 9,12,000 | 6,96,000 | | | |
| To Net Profit | 9,12,000 | 6,96,000 | | | |
| Total | 77,37,600 | 1,02,38,400 | Total | 77,37,600 | 1,02,38,400 |

9. The income statements of a Nisha Ltd. are given for the years ending on 31st March, 2019 and 2020. You are required to prepare a comparative income statement and interpret the changes.

Income Statements for the year ending 2019 and 2020

| Particulars | 2019 ₹ | 2020 ₹ |
|---------------------------------|----------|----------|
| Sales | 487500 | 543750 |
| Cost of Sales | 318750 | 375000 |
| Gross Profit | 1,68,750 | 1,68,750 |
| Operating Expenses | | |
| Selling & Distribution Expenses | 45000 | 56250 |
| General Expenses | 18750 | 30000 |
| Total Operating Expenses | 63,750 | 86,250 |
| Net Profit during the year | 1,05,000 | 82,500 |

10. From the following balance sheet as on 31 st March, 2019 and 31st March, 2020 of M/sYahvi Ltd. Prepare Comparative balance sheet for analysis purpose in vertical form.

Comparative Statements,
Common Size Statements &
Trend Analysis Comparative
Balance Sheet

| Particular | 31st March 2019 ₹ | 31st March 2020 ₹ |
|--|----------------------|----------------------|
| Assets | | |
| Cash and Bank balance | 8,40,000 | 2,80,000 |
| Short term investments | 2,80,000 | 12,60,000 |
| Accounts receivable | 18,20,000 | 14,00,000 |
| Inventories | 21,00,000 | 7,00,000 |
| Prepaid Income Tax | 3,50,000 | 2,80,000 |
| Other Current Assets | 4,20,000 | 3,50,000 |
| | 58,10,000 | 42,70,000 |
| Land and Building | 5,60,000 | 3,50,000 |
| Machinery | 8,40,000 | 7,00,000 |
| Furniture | 2,10,000 | 1,40,000 |
| Leasehold Land | 3,50,000 | 3,50,000 |
| | 19,60,000 | 15,40,000 |
| | 77,70,000 | 58,10,000 |
| Liabilities: | | |
| Bills payable | 16,80,000 | 11,20,000 |
| Accounts payable | 14,00,000 | 7,00,000 |
| Accrued compensation and employee benefit | 7,00,000 | 2,80,000 |
| Income tax payable | 2,80,000 | 1,40,000 |
| | 40,60,000 | 22,40,000 |
| Equity Capital | 28,00,000 | 28,00,000 |
| Reserve | 9,10,000 | 7,70,000 |
| | 37,10,000 | 35,70,000 |
| | 77,70,000 | 58,10,000 |

11. From the following financial statements of Tappu Limited, prepare financial statements in Vertical Form.

Balance Sheets as at 31st December

| Liabilities | 31st March 2019 ₹ | 31st March 2020 ₹ | Assets | 31st March 2019 ₹ | 31st March 2020 ₹ |
|-----------------------------|-------------------|-------------------|---------------------------|-------------------|-------------------|
| Equity Share Capital | 6,00,000 | 6,00,000 | Land | 3,00,000 | 3,60,000 |
| 9% Preference Share Capital | 4,50,000 | 4,50,000 | Factory Plant & Buildings | 9,00,000 | 8,10,000 |
| General Reserves | 3,00,000 | 3,67,500 | Stocks | 3,00,000 | 4,50,000 |
| Tax Payable | 1,50,000 | 2,25,000 | Debtors | 3,00,000 | 4,50,000 |
| Creditors | 3,00,000 | 4,12,500 | Cash | 1,50,000 | 2,10,000 |
| 17% Debentures | 1,50,000 | 2,25,000 | | | |
| | 19,50,000 | 22,80,000 | | 19,50,000 | 22,80,000 |

Income Statement for Year Ended 31st December

| Expenses | 31st March 2019 ₹ | 31st March 2020 ₹ | Income | 31st March 2019 ₹ | 31st March 2020 ₹ |
|--------------------|-------------------|-------------------|--------|-------------------|-------------------|
| Cost of goods sold | 9,00,000 | 11,25,000 | Sales | 12,00,000 | 15,00,000 |
| Admn. Expenses | 45,000 | 60,000 | | | |
| Selling Expenses | 30,000 | 30,000 | | | |
| Net Profit | 2,25,000 | 2,85,000 | | | |
| | 12,00,000 | 15,00,000 | | 12,00,000 | 15,00,000 |

Briefly comment on the difference between the stated net profit of 2020 and the increment in General Reserves on 31-12-2020 assuming that no amount is paid towards tax in 2020. Also ascertain the quantum of cash gross profit of 2020 assuming that no depreciation is provided on Land.

12. From the following Financial statements of Grishma Limited prepare a common size financial statement and give your comments on them.

Profit and Loss Account for the year ended 31st March 2020

Comparative Statements,
Common Size Statements &
Trend Analysis Comparative
Balance Sheet

| Particular | ₹ | Particular | ₹ |
|------------------------------------|-----------|-------------------|-----------|
| To Opening Stock | 4,68,000 | By Sales | 23,40,000 |
| To Purchases | 14,04,000 | By Closing Stock | 7,02,000 |
| To Wages | 2,92,500 | | |
| To Factory Overheads | 2,92,500 | | |
| To G.P. c/d | 5,85,000 | | |
| | 30,42,000 | | 30,42,000 |
| | | | |

| To Selling & Distribution Expenses | 58,500 | By Dividend | 35,100 |
| To Depreciation | 76,050 | | |
| To Interest on Debentures | 23,400 | | |
| To Net Profit c/d | 3,74,400 | | |
| | 6,20,100 | | 6,20,100 |
| | | | |
| To Preference Dividend Paid | 17,550 | By Balance b/d | 2,34,000 |
| To Provision for Tax | 1,22,850 | By Net Profit b/d | 3,74,400 |
| To Surplus to Balance Sheet | 4,68,000 | | |
| | 6,08,400 | | 6,08,400 |

Balance Sheet as on 31st March 2013

| Liabilities | ₹ | Assets | ₹ |
|--------------------------|-----------|---------------------|-----------|
| Equity Share Capital | 11,70,000 | Goodwill | 5,85,000 |
| Preference Share Capital | 5,85,000 | Plant and Machinery | 5,85,000 |
| General Reserve | 1,17,000 | Land and Building | 9,36,000 |
| P and LA/c Balance | 4,68,000 | Furniture | 1,17,000 |
| Provision for Tax | 1,22,850 | Stock | 5,85,000 |
| Bill Payable | 2,28,150 | Bill Receivable | 93,600 |
| Bank Overdraft | 1,17,000 | Debtors | 2,34,000 |
| Creditors | 5,85,000 | Bank | 2,57,400 |
| | 33,93,000 | | 33,93,000 |

13. From the following information of Sahani Enterprises prepare the Common size Revenue Statement with Amount and % for the year ended on 31st March, 2020 in a vertical form suitable for analysis

| Particulars | % on net sales of Rs.500000 |
|-------------------------------|-----------------------------|
| Opening Stock | 2 |
| Closing Stock | 2.25 |
| Purchases | 51 |
| Office Expenses | 4.5 |
| Other Administrative Expenses | 6.2 |
| Distribution Expenses | 5.7 |
| Selling Expenses | 4.65 |
| Interest (Dr.) | 1.80 |
| Direct Wages | 3.30 |

Provision for Income tax is to be made @25% on net profit before tax.

RATIO ANALYSIS

Unit structure:

- 4.0 Objectives
- 4.1 Introduction
- 4.2 Definition and Meaning
- 4.3 Importance and limitation of Accounting Ratios
- 4.4 Classification of Ratios-
- 4.5 Balance Sheet Ratios
- 4.6 Revenue Statement Ratios
- 4.7 Combined Ratios

4.0 OBJECTIVES:

After studying the unit the students will be able to understand:

- Meaning and definition of ratios
- Advantages of preparing ratios
- Importance of Ratio Analysis
- Limitations of Ratio Analysis
- Calculate various ratios to assess solvency, liquidity, efficiency and profitability of the firm.
- Apply ratio analysis to evaluate a company's liquidity, performance & risks.
- Standardize financial information for comparison.
- Compare present performance with past performance.
- Evaluate current operations

4.1 INTRODUCTION

The basis for financial analysis, planning and decision making the financial statements which mainly consist of Balance sheet and profit and loss account.

The profit & loss account shows the operating activities of the concern over a period of time and the balance sheet shows balance activities of assets and liabilities in other words financial position of an organization at a particular point of time.

However, the above statements do not disclose all of the necessary and relevant information. For the purpose of obtaining the material and relevant information necessary for ascertaining the financial strengths and

weaknesses of an enterprise, it is necessary to analyse the data depicted in the financial statement.

The financial manager has certain analytical tools which helps in financial analysis and planning . One of the main tool is **Ratio Analysis** let us discuss the Ratio Analysis in this chapter.

4.2 RATIO DEFINITION & MEANING:

Definition of Ratio

A ratio is defined as “the indicated quotient of two mathematical expressions and as the relationship between two or more things.” Here, ratio means financial ratio or accounting ratio which is a mathematical expression of the relationship between two accounting figures.

According to Myers, “Ratio Analysis of financial statements is a study of relationship among various financial factors in a business as disclosed by a single set of statements and a study of trend of these factors as shown in a series of statements.”

According to James C. Van Harn “Ratio is a yardstick used to evaluate the financial condition and performance of a firm, relating two pieces of financial data to each other.”

According to Kohler “The relation of one amount A to another B expressed as the ratio of A to B”.

“Ratio is the relationship or proportion that one amount bears to another, the first number being the numerator and the later denominator.”

From the above definitions we conclude that ratio analysis gives us idea about company or firm's financial position. It is helpful for investors as well as company also for future better performance also they can use it.

Meaning of Ratio analysis

Ratio-Analysis means the process of computing, determining and presenting the relationship of related items and groups of items of the financial statements. They provide in a summarized and concise form of fairly good idea about the financial position of a unit. They are important tool for financial analysis.

Ratio is the numerical or arithmetical relationship between two figures. Ratio is simply one number expressed in terms of another. It is powerful tools of the financial analysis.

The data given in the financial statement does not have any importance unless a relationship is established among them . The ratio used to reveal the relationship of accounting data is called accounting ratio or ratio analysis.

Ratio may be expressed in terms of -

- 1) Proportion , pure, simple ratio E.g. Current asset:Current liabilities 2:1
- 2) Rate or times or days or coefficient e.g 5 times
- 3) In percentage e.g. %
- 4) In fraction e.g. $1/4^{\text{th}}$

Sources required for the Ratio analysis-

- 1) Annual Report
- 2) Financial statement
- 3) notes to accounts
- 4) statement of cash flow statement

Importance of accounting ratios-

1. Understanding financial statements are important for stakeholders of the company. Ratio analysis helps in understanding the comparison of these numbers: furthermore it helps in estimating numbers from income statements and balance sheets for the future. For e.g. equity shareholders looks into the P/E ratio, the dividend payout ratio etc. while creditors observe debt to equity ratio, gross margin ratio, debt to asset ratio etc.
2. Ratio analysis is important in understanding the company's ability to generate profit. Return of asset, return on equity tells us how much profit the company is able to generate over assets of the firm. While gross margin and operating margin ratios tell us the company's ability to generate profit from sales and operating efficiency.
3. From a management and investor point of view ratio analysis helps to understand and estimate the company's future financials and operations. Ratios formed from past financial statement analysis helps in estimating future financials, budgeting and planning for the future operation of the company.
4. The company operates under various business, market, operations related risks. Ratio analysis help in understanding these risks and helps management to prepare and take necessary actions. Leverage ratios help in performing sensitivity analysis of various factors affecting the company's profitability like sales, cost, debt, financial leverage ratios like interest coverage ratio and debt coverage ratio tell how much the company is dependant on external capital source.
5. Investor as well as the company's management, makes a comparison with competitors company to understand efficiency, profitability and market share, ratio analysis is helpful for companies to perform SWOT (strengths, weakness, opportunities and threats) analysis in the market. It also tells whether the company is able to perform growth or not over a period from past financials and whether the company's financials and whether the company's financial position is improving or not.

6. A better source of communication with customers, stakeholders, and other outsiders who want to invest in the company.
7. Helps in understanding the profitability of the company for decision making purpose.
8. Helps in identifying the business risks of the firm to protect from future threats or any losses.
9. Helps in identifying the financial risks of the company for better performance of the company or firm.
10. For planning and future forecasting of the firm ratio analysis helps more.
11. To compare the performance of the firms ratio analysis give brief idea about current position of the company.
12. Ratio analysis makes comparison easy for the user. one ratio is compared with another ratio as it shows efficiency or utilisation of assets etc.
13. Ratio analysis helps the management for future best performance with help of past performance experience.

Limitations of Accounting Ratios-

The limitations of ratio analysis which arise primarily from the nature of financial statements are as under:

1. Financial statements provide historical information. They do not reflect current conditions. Hence, it is not useful in predicting the future.
2. Correct and standard ratio can be obtained only if we have true, comparable or correct data. Lack of true comparison give false results.
3. Different companies may have different accounting methods if two firms follow different accounting policies. Different accounting policies regarding valuation of inventories, charging depreciation etc. make the accounting ratios of two firms non-comparable.
4. It is essential to have information about the company regarding its past as well as future transactions to have purposeful analysis. But ratios give information only about the past.
5. Fixed assets show the position statement at cost only. Hence, it does not reflect the changes in price level. Thus, it makes comparison difficult.

6. Accounting ratios are tools of quantitative analysis only. But it is quite possible that qualitative aspect may be over quantitative aspects. So in this case analysis may get distorted.
7. No fixed standards can be laid down for ideal ratios. Some times ratios may be worked out for insignificant and unrelated figures. Such ratios will be misleading.e.g. current ratio 2:1
8. It might possible that some firms may manipulate the data to bring about changes to the ratio for displaying a better picture of the firm, thus in the ratio analysis there are scope of window dressing.
9. Ratio analysis may be missinterpreted at a time because Profit and loss account is based on actual numbers and balance sheet data is based on historical so Due to mix of historical and actual numbers it may not give desired results.
10. Ratios are subject to arithmetical accuracy of the financial statements. Moreover, financial statements also include estimated data like provision for depreciation, for bad and doubtful debts etc. hence results revealed by ratios are subject to such estimates.
11. Knowledge of ratios alone is meaningless unless their composition is ascertained.
12. A ratio is a comparison of two figures, a numerator and a denominator. In comparing ratios, it may be difficult to determine whether difference are due to changes in the numerator, or in the denominator or in both.

CLASSIFICATION OF RATIOS

The ratios are used for different purposes, for different users and for different analysis. The ratios can be classified as under:

1. Traditional classification
2. Functional classification
3. Classification from the point of view of users

The above classifications can be elaborated as follows:

• TRADITIONAL CLASSIFICATION

From this point of view the ratios are classified as follows:

i. Balance sheet ratios-

This ratio is also known as financial ratios. The ratios which express relationship between two items or group of items mentioned in the balance sheet at the end of the year, Some examples of balance sheet ratios are as follows:

Current ratio
Quick ratio
Proprietary ratio
Stock to working capital
Debt equity ratio
Capital gearing ratio

ii. Income statement ratios-

This ratio is also known as Revenue statement ratios which expressed in relationship between two items or two groups of items which are found in the income statement of the year.

Some examples of income statement ratios are as follows:

Gross profit ratio
Operating cost ratio
Operating profit ratio
Net profit ratio
Stock turnover ratio

iii. Inter statement ratios-

These ratios shows the relationship between two items or two groups of items of which one is from balance sheet and another from income statement(trading a/c and profit & loss a/c and balance sheet)

Somr examples of inter statement ratios are as follows:

Return on investment
Return on equity capital ratio
Trade receivable turnover ratio
Trade payabeles turnover ratio
Fixed assets turnover ratio
Earning per share

• **FUNCTIONAL CLASSIFICATION**

The accounting ratios can also be classified according to their functions as follows:

i. Liquidity Ratios-

These ratios shows relationship between current assets and current liabilities:

Some examples of liquidity ratios:

Current Ratio
Quick Ratio

ii. Leverage Ratios/Long term solvency ratios-

These ratios shows relationship between proprietor's fund and debts used in finanacing the assets of the business organization.

Some examples of leverage ratios:

Debt equity ratio
Proprietary ratio
Capital gearing ratio

iii. Activity Ratios/Turnover ratios-

This ratio is also known as turnover or productivity ratio or efficiency and performance ratio. These ratio shows relationship between the sales and the assets. These are designed to indicate the efficiency of the firm or company in using funds, degree of efficiency, and its standard of performance of the organization.

Some examples of Activity ratios are as follows:

Stock turnover ratio

Trade receivables turnover ratio

Trade payables turnover ratio

Fixed assets turnover ratio

iv. Profitability ratios-

These ratios show relationship between profits and sales and profit and investments. It reflects overall performance of the organizations, its ability to earn return on capital employed and effectiveness of investment policies

Some example of profitability ratios are as follows:

Gross profit ratio

Operating cost ratio

Operating cost ratio

Net profit ratio

Return on investment

v. Coverage ratios-

These ratios show relationship between profit in hand and claims of outsiders to be paid out of profits.

Some examples of coverage ratios are as follows:.

Dividend payout ratio

Debt service ratio

Debt service coverage ratio

• CLASSIFICATION FROM THE POINT OF VIEW OF USERS

Ratios from the users point of view are classified as follows:

i. Shareholder's point of view

These ratios are serve the purpose of shareholders. Shareholders, generally expect the reasonable return on their capital.They are interested in the safety of shareholders investments and interest on it.

Some examples it as follows:

Return of proprietor's fund

Return on capital

Earning per share

ii. Long term creditors

This ratio provides useful information to the long term creditors which include debenture holders,vendors of fixed assets etc. The creditors interested know the ability of repayment of principle sum and periodical interest payments as and when they become due.

Some examples of it are as follows:

Debt equity ratio

Return on capital employed
Proprietary ratio

iii. Short term creditors

The short term creditors are basically interested to know their repayment ability of the firm. Therefore, the creditors has important place on the liquidity aspects of the company's assets.

Some examples of it are as follows:

Current ratio
Debtor's turnover ratio
Stock working capital ratio

iv. Management

Management is interested to use borrowed funds to improve the earnings.

Some examples of its are as follows:

Return on capital employed
Turnover ratio
Operating ratio
Expense ratio

Balance sheet Ratios/ Liquidity Ratios/ Short term solvency Ratios

The term 'liquidity' and 'short-term solvency' are used synonymously.

Liquidity or short-term solvency means ability of the business to pay its short-term liabilities. Inability to pay-off short-term liabilities affects its credibility as well as its credit rating. Continuous default on the part the business leads to commercial bankruptcy. Eventually such commercial bankruptcy may lead to its sickness and dissolution. Short-term lenders and creditors of a business are very much interested to know its state of liquidity because of their financial stake. Both lack of sufficient liquidity and excess liquidity is bad for the organization.

1. Current Ratio- The Current Ratio is one of the best known measures of short term solvency. It is the most common measures of short term liquidity.

Current ratio measures whether a firm had enough resources to meet its current obligations.

Formula:

$$\text{Current Ratio} = \frac{\text{Current Assets}}{\text{Current Liabilities}}$$

Current Assets = Inventories + Sundry Debtors + Cash and Bank Balances + Receivables/Accruals + Loans and advances + Disposable investment + any other current asset.

Current Liabilities = Creditor for goods and services + Short term loans + bank overdraft + cash credit + outstanding expenses + provision for

taxation+proposed divided+unclaimed dividend+any other current liabilities.

A generally accepted current ratio is 2:1 But whether or not a specific ratio is satisfactory depends on the nature of the business and the characteristics of its current assets and liabilities.

Example:

Calculate Current Ratio from the following information

| Particulars | Rs. |
|---------------------------------------|----------|
| Inventories | 50,000 |
| Trade Receivables | 50,000 |
| Advance tax | 4,000 |
| Cash and cash equivalent | 30,000 |
| Trade payables | 1,00,000 |
| Short term borrowings(bank overdraft) | 4,000 |

Solution:

Current Ratio = Current Assets/Current Liabilities

Current Assets = Inventories+Trade receivables+Advance tax+Cash and cash equivalents
=Rs. 50,000+Rs.50,000+Rs.4,000+Rs.30,000
=Rs.1,34,000

Current liabilities = Trade payables+short-term borrowings
=Rs.1,00,000+Rs.4,000
=Rs.1,04,000

Current Ratio = Rs.1,34,000/ Rs.1,04,000 =1.29:1

Since, excess of current asset over current liabilities provide a measures of safety margin available against uncertainty in realisation of current assets and flow of funds.The ratio should be reasonable.It should be neither be very high or very low. Both the situations have their inherent disadvantages. A very high current ratio implies heavy investment in current assets which is not a good sign as it reflects under utilisation or improper utilisation of resources. A low ratio dagerous for business and put it at risk of facing a situation where it will not be able to pay its short-term debt on time.Normally, it is safe to have this ratio within range of 2:1

2. Quick or Liquid ratio-

It is the ratio of quick(or liquid) asset to current liabilities. It is expressed as :

$$\text{Quick ratio} = \frac{\text{Quick Asset}}{\text{Current Liabilities}}$$

Or

$$\frac{\text{Quick Assets}}{\text{Current Liabilities}}$$

Quick assets means those assets which are quickly convertible into cash. While calculating quick assets we exclude the inventories at the end and other current assets such as prepaid expenses, advance tax etc. from the current assets. Due to exclusion of non-liquid current assets it is better than current ratio as a measure of liquidity position of the business. It is calculated to serve as a supplementary check on liquidity position of the business and is therefore, also known as 'Acid-Test Ratio'.

Illustration:

Calculate quick ratio from the information given in illustration 1

Solution :

$$\text{Quick Ratio} = \frac{\text{Quick Assets}}{\text{Quick Liabilities}}$$

$$\text{Quick Assets} = \text{Current Assets} - (\text{Inventories} + \text{Advance tax})$$

$$= \text{Rs}1,34,000 - (\text{Rs}.50,000 + \text{Rs}.4,000)$$

$$= \text{Rs} 80,000$$

$$\text{Quick Liabilities} = \text{Rs} 1,04,000 - 4,000$$

$$\text{Quick Ratio} = \frac{\text{Rs}.80,000}{\text{Rs}. 1,00,000} = 0.80:1$$

This Ratio Provides a measures of capacity of the business to meet its short term obligation without any flaw. Normally, it is advovated to be safe to have a ratio of 1:1 as unnecessarily low ratio will be very risky and high ratio suggests unnecessarily deployment of resources in otherwise less profitable short term investments.

3. Proprietary Ratio-

Proprietary ratio express relationship of properietors fund to net assets and its calculated as follows:

$$\text{Proprietary ratio} = \frac{\text{Shareholders fund}}{\text{Capital employed/ Net assets}}$$

OR

$$\text{Proprietary ratio} = \frac{\text{Proprietary fund}}{\text{Total Assets}}$$

Proprietary fund includes equity share capital, preference share capital and reserves and surplus

Total assets exludes fictitious assets and losses

This ratio indicates that the proportion of total assets financed by shareholders. Higher the ratio less risky scenario it shall be

4. Stock Working Capital Ratio-

This ratio is calculated as follows:

$$\text{Stock Working capital ratio} = \frac{\text{Closing Stock}}{\text{Working Capital}}$$

This ratio indicates the extent of working capital turned over in achieving sale of the firm

5. Capital Gearing Ratio-

Capital Gearing ratio is calculated to show the proportion of fixed interest (Dividend) bearing capital to funds belonging to equity shareholders i.e equity funds or net worth again higher ratio may indicate more risk

Capital Gearing ratio =

$$\frac{\text{Preference share capital} + \text{Debentures} + \text{Other borrowed funds}}{\text{Equity Share Capital} + \text{Reserves and surplus} - \text{Losses}}$$

6. Debt Equity Ratio-

$$\begin{aligned} \text{Debt Equity ratio} &= \frac{\text{Long Term Debt}}{\text{Shareholder's Fund}} \\ &\text{OR} \\ &= \frac{\text{Total Outside liabilities}}{\text{Shareholder's Equity}} \\ &\text{OR} \\ &= \frac{\text{Total Debt}}{\text{Shareholder's Equity}} \end{aligned}$$

Where:

Shareholder's Funds (Equity) = Share capital+ Reserves and Surplus+ Money received against share warrants + Share application money pending allotment

Share capital = Equity Share capital+ Preference Share capital
OR

Shareholder's Fund(Equity) = Non Current assets + Working capital – Non current liabilities

Working Capital = Current Assets- Current liabilities

Not merely Long term debt i.e both current and non current liabilities
Some times only interest bearing, Long term debt used instead of total liabilities (exclusive of current liabilities)

A high debt to equity ratio means less protection for creditors, a low ratio on the other hand indicates a wider safety for creditors. The ratio indicates the proportion of debt fund in relation to equity. The ratio is used for making capital structure decisions such as issue of shares and debentures, lenders are also very eager to know this ratio since it shows relative

weights of debt and equity. Debt equity ratio is the indicator of firms financial leverage.

This ratio measures the degree of indebtedness of an enterprise and gives an idea to the long term lenders regarding extend of security of the debt.

Illustration :

From the following balance sheet of ABC Co. Ltd as on March 31, 2022
Calculate debt equity ratio

| Particulars | Amount (Rs) |
|---|------------------|
| I. Equity and Liabilities | |
| 1. Shareholder's Fund | |
| (a) Share capital | 12,00,000 |
| (b) Reserves and surplus | 2,00,000 |
| (c) Money received against share warrants | 1,00,000 |
| 2. Non current liabilities | |
| (a) Long term borrowings | |
| (b) other long term liabilities | 4,00,000 |
| (c) long term provisions | 40,000 |
| 3. Current liabilities | 60,000 |
| (a) Short term borrowings | 2,00,000 |
| (b) Trade Payables | 1,00,000 |
| (c) Other Current Liabilities | 50,000 |
| (d) Short Term Provisions | 1,50,000 |
| II. Assets | 25,00,000 |
| 1. Non current Assets | 15,00,000 |
| (a) Fixed Assets | 2,00,000 |
| (b) Non Current Investments | 1,00,000 |
| (c) Long Term Loans and advances | |
| 2. Current Assets | 1,50,000 |
| (a) Current Investment | 1,50,000 |
| (b) Inventories | 1,00,000 |
| (c) Trade Receivables | 2,50,000 |
| (d) Cash and cash Equivalent | 50,000 |
| (e) Short term loans and advances | 25,00,000 |

Solution:

$$\text{Debt Equity Ratio} = \frac{\text{Debts}}{\text{Equity}}$$

$$\begin{aligned} \text{Debt} &= \text{Long term borrowings} + \text{other long term liabilities} + \text{long term} \\ &\quad \text{Provisions} \\ &= \text{Rs.4,00,000} + \text{Rs.40,000} + \text{Rs.60,000} \\ &= \text{Rs.5,00,000} \end{aligned}$$

$$\begin{aligned} \text{Equity} &= \text{Share capital} + \text{Reserves and surplus} + \text{Money received against} \\ &\quad \text{share warrants} \\ &= \text{Rs.12,00,000} + \text{Rs.2,00,000} + \text{Rs.1,00,000} \\ &= \text{Rs.15,00,000} \end{aligned}$$

Alternatively,

$$\begin{aligned} \text{Equity} &= \text{Non current assets} + \text{working capital} - \text{non current liabilities} \\ &= \text{Rs.18,00,000} + \text{Rs.2,00,000} - \text{Rs.5,00,000} \\ &= \text{Rs.15,00,000} \end{aligned}$$

$$\begin{aligned} \text{Working Capital} &= \text{Current assets} - \text{current liabilities} \\ &= \text{Rs.7,00,000} - \text{Rs.5,00,000} \\ &= \text{Rs.2,00,000} \end{aligned}$$

$$\text{Debt Equity Ratio} = \frac{50,000}{1,50,000} = 0.33:1$$

Revenue Statement Ratio**1. Gross Profit Ratio/Gross profit margin-**

Gross profit ratio as a percentage of revenue from operations is computed to have an idea about gross profit. It measures the percentage of each sale in rupees remaining after payment for the goods sold. It is calculated as follows:

$$\text{Gross profit ratio} = \frac{\text{Gross profit}}{\text{Net Revenue of operations}} \times 100$$

Or

$$= \frac{\text{Gross Profit}}{\text{Sales}} \times 100$$

Gross profit margin depends on the relationship between sales price, volume and costs. A high Gross profit margin is a favourable sign of good management.

2. Operating Ratio-

It is computed to analyse cost of operation in relation to revenue from operations. It is calculated as follows:

$$\text{Operating Ratio} = \frac{\text{Cost of Revenue from operation} + \text{Operating Expenses}}{\text{Net Revenue from operation}} \times 100$$

Operating expenses include office expenses, administrative expenses, selling expenses, distribution expenses, Depreciation and employee benefit expenses etc.

Cost of operation is determined by excluding non-operating incomes and expenses such as loss on sale of assets, interest paid, dividend received, loss by fire, speculation gain and so on.

Operating Profit Ratio

Operating profit ratio is also calculated to evaluate operating performance of business or organisation.

$$\text{Operating Profit Ratio} = \frac{\text{Operating profit}}{\text{Sales}} \times 100$$

Or

$$= \frac{\text{Earning before interest and taxes(EBIT)}}{\text{Sales}} \times 100$$

Where as,

Operating profit = Sales - Cost of Goods Sold (COGS) - Operating expenses

Operating profit ratio measures the percentage of each sale in rupees that remains after the payment of all costs and expenses except for interest and taxes. The ratio is followed closely by analysts because it focuses on operating results. operating profit is often referred to as earning before interest and taxes or EBIT

3. Expense ratios-

Based on different concepts of expenses it can be expressed in different variants as below:

- I. Cost of goods sold (COGS) Ratio = $\frac{\text{COGS}}{\text{sales}} \times 100$
- II. Operating expenses ratio = $\frac{\text{Administrative exp} + \text{selling \& distribution OH}}{\text{Sales}} \times 100$
- III. Operating Ratio = $\frac{\text{COGS} + \text{Operating expenses}}{\text{Sales}} \times 100$
- IV. Financial Expenses Ratio = $\frac{\text{Financial expenses}}{\text{Sales}} \times 100$

*It excludes taxes, loss due to theft, goods destroyed by fire etc.

4. Net profit ratio- Net profit ratio is based on all inclusive concept of profit. It relates revenue from operations to net profit after operational as well as non-operational expenses and incomes. It is calculated as under:

$$\text{Net profit ratio} = \frac{\text{Net profit}}{\text{Revenue from operations}} \times 100$$

Or

$$= \frac{\text{Net profit}}{\text{sales}} \times 100$$

Or

$$= \frac{\text{Earnings after taxes (EAT)}}{\text{Sales}} \times 100$$

Or

$$\text{Pre-Tax Profit Ratio} = \frac{\text{Earnings before taxes (EBT)}}{\text{Sales}} \times 100$$

Generally, net profit refers to profit after tax (PAT)

It is a measure of net profit margin in relation to revenue from operations. Besides revealing profitability. It is the main variable in computation of

return on investment. It reflects the overall efficiency of the business, assumes great significance from the point of view of investors. Net profit ratio finds the proportion of revenue that find its way into profits after meeting all expenses. A high net profit ratio indicates positive returns from the business.

5. Stock turnover ratio

This ratio is a considerable amount of a company's capital may be tied up in the financing of raw materials, work-in-progress and finished goods. It is important to ensure that the level of stocks is kept as low as possible, consistent with the need to fulfill customer's orders in time.

$$\text{Stock turnover ratio} = \frac{\text{COGS}}{\text{Average Inventory}} \quad \text{or} \quad \frac{\text{Sales}}{\text{Average Inventory}}$$

$$\text{Average inventory} = (\text{Opening Stock} + \text{Closing Stock}) / 2$$

The highest the stock turnover rate or the lower the stock turnover period the better, although the ratios will vary between companies. This ratio measures that how many times stock has been sold during the year.

Combined Ratios

1. **Return on capital employed (ROCE)**- It is another variation of ROI the ROCE is calculated as follow.

$$\text{ROCE (before tax)} = \frac{\text{Earnings before interest and taxes (EBIT)}}{\text{Capital Employed}} \times 100$$

$$\text{ROCE (after tax)} = \frac{\text{EBIT}(1-t)}{\text{Capital Employed}} \times 100$$

Sometimes it also calculated as

$$= \frac{\text{Net profit after taxes (PAT/EAT)}}{\text{Capital Employed}} \times 100$$

Where as

Capital Employed = Total assets - Current liabilities

Or

$$= \text{Fixed assets} + \text{Working capital}$$

Or

$$= \text{Equity} + \text{Long term debt}$$

The return on capital employed should be always higher than the rate at which the company borrows.

Intangible assets should be included in the capital employed.

No fictitious assets should be included in within capital employed.

If there is information available regarding average capital employed shall be taken.

2. Return on proprietor's Fund-

This ratio is important from shareholders point of view in assessing whether their investment in the firm generates a reasonable return or not. It should be higher than the return on investment otherwise it would imply that company's funds have not been employed profitably.

A better measure of profitability from shareholders point of view is obtained by determining return on total shareholder's funds, it is also termed as return on shareholder's fund

Formula:

$$\text{Return on proprietor's fund} = \frac{\text{Profit After Tax}}{\text{Shareholders funds}} \times 100$$

3. Return on equity share capital- Return on equity measures the profitability of equity funds invested in the firm or company. This ratio shows how profitability of the shareholders have been utilised by the company. This ratio also measures the percentage of return generated to equity shareholders

$$\text{ROE} = \frac{\text{Net profit after taxes-preference dividend(if any)}}{\text{Net worth/ equity shareholdre's funds}} \times 100$$

4. Debtor's Turnover Ratio(Debtor's Velocity)-

This ratio measures whether the amount or resources tied up in debtors, is reasonable and whether the company has been efficient in converting debtors into cash.

Formula:

$$\text{Debtor's Turnover ratio} = \frac{\text{Credit Sales}}{\text{Average Debtors}} \times 100$$

$$\text{Debtor's Velocity Ratio} = \frac{\text{Average Debtors}}{\text{Credit sales}} \times 365 \text{ days}$$

Average debtors collection period measures how long it takes to collect amounts from this ratio

5. Earning Per share (EPS)

The profitability of a firm from the point of view of ordinary shareholder's can be measured in term of earnings per share basis. It is calculated as follow:

$$\text{EPS} = \frac{\text{Net profit available to equity shareholders}}{\text{Number of equity shares outstanding}}$$

This ratio is very important from equity shareholders point of view and also for the share price in the stock market. This also helps comparison with other to ascertain its reasonableness and capacity to pay dividend.

6. Dividend Payout ratio-

This ratio measures the dividend paid in relation to net earnings. It is determined to see to how much extent earnings per share have been retained by the management for the business. it is calculated as follows:

$$\text{Dividend payout ratio} = \frac{\text{Dividend per equity share (DPS)}}{\text{Earning per share (EPS)}}$$

7. Price earning ratio-

The price earning ratio indicates the expectation of equity investors about the earnings of the firm. It relates earnings to market price and is generally taken as a summary measure of growth potential of an investment, risk characteristics, shareholders orientation, corporate image and degree of liquidity. It is calculated as

$$\text{Price-Earnings per share (P/E Ratio)} = \frac{\text{Market price per share (MPS)}}{\text{Earning per share (EPS)}}$$

It indicates the payback period of the investor or prospective investors. A higher P/E ratio could either mean that a company's stock is over-valued or the investors are expecting high growth rate in future

Ratios at a glance

| Sr. no | Ratio | Formula | Interpretation |
|--------|-----------------------------|--|---|
| 1 | Current Ratio | $\frac{\text{Current Asset}}{\text{Current Liabilities}}$ | A simple measure that estimates whether the business can pay short term debts. Ideal ratio is 2:1 |
| 2 | Quick Ratio | $\frac{\text{Quick Assets}}{\text{Current Liabilities}}$ | It measures the ability to meet current debt immediately. Ideal ratio is 1:1 |
| 3 | Proprietary Ratio | $\frac{\text{Proprietary Fund}}{\text{Total Assets}}$ | It measures the proportion of total assets financed by shareholders. |
| 4 | Stock working capital ratio | $\frac{\text{Closing Stock}}{\text{Working Capital}}$ | This ratio indicates the extent of working capital turned over in achieving sale of the firm |
| 5 | Capital gearing ratio | $\frac{\text{(Preference+Debentures+other borrowed funds)}}{\text{(Equity share capital+Reserves \& Surplus-losses)}}$ | It shows the proportion of fixed interest bearing capital to equity shareholder's fund. It also signifies the advantage of financial leverage to the equity shareholders. |
| 6 | Debt equity ratio | $\frac{\text{Long Term Debt}}{\text{Shareholder's Fund}}$ OR $\frac{\text{Total Outside Liabilities}}{\text{Shareholder's}}$ | This ratio measures the degree of indebtedness of an enterprise and gives an idea to the long term lenders regarding extend of security of the debt. |

| | | | |
|----|------------------------------|---|---|
| | | Equity OR <u>Total Debt</u> Shareholder's Equity | |
| 7 | Gross profit ratio | $\frac{\text{Gross profit}}{\text{Sales}} \times 100$ | This ratio tells us something about the business's ability & consistency to control its production costs or to manage the margins it makes on products it buys and sells. |
| 8 | Operating ratio | $\frac{\text{COGS} + \text{Operating Expenses}}{\text{Sales}} \times 100$ | It measures portion of a particular expenses in comparison to sales |
| 9 | Operating Profit ratio | Operating profit $\times \frac{100}{\text{Sales}}$ OR Earning before interest and taxes <u>(EBIT)</u> $\times 100$ Sales | The ratio is followed closely by analysts because it focuses operating results. Operating profit is often referred to as earning before interest and taxes or EBIT |
| 10 | Expense ratio | Administrative exp + selling & Distribution OH $\times 100$ Sales | It measures portion of a particular expenses in comparison to sales |
| 11 | Net profit ratio | $\frac{\text{Net Profit}}{\text{Sales}} \times 100$ | It measures the relationship between net profit and sales of the business |
| 12 | Stock turnover ratio | $\frac{\text{COGS}}{\text{Average inventory}}$ | This ratio measures that how many times stock has been sold during the year. |
| 13 | Return on capital employed | Before tax = $\frac{\text{EBIT}}{\text{Capital Employed}} \times 100$ After Tax = $\frac{\text{EBIT} (1-t)}{\text{Capital Employed}} \times 100$ | It measures overall earnings (either before or after tax) on total capital employed. |
| 14 | Return on Proprietor's Funds | $\frac{\text{Profit after tax}}{\text{Shareholder's fund}} \times 100$ | A better measure of profitability from shareholders point of view is obtained by determining |

| | | | |
|----|--------------------------------|--|---|
| | | | return on total shareholder's funds. |
| 15 | Return on equity share capital | $\frac{\text{Net profit after taxes-preference dividend (if any)} \times 100}{\text{Net worth/ equity shareholdre's funds}}$ | It indicates earnings available to equity shareholder's in comparison to equity shareholder's net worth. |
| 16 | Debtor's Turnover ratio | $\frac{\text{Credit sales} \times 100}{\text{Average Debtor's}}$ | It measures the efficiency at which firm is managing its receivables. |
| 17 | Debtor's velocity | $\frac{\text{Average Debtor's} \times 365\text{days}}{\text{Credit Sales}}$ | It measures the velocity of collection of receivables. |
| 18 | Earning per share | $\frac{\text{Net profit available to equity shareholders}}{\text{Number of equity shares outstanding}}$ | EPS measures the overall profit generated for each share in existence over a particular period. |
| 19 | Dividend payout ratio | $\frac{\text{Dividend per equity share(DPS)}}{\text{Equity per share(EPS)}}$ | It measures dividend paid based on market price of shares. |
| 20 | Price Earning ratio | $\frac{\text{Market Price Per Share (MPS)}}{\text{Earning Per Share (EPS)}}$ | At any time, the P/E ratio is an indication of how highly the market "rates" or "values" a business. A P/E ratio is best viewed in the context of a sector or market average to get a feel for relative value and stock market pricing. |

Exercise with solution

1) The following information available for the year 2021-2022 calculate GP ratio:

| | | |
|------------------------------|--------|-------|
| Revenue from the operations: | Cash | 25000 |
| | Credit | 75000 |
| Purchases | Cash | 15000 |
| | Credit | 60000 |
| Carrigae inwards | | 2000 |
| Salaries | | 25000 |
| Decrease in inventory | | 10000 |
| Return outwards | | 2000 |
| Wages | | 5000 |

Solution:

Revenue from operations= Cash revenue from operations+Credit revenue from operation

$$=Rs.25,000+Rs.75,000=Rs1,00,00$$

Net purchases =Cash purchases+credit purchases-Return outwards

$$=Rs15000+Rs.60000-Rs.2000=Rs.73000$$

Cost of revenue from inventory)+Direct operations =Purchases+(opening inventory-closing expenses

$$=Purchases+Decrease in inventory+Direct$$

Expenses

$$Rs.73000+Rs10000+(Rs2000+Rs5000)$$

$$= Rs 90000$$

Gross profit = Revenue from operations-Cost of revenue from operations

$$=Rs100000-Rs90000$$

$$= Rs10000$$

Gross profit ratio= Gross profit/Net revenue from operations 100

$$= Rs 10000/Rs100000 \quad 100$$

$$=10\%$$

2) A trader carries an average stock of Rs.80,000. His stock turnover is 8 times. If he sells goods at profit of 20% on sales. Find out the profit.

Solution:

$$\begin{aligned}\text{Stock turnover ratio} &= \text{Cost of goods sold}/\text{Average stock} \\ &= \text{Cost of goods sold}/\text{Rs.80,000}\end{aligned}$$

$$\begin{aligned}\text{Cost of goods sold} &= \text{Rs.80,000} \times 8 \\ &= \text{Rs.6,40,000}\end{aligned}$$

$$\begin{aligned}\text{Sales} &= \text{Cost of goods sold} \times 100/80 \\ &= \text{Rs.6,40,000} \times 100/80 \\ &= \text{Rs.8,00,000}\end{aligned}$$

$$\begin{aligned}\text{Gross profit} &= \text{Sales} - \text{Cost of goods sold} \\ &= \text{Rs.8,00,000} - \text{Rs.6,40,000} \\ &= \text{Rs.1,60,000}\end{aligned}$$

3) The total sales (all credit) of a firm are Rs.6,40,000. It has a gross profit margin of 15 per cent and a current ratio of 2.5 . The firm's current liabilities are Rs.96000; inventories Rs.48,000 and cash Rs.16,000.

a) Determine the average inventory to be carried by the firm, if an inventory turnover of 5 times is expected?(Assume 360 days a year)

b) Determine the average collection period if the opening balance of debtors is intended to be of Rs.80,000?(Assume 360 days a year).

Solution:

$$\text{a) Inventory turnover} = \frac{\text{Cost of goods sold}}{\text{Average inventory}}$$

Since gross profit margin is 15 per cent, the cost of goods sold should be 85 per cent of the sales.

$$\begin{aligned}\text{Cost of goods sold} &= 0.85 \times \text{Rs.6,40,000} = \text{Rs.5,44,000} \\ \text{Thus, Average inventory} &= \text{COGS}/\text{Inventory Turnover} \\ &= 5,44,000/5 \\ \text{Average inventory} &= \text{Rs.1,08,000}\end{aligned}$$

$$\text{b) Average collection period} = \frac{\text{Average receivables} \times 360 \text{ days}}{\text{Credit sales}}$$

$$\text{Average receivables} = (\text{opening receivables} + \text{closing receivables})/2$$

Closing balance of receivables is found as follows:

| Particulars | Rs. | Rs. |
|--|--------|----------|
| Current assets(2.5 of current liabilities) | | 2,40,000 |
| Less: Inventories | 48,000 | |

| | | |
|---------------------|--------|----------|
| Cash | 16,000 | 64,000 |
| Closing Receivables | | 1,76,000 |

$$\begin{aligned} \text{Average receivables} &= (\text{Rs. } 1,76,000 + \text{Rs. } 80,000) / 2 \\ &= \text{Rs. } 1,28,000 \end{aligned}$$

$$\begin{aligned} \text{So, average collection period} &= \frac{\text{Rs. } 1,28,000 \times 360 \text{ days}}{\text{Rs. } 6,40,000} \\ &= 72 \text{ days.} \end{aligned}$$

4) The following Trading and profit and loss account of fantasy ltd. For the year 31/03/2022 is given below.

| Particulars | Rs. | Particulars | Rs. |
|------------------------------|----------|---------------------------|----------|
| To Opening stock | 76,250 | By Sales | 5,00,000 |
| To Purchases | 3,15,250 | By Closing stock | 98,500 |
| To Carriage and Freight | 2,000 | | |
| To Wages | 5,000 | | |
| To Gross profit c/d | 2,00,000 | | |
| | 5,98,000 | | 5,98,000 |
| To Administration Expenses | 1,01,000 | By Gross profit b/d | 2,00,000 |
| To selling and dist expenses | 12,000 | By non operating incomes: | |
| Non operating expenses | 2,0000 | Interest on securities | 1,500 |
| Financial expenses | 7,000 | Dividend on shares | 3,750 |
| Net profit c/d | 84,000 | Profit on sale of shares | 750 |
| | 2,06,000 | | 2,06,000 |

Calculate:

1) Gross profit Margin 2) Expenses ratio 3) Operating ratio 4) Net profit ratio 5) Operating (net) profit ratio 6) stock turnover ratio

Solution:

$$\begin{aligned} \text{1) Gross profit margin} &= \frac{\text{Gross profit} \times 100}{\text{Sales}} \\ &= \frac{2,00,000 \times 100}{5,00,000} \\ &= 40\% \end{aligned}$$

$$\begin{aligned}
 2) \text{ Expenses ratio} &= \frac{\text{Op. Expenses} \times 100}{\text{Net sales}} \\
 &= \frac{1,13,000 \times 100}{5,00,000} \\
 &= 22.60\%
 \end{aligned}$$

$$\begin{aligned}
 3) \text{ Operating ratio} &= \frac{\text{Cost of goods sold} + \text{op. expenses}}{\text{Net sales}} \times 100 \\
 &= \frac{3,00,000 + 1,13,000}{5,00,000} \times 100 \\
 &= 82.60\%
 \end{aligned}$$

$$\begin{aligned}
 \text{Cost of goods sold} &= \text{Op. stock} + \text{purchases} + \text{carriage and freight} + \text{wages} - \\
 &\text{Closing stock} \\
 &= 76,250 + 3,15,250 + 2,000 + 5,000 - 98,500 \\
 &= \text{Rs. } 3,00,000
 \end{aligned}$$

$$\begin{aligned}
 4) \text{ Net profit ratio} &= \frac{\text{Net profit} \times 100}{\text{Net sales}} \\
 &= \frac{84,000 \times 100}{5,00,000} \\
 &= 16.8\%
 \end{aligned}$$

$$\begin{aligned}
 5) \text{ Operating profit ratio} &= \frac{\text{Operating profit}}{\text{Net sales}} \times 100 \\
 \text{Operating profit} &= \text{sales} - (\text{op exp} + \text{admin exp}) \\
 &= \frac{87,000 \times 100}{5,00,000} \\
 &= 17.40\%
 \end{aligned}$$

$$\begin{aligned}
 6) \text{ Stock Turnover ratio} &= \frac{\text{Cost of goods sold}}{\text{Avg stock}} \\
 &= \frac{3,00,000}{87,375}
 \end{aligned}$$

5) The Balance Sheet of Punjab Auto Limited as on 31-12-2002 was as follows

| Particular | Rs. | Particular | Rs. |
|----------------------|--------|-------------------------|--------|
| Equity Share Capital | 40,000 | Plant and Machinery | 24,000 |
| Capital Reserve | 8,000 | Land and Building | 40,000 |
| Capital Reserve | 8,000 | Furniture & Fixtures | 16,000 |
| 8% Loan on Mortgage | 32,000 | Stock | 12,000 |
| Creditors | 16,000 | Debtors | 12,000 |
| Bank overdraft | 4,000 | Investment (Short-term) | 4,000 |
| Taxation: | | Cash in hand | 12,000 |

| | | | |
|---------------------|----------|--|----------|
| Current | 4,000 | | |
| Future | 4,000 | | |
| Profit and Loss A/c | 12,000 | | |
| | 1,20,000 | | 1,20,000 |

From the above, compute (a) the Current Ratio, (b) Quick Ratio, (c) Debt-Equity Ratio, and (d) Proprietary Ratio.

Solution:

(Problem related to Balance Sheet Ratio)

- Current Ratio = $\frac{\text{Current Assets}}{\text{Current Liabilities}}$

Current Assets = Stock + debtors + Investment (Short term) + Cash in hand

Current Liabilities = Creditors + bank overdraft + Provision for taxation (Current & Future)

$$\text{CA} = 12,000 + 12,000 + 4,000 + 12,000 = 40,000$$

$$\text{CL} = 16,000 + 4,000 + 4,000 + 4,000 = 28,000$$

$$= \frac{40,000}{28,000}$$

$$= \mathbf{1.43:1}$$
- Quick Ratio = $\frac{\text{Quick Assets}}{\text{Quick Liabilities}}$

Quick Assets = Current Assets - Stock

Quick Liabilities = Current Liabilities - (BOD + PFT future)

$$\text{QA} = 40,000 - 12,000$$

$$= 28,000$$

$$\text{QL} = 28,000 - (4,000 + 4,000)$$

$$= 20,000$$

$$= \frac{28,000}{20,000}$$

$$= \mathbf{1.40:1}$$
- Debt-Equity Ratio = $\frac{\text{Long Term Debt (Liabilities)}}{\text{Shareholders Fund}}$

LTL = Debentures + Long term loans

SHF = Eq. Sh. Cap. + Reserves & Surplus + Preference Sh. Cap. - Fictitious Assets

$$\text{LTL} = 32,000$$

$$\text{SHF} = 40,000 + 8,000 + 12,000$$

$$= 60,000$$

$$= \frac{32,000}{60,000}$$

$$= \mathbf{0.53:1}$$

4. Proprietary Ratio = $\frac{\text{Shareholder's Funds}}{\text{Total Assets}}$

$$\text{SHF} = \text{Eq. Sh. Cap.} + \text{Reserves \& Surplus} + \text{Preference Sh. Cap.} - \text{Fictitious Assets}$$

$$\text{Total Assets} = \text{Total Assets} - \text{Fictitious Assets}$$

$$\text{SHF} = 40,000 + 8,000 + 12,000$$

$$= 60,000$$

$$\text{TA} = 1,20,000$$

$$= \frac{60,000}{1,20,000}$$

$$= 0.5:1$$

6) Cash Purchased ratio Rs.1,00,000 cost of goods sold Rs. 3,00,000 opening stock Rs.1,00,000 and closing stock Rs.2,00,000. Creditors turnover ratio 3 times. Calculate the opening and closing creditors if the creditors at the end were 3 times more than the creditors at the beginning.

Solution

$$\text{Total Purchase} = \text{Cost of goods sold} + \text{closing stock} - \text{opening stock}$$

$$= \text{Rs.}3,00,000 + 2,00,000 - \text{Rs.}1,00,000$$

$$= \text{Rs.}4,00,000$$

$$\text{Credit purchase} = \text{Total purchase} - \text{cash purchase}$$

$$= \text{Rs.}4,00,000 - 1,00,000$$

$$= \text{Rs.}3,00,000$$

$$\text{Creditor Turnover Ratio} = \frac{\text{Net Credit Purchase}}{\text{Average Creditor}}$$

$$\text{Average Creditor} = \frac{\text{Rs.}3,00,000}{3}$$

$$= \text{Rs.}1,00,000$$

$$(\text{Opening Creditor} + \text{Closing Creditor}) / 2 = \text{Rs.}1,00,000$$

$$\text{Opening Creditor} + \text{Closing Creditor} = \text{Rs.}2,00,000$$

$$(\text{Opening Creditor} + (\text{Opening Creditor} + 3 \text{ Opening Creditor}))$$

$$= \text{Rs.}2,00,000$$

$$\text{Opening Creditor} = \text{Rs.}40,000$$

$$\text{Closing Creditor} = \text{Rs.}40,000 + (3 \times \text{Rs.}40,000)$$

$$= \text{Rs.}1,60,000$$

7) Calculate Gross Profit ratio from the following information:

Opening stock Rs. 50,000; closing stock Rs.75,000; cash sale Rs.1,00,000; credits sales Rs.1,70,000; Returns outwards Rs.15,000; purchased Rs.2,90,000; advertisement expenses Rs.30,000; carriage inwards Rs.10,000

Solution :

$$\text{Cost of goods sold} = \text{Opening stock} + \text{net purchase} + \text{direct expenses} - \text{closing stock}$$

$$= \text{Rs.}50,000 + (\text{Rs.}2,90,000 - \text{Rs.}15,000) + \text{Rs.}10,000 - \text{Rs.}75,000$$

$$= \text{Rs.}2,60,000$$

$$\text{Total Sales} = \text{Cash Sales} + \text{Credits Sales}$$

$$= \text{Rs.}1,00,000 + \text{Rs.}1,70,000$$

$$= \text{Rs.}2,70,000$$

$$\begin{aligned}\text{Gross profit} &= \text{Total Sales} - \text{Cost of goods sold} \\ &= \text{Rs. } 2,70,000 - \text{Rs. } 2,60,000 \\ &= \text{Rs. } 10,000\end{aligned}$$

$$\begin{aligned}\text{Gross profit Ratio} &= \frac{10,000 \times 100}{2,70,000} \\ &= \mathbf{3.704\%}\end{aligned}$$

8) M/s. Vinay Ltd. Presents the following Trading and Profit & Loss A/c for the year ended 31.3.2014 and balance sheet as on that date.

Trading and Profit and Loss account for the year ended 31.3.2014

| Particulars | Amt | Particulars | Amt |
|----------------------|-----------|--------------------------------|-----------|
| To opening stock | 2,00,000 | By sales | 12,00,000 |
| To purchases | 5,00,000 | By closing Stock | 4,00,000 |
| To Wages | 3,00,000 | | |
| To Gross Profit c/d | 6,00,000 | | |
| | 16,00,000 | | 16,00,000 |
| To Salaries | 1,50,000 | By Gross Profit b/d | 6,00,000 |
| To Rent | 60,000 | By Profit on sale of Machinery | 5,000 |
| To Commission | 12,000 | By Interest | 15,000 |
| To Advertising | 20,000 | | |
| To Interest | 83,000 | | |
| Depreciation | 30,000 | | |
| To Provision for tax | 50,000 | | |
| To Net Profit c/d | 2,15,000 | | |
| | 6,20,000 | | 6,20,000 |
| To Proposed | 80,000 | By balance b/f | 1,85,000 |
| To Preference | 16,000 | By Net profit b/d | 2,15,000 |
| To Balance c/d | 3,04,000 | | |
| | 4,00,000 | | 4,00,000 |

Balance sheet as on 31.3.2014

| Liabilities | Amt | Assets | Amt |
|-------------------------------|----------|---------------------|----------|
| Equity share capital (Rs.100) | 8,00,000 | Land and Building | 6,00,000 |
| 8% Pref. Sh.Capital | 2,00,000 | Plant and Machinery | 5,50,000 |
| Reserve and surplus | 3,04,000 | Furniture | 4,00,000 |
| 7% Debentures | 5,00,000 | Investment | 2,70,000 |

| | | | |
|-------------------|-----------|-----------------------------|-----------|
| Loan from IDBI | 6,00,000 | Stock | 4,00,000 |
| Creditors | 1,50,000 | Debtors | 2,00,000 |
| Bills Payable | 50,000 | Bills receivable | 1,60,000 |
| Provision for tax | 50,000 | Advance tax | 30,000 |
| Dividend Payable | 96,000 | Prepaid expenses | 40,000 |
| | | Cash in Hand | 20,000 |
| | | Bank Balance | 60,000 |
| | | Dis. On issue of Debentures | 20,000 |
| | 27,50,000 | | 27,50,000 |

Additional information :

- 1) The Market Price of equally shares as on 31.03.2014 was Rs. 90.
 - 2) Out of total sales, 30% are cash sales and out of total Purchases, 50% are credit purchases. You are required to calculate the following Ratios:
 - a) Return on Capital employed
 - b) Price earning Ratio
 - c) Debt Service Ratio
 - d) Creditors Turnover Ratio
 - e) Return of equity capital
- 208000

Solution:

| | | | |
|----------------------------|---|--|-----------|
| Return on capital employed | $\frac{\text{NOPBIT}}{\text{Capital Employed}} \times 100$ | $\frac{3,28,000}{24,04,000} \times 100$ | 13.64% |
| | $\frac{\text{NOPBIT}}{\text{Capital Employed}}$ | $\frac{6,00,000 - 1,50,000 - 60,000 - 12,000 - 20,000 - 30,000}{8,00,000 + 2,00,000 + 3,04,000 + 5,00,000 + 6,00,000}$ | |
| Creditors Turnover Ratio | $\frac{\text{Credit Purchase}}{\text{Avg Creditors + Bills payable}}$ | $\frac{2,50,000}{2,00,000}$ | 1.25 Time |
| Price Earning Ratio | $\frac{\text{MPS}}{\text{EPS}}$ | $\frac{90}{24.88}$ | 3.62 |
| EPS | $\frac{\text{Net Profit - Pref. Div}}{\text{No. of Equity Shares}}$ | $\frac{2,15,000 - 16,000}{8,000}$ | 24.88 |
| Return on | $\frac{\text{NPAT - Pref. Div}}{\text{NPAT - Pref. Div}} \times 100$ | $\frac{2,15,000 - 16,000}{2,15,000 - 16,000} \times 100$ | 24.875% |

| | | | |
|--------------------|--|---|------------|
| Equity Capital | Eq.Sh Cap | 8,00,000 | |
| Debit Equity Ratio | $\frac{\text{NPBIT}}{\text{Interest}}$ | $\frac{2,15,000+50,000+83,000}{83,000}$ | 4.19 Times |

9) X Co. has made plans for the next year. It is estimated that the company will employ total assets of Rs.8,00,000; 50% of the assets being financed borrowed capital at an interest cost of 8% per year. The direct costs for the year are estimated at Rs. 4,80,000 and all the operating expenses are estimated at Rs.80,000. The goods will be sold to customers at 150% of the direct costs. Tax rate is assumed to be 50%.

You are required to CALCULATE; (i) Operating profit margin (before tax) (ii) net profit margin (after tax) (iii) return on assets (an operating profit after tax); (iv) asset turnover and (v) return on owner's equity.

Solution:

The net profit is calculated as follows:

| Particulars | Rs. |
|---------------------------------------|------------|
| Sales (150% of Rs.4,80,000) | 7,20,000 |
| Direct costs | (4,80,000) |
| Gross profit | 2,40,000 |
| Operating expenses | (80,000) |
| Profit before interest and Tax (EBIT) | 1,60,000 |
| Interest charges (8% of Rs. 4,00,000) | (32,000) |
| Profit before taxes | 1,28,000 |
| Taxes (@) 50% | (64,000) |
| Net profit after taxes | 64,000 |

$$(i) \text{ Operating profit margin} = \frac{\text{EBIT}}{\text{Sales}} = \frac{\text{Rs. } 1,60,000}{\text{Rs. } 7,20,000} = 0.2222 \text{ or } 22.22\%$$

$$(ii) \text{ Net profit margin} = \frac{\text{Net Profit after taxes}}{\text{Sales}} = \frac{\text{Rs. } 64,000}{\text{Rs. } 7,20,000} = 0.089 \text{ or } 8.9\%$$

$$(iii) \text{ Return on assets} = \frac{\text{EBIT (1-T)}}{\text{Assets}} = \frac{\text{Rs. } 1,60,000(1-0.5)}{8,00,000} = 0.10 \text{ or } 10\%$$

$$(iv) \text{ Asset turnover} = \frac{\text{Sales}}{\text{Assets}} = \frac{\text{Rs. } 7,20,000}{\text{Rs. } 8,00,000} = 0.90x$$

$$(v) \text{ Return on equity} = \frac{\text{Net Profit after taxes}}{\text{Owner's equity}} = \frac{\text{Rs. } 64,000}{50\% \text{ of Rs. } 8,00,000} \\ = \frac{\text{Rs. } 64,000}{\text{Rs. } 4,00,000} = 0.16 \text{ or } 16\%$$

10) From the following ratios and information given below, prepare Trading Account, Profit and Loss Account and Balance Sheet of Hibacus Company.

| | |
|-----------------------------------|---------------|
| Fixed Assets | Rs. 40,00,000 |
| Closing Stock | Rs. 4,00,000 |
| Stock turnover ratio | 10 |
| Gross profit ratio | 25% |
| Net profit ratio | 20% |
| Net profit to capital | 1/5 |
| Capital to total liabilities | 1/2 |
| Fixed assets to capital | 5/4 |
| Fixed assets/Total current assets | 5/7 |

Solution:

Workings:

$$i. \quad \frac{\text{Fixed assets}}{\text{Total current assets}} = \frac{5}{7}$$

$$\text{Or, Total current assets} = \frac{\text{Rs. } 40,00,000 \times 7}{5} = \text{Rs. } 56,00,000$$

$$ii. \quad \frac{\text{Fixed assets}}{\text{Capital}} = \frac{5}{4}$$

$$\text{Or, Capital} = \frac{\text{Rs. } 40,00,000 \times 4}{5} = \text{Rs. } 32,00,000$$

$$iii. \quad \frac{\text{Capital}}{\text{Total liabilities*}} = \frac{1}{2}$$

$$\text{Or, Total liabilities} = \text{Rs. } 32,00,000 \times 2 = \text{Rs. } 64,00,000$$

*It is assumed that total liabilities do not include capital.

$$iv. \quad \frac{\text{Net profit}}{\text{Capital}} = \frac{1}{5}$$

$$\text{Or, Net profit} = \text{Rs. } 32,00,000 \times \frac{1}{5} = \text{Rs. } 6,40,000$$

$$v. \quad \frac{\text{Net profit}}{\text{Sales}} = \frac{1}{5}$$

$$\text{Or, sales} = \text{Rs. } 6,40,000 \times 5 = \text{Rs. } 32,00,000$$

$$vi. \quad \text{Gross profit} = 25\% \text{ of Rs. } 32,00,000$$

$$vii. \quad \text{Stock Turnover} = \frac{\text{Cost of goods sold (i.e Sales - Gross profit)}}{\text{Average Stock}}$$

$$10 = \frac{\text{Rs. } 32,00,000 - \text{Rs. } 8,00,000}{\text{Average Stock}}$$

$$\text{Or, Average stock} = \text{Rs. } 2,40,000$$

$$\text{Or, } \frac{\text{opening stock} + \text{Rs. } 4,00,000}{2} = \text{Rs. } 2,40,000$$

$$\text{Or, Opening stock} = \text{Rs. } 80,000$$

Trading Account

| Particulars | Rs. | Particulars | Rs. |
|--------------------------------|-----------|------------------|-----------|
| To opening Stock | 80,000 | By Sales | 32,00,000 |
| To Manufacturing exp/purchases | 27,20,000 | | |
| To Gross profit b/d | 8,00,000 | By closing stock | 4,00,000 |
| | 36,00,000 | | 36,00,000 |

Profit and loss account

| Particulars | Rs. | Particulars | Rs. |
|--|----------|---------------------|----------|
| To opening expenses (Balancing figure) | 1,60,000 | By Gross profit c/d | 8,00,000 |
| To Net Profit | 6,40,000 | | |
| | 8,00,000 | | 8,00,000 |

Balance sheet

| Capital and liabilities | Rs. | Assets | Rs. |
|-------------------------|-----------|----------------------------------|-----------|
| Capital | 32,00,000 | Fixed assets | 40,00,000 |
| Liabilities | 64,00,000 | Current assets: | |
| | | Closing stock | 4,00,000 |
| | | Other current assets(bal figure) | 52,00,000 |
| | 96,00,000 | | 96,00,000 |

Theory Questions

- 1) Explain what is the ratio analysis?
- 2) What is the purpose of liquid ratio?
- 3) "Ratio analysis is the only tool and not a final decision." Discuss.
- 4) What are the limitations of ratio analysis?
- 5) Discuss the benefits of ratios.
- 6) How are the ratio classified from the point of view of users.
- 7) Write short notes on

- i. Quick ratio
- ii. Debtors turnover ratio
- iii. Earning per share
- iv. Return on equity

Practice Problems

1) From the following balance sheet and other information, calculate following ratios:

| Particulars | Rs. |
|--|-----------|
| 1) Equity and liabilities | |
| 1) Shareholder's fund | |
| (a)Share capital | 10,00,000 |
| (b)Reserves and surplus | 7,00,000 |
| (c)Money received against share warrants | 2,00,000 |
| 2) Non-current Liabilities | |
| Long term borrowings | 12,00,000 |
| 3) Current liabilities | |
| Trade payables | 5,00,000 |
| | 36,00,000 |
| 2) Assets | |
| 1) Non current assets | |
| Fixed assets | |
| -tangible assets | 18,00,000 |
| 2) Current assets | |
| (a)Inventories | 4,00,000 |
| (b)Trade receivable | 9,00,000 |
| (c)Cash and cash equivalents | 5,00,000 |
| Total | 36,00,000 |

- (i) Debt equity ratio
- (ii) Working capital turnover ratio
- (iii) Trade receivables turnover ratio

Balance sheet as a march 31, 2021

Additional information:Revenue from operation Rs. 18,00,000

(Ans. Debt-Equity Ratio 0.63:1, Working capital turnover ratio 1.38 times, trade receivables turnover ratio 2 times)

2) Cost of revenue from operations is Rs 1,50,000. Operating expenses are Rs.60,000. Revenue from operations is Rs2,50,000. Calculate operating ratio.

(Ans. Operating Ratio 84%)

3) From the following information calculate Gross profit ratio, inventory turnover ratio and trade receivable turnover ratio.

| | |
|---------------------------------|-------------|
| Revenue from operations | |
| Rs.3,00,000 | |
| Cost of revenue from operations | Rs.2,40,000 |
| Inventory at the end | |
| Rs.62,000 | |
| Gross profit | Rs.60,000 |
| Inventory in the beginning | Rs.58,000 |
| Trade receivables | Rs.32,000 |

(Ans: Gross profit ratio 20%, Inventory turnover ratio 4 times, Trade receivables turnover ratio 9.375 times.)

4) Compute working capital turnover ratio, debt equity ratio and proprietary ratio from the following information.

| | |
|-------------------------|-------------|
| Paid up share capital | |
| Rs.5,00,000 | |
| Current assets | |
| Rs.4,00,000 | |
| Revenue from operations | |
| Rs.10,00,000 | |
| 13% Debentures | Rs.2,00,000 |
| Current liabilities | Rs.2,80,000 |

(Ans: Working capital ratio 8.33 times, Debt –Equity ratio 0.4:1, and proprietary ratio 0.71:1)

5) Calculate Debt equity ratio from the following information:

| | |
|---------------------|--------------|
| Total assets | Rs.15,00,000 |
| Current liabilities | Rs.6,00,000 |
| Total debts | Rs.12,00,000 |

(Ans: Debt-Equity Ratio 2:1)

Multiple choice questions

1. Ratio of net sales to net working capital is a:

- Profitability ratio
- Liquidity ratio
- Current ratio
- Working capital turnover ratio

2. Long term solvency is indicated by
- (a) Debt-equity ratio
 - (b) Current ratio
 - (c) Operating ratio
 - (d) Net profit ratio
3. Ratio of net profit before interest and tax to sales is:
- (a) Gross profit ratio
 - (b) Net profit ratio
 - (c) Operating ratio
 - (d) Interest coverage ratio
4. Observing changes in the financial variables across the year is:
- (a) Vertical analysis
 - (b) Horizontal analysis
 - (c) Peer-firm analysis
 - (d) Industry analysis
5. The Receivables-turnover ratio helps management to:
- (a) Managing resources
 - (b) Managing inventory
 - (c) Managing customer relationship
 - (d) Managing working capital
6. Which of the following is liquidity ratio?
- (a) Equity ratio
 - (b) Proprietary ratio
 - (c) Net working capital
 - (d) Capital gearing ratio
7. Which of the following is not a part of Quick assets?
- (a) Disposable investments
 - (b) Receivables
 - (c) Cash and cash equivalents
 - (d) Prepaid expenses
8. Capital gearing ratio is the fraction of:
- (a) Preference share capital and debentures to equity share capital and reserves and surplus
 - (b) Equity share capital and reserves and surplus to preference share capital and debentures
 - (c) Equity share capital to total assets
 - (d) Total assets to equity share capital

9. From the following information calculate P/E ratio:

Equity share capital of Rs.10 each
Rs.8,00,000

9% Preference share capital of Rs. 10 each
Rs.3,00,000

Profit (after 35% tax)
Rs.2,67,000

Depreciation
Rs.67,000

Market price of equity share Rs.48

- (a)15 times
- (b)16 times
- (c)17 times
- (d)18 times

10. A company has average accounts receivable of Rs.10,00,000 and annual credit sales of Rs.60,00,000. Its average collection period would be:

- (a) 60.83 days
- (b) 6.00 days
- (c) 1.67 days
- (d) 0.67 days

(Ans: 1 (d) 2(a) 3(c) 4(b) 5(d) 6(c) 7(d) 8(a) 9(b) 10(a))

SOURCES OF FINANCING

Unit Structure

- 5.0 Objectives
- 5.1 Meaning of Finance
- 5.2 Need for Finance
- 5.2 Sources of Finance
- 5.3 Exercises

5.0 OBJECTIVES

After studying this unit you will understand:

- Meaning of finance
- Need and Importance of Finance
- Sources of long term finance
- Sources of short term finance

5.1 MEANING OF FINANCE

Finance is a broad term that describes activities associated with banking, leverage or debt, credit, capital markets, money, and investments. Basically, finance represents money management and the process of acquiring needed funds. Finance also encompasses the oversight, creation, and study of money, banking, credit, investments, assets, and liabilities that make up financial systems. It is necessary to raise finance from various sources for implementation of the project. The schemes of finance will be determined after consideration of various aspects attached to different sources of finance as following:

- a) Share capital – preference shares and equity shares
- b) Debentures
- c) Term loan from financial institutions
- d) Unsecured loan-banks, promoters, others.

5.1.1 Promoters Contribution

The persons who are involved in implementation of a project are known as promoters. An entrepreneur who promotes the project is also required to participate in the scheme of finance of the project. The extent of

promoter's contribution in the project is a sign of interest of the promoters in the project. Promoter's contribution indicates the extent of their involvement in the project. The promoter's contribution can be provided in the form of subscribing to equity and preference shares issued by the company, unsecured loans, seed capital assistance and internal accrual of funds. The bank and financial institution normally participate in the scheme of project finance and they ask the promoters to bring in a certain portion of funds required which is normally between 25% to 50% of the cost of the project into the equity share capital of the company. The promoter's contribution can be arranged from outside sources like friends and relatives. For eligibility of the project financing the financial institution may stipulate minimum promoter's contribution which is to be arranged by the promoters.

5.1.2 Margin money

The banks and financial institutions maintain a margin while financing the project cost. They asked the borrowers to bring a certain amount of the cost of the project as margin money to safeguard from the changes in the value of assets that are being financed and provided as a security. The quantum of margin money to depend upon the creditworthiness of the borrower and nature of security provided to the institution. Margin money is one of the important factors which are evaluated by the financial institutions while considering the project for financial assistance. The margin money required for working capital will be provided in the project cost. The RBI guidelines provide the amount of capital brought by the promoters in project financing.

5.1.3 Capital Structure

Capital structure refers to the mix of a firm's capitalization and includes long-term source of fund such as debentures, preference shares, equity share, and retained earnings. The decision regarding the forms of financing their requirements and their relative proportions in total capitalization are known as capital structure decision. A firm has the choice to raise capital for financing its project from different sources in different proportions as follows:

- (a) exclusive use of equity capital
- (b) Use of equity and preference capital
- (c) Use of equity and debt capital
- (d) Use of equity, preference and debt capital
- (e) Use of a combination of debt, equity and preference capital in different proportions.

The choice of combination of these sources is called capital structure mix. Sources of Financing

5.1.4 Optimum Capital Structure:

The theory of optimal capital structure deals with the issue of right mix of debt and equity in the long term capital structure of a firm. This theory states that if a company takes on debt the value of the firm increases up to a point, beyond that point if debt continues to increase then the value of the firm will start to decrease. If the company is unable to repay the debt within the specified period, then it will affect the goodwill of the company in the market. Therefore, the company should select its appropriate capital structure with due consideration to the factors of debt and equity.

5.1.5 Trading on Equity

The term 'trading on equity' is derived from the fact that debts are contracted and loans are raised mainly on the basis of equity capital. The concept of trading on equity provides that the capital structure of a company should include equity as well as debt. Again the proportion of debt in the capital structure should also be optimal. Those who provide debt have a limited share in the firm's earnings and hence want to be protected in terms of earnings and values represented by equity capital. Since fixed charges do not vary with the firm's earnings before interest and tax, a magnified effect is produced on earnings per share. The determination of optimal level of debt is a formidable task and is a major policy decision. EBIT-EPS analysis is a widely used tool to determine the level of debt in a firm.

5.2 NEEDS AND IMPORTANCE OF FINANCE

What is the main purpose of business finance? or Why is finance so important?

1. Establishment of Business Enterprises:

The promotion of any establishment or any type of enterprise basically requires finance.

Finance is required at every stage of the business establishment like

- a. During registration of the company,
- b. At the incorporation stage,
- c. For obtaining the certificate for starting the business and
- d. also for obtaining various permissions

Besides, expenditure on these requirements, finance is required for arranging the Assets such as working place, plant and machinery, and furniture and equipment, for short term items like working material, furnishing and salaries of the employees.

Thus, finance is required to complete the initial activities of the business enterprise.

2. Proficient Operation of Business

Operations of business cannot be efficiently operated without finance. The activities such as purchase of raw materials, sending of products to the consumers, conversion of raw materials into finished product and sale cannot be done without efficient finance.

3. Development and Expansion of Business

Finances are required for the overall development and extension of all business activities in compatibility with advance technology. With finances, various commodities can be upgraded with the purchases or sold or produced. Besides, finance (capital) is also required for the purchasing of techniques, machinery, and equipment, the establishment of Laboratories, etc.

4. Sound Business Position

Finance is an important measure by which the position of a business is measured i.e. whether it is strong or weak, Few examples of business transactions like payments to the suppliers, remuneration and facilities to the Employees and payment of principal amount and interest can be paid to the lender within due date only when sufficient funds are available.

5. Surviving in the Competition Era

One of the biggest threats to any business units are their competitors. Performing with an aim to meet the expectations of the customers and having edge over the competitors requires finance. To gain such edge one organisation has to look in many aspects. So there should be proper policies and allocation of required funds towards relating advertisement and publicity, production and distribution of commodities and services, incentives to the consumers, sale promotion, providing services and commodities at a fair price are required, to face present-day competitors.

6. Infrastructural Facilities:

Finance is also required for arranging infrastructural facilities which are essential for any business entrepreneurship. The volume of finance required depends upon the nature of the business organisation i.e. Proprietary business, may be high or low, according to the coverage of various Enterprises. Substantial capital is required for all infrastructural facilities, place, land, office site, plant installation for the establishment of industries, place for conversion of raw materials into finished products, water, electricity, telephone, etc.

7. Modernization of Business

In this era there dynamism and ever changing technologies, there is always need for upgradation. Finances are required for technical know-how,

research and development, new techniques, new machinery, various new products, and computerization, which are essential for the upgradation, modernization and operation of the business. Sources of Financing

8. Labour Welfare and Social Security

For the success of any business or enterprise, human relations between employers and workers should be cordial. In order to ensure the same, entrepreneurs should essentially safeguard the interests of the employees and workers. Employer should proper facilities like – that of housing, primary treatment, health, education, libraries, and reading rooms, travel, etc. In addition, they are also to be provided provident fund, gratuity, pension, old age, personal or group insurance and accidental insurance, etc. All these need a substantial volume of finance.

5.3 SOURCES OF FINANCE

The sources from which a business meets its financial requirements can be classified on the basis of time, ownership and source of generation as explained in Figure 5.1.

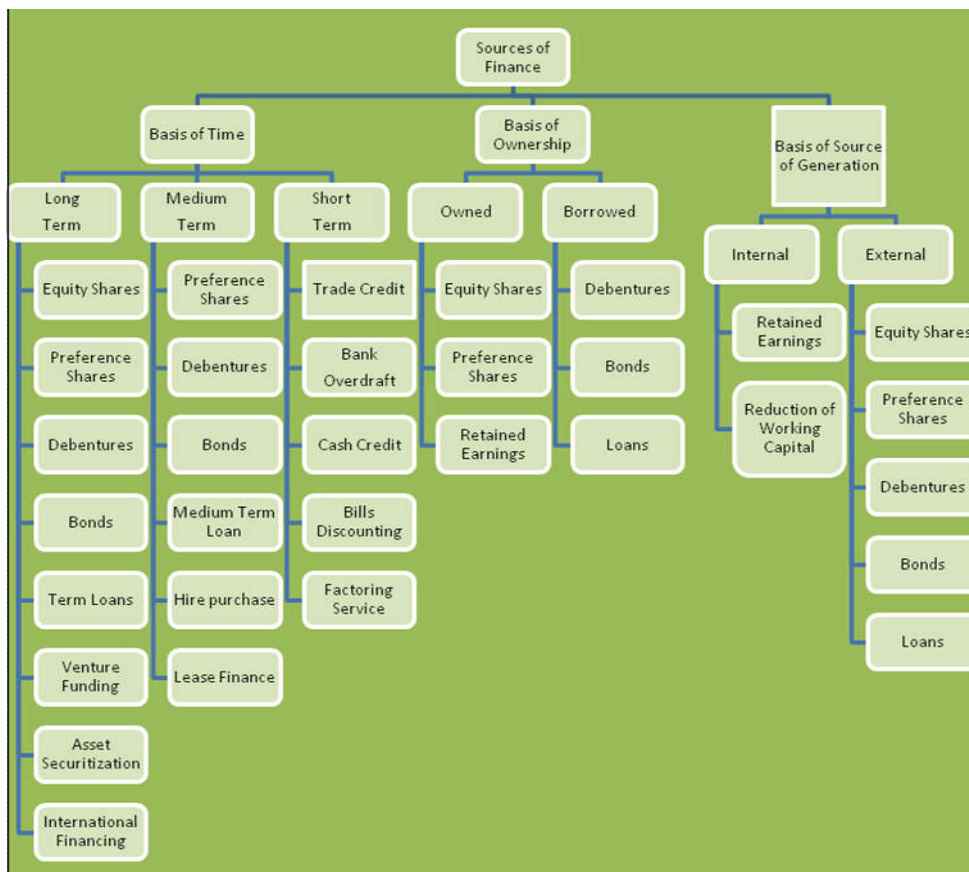

Figure1

5.3.1 Long Term Sources of Finance

Long-term financing means capital requirements for a period of more than 5 years to 10, 15 or 20 years or maybe more depending on other factors.

Capital expenditures in fixed assets like plant and machinery, land and building etc. of a business are funded using long-term sources of finance. Part of working capital which permanently stays with the business is also financed with long-term sources of finance. Long term financing sources can be in form of any of them:

- (a) Equity Shares.
- (b) Preference Shares.
- (c) Debentures
- (d) Bonds.
- (e) Term Loans.
- (f) Venture Funding
- (g) Assets Securitization
- (h) International Financing

(a) Equity Shares

Equity share is a main source of finance for any company giving investors rights to vote, share profits and claim on assets. We call it stock, ordinary share, or shares, all are one and the same. Normally, a company is started with equity finance as its first source of capital from the owners or promoters of that company. The company then finds an investor in the form of friends, relatives, venture capitalists, mutual funds, or any such small group of investors and issue fresh equity shares to these investors. A point comes where the company reaches a very big level and requires huge capital investment for business growth. It then offers its equity share to the general public. This is called Initial Public Offer (IPO). More such issues in future are called Follow-on Public Offer (FPO).

They are categorized under long-term sources of finance because legally they are irredeemable in nature. For an investor, these shares are certificate of ownership in the company by virtue of which investors are entitled to share the net profits and have a residual claim over the assets of the company in the event of liquidation. Investors have voting rights in the company and their liability to the company is limited to the amount of investment.

Types of Equity Shares

There are various types of equity shares classified based on various things:

- i Authorized Share Capital: It is the maximum amount of capital which can be issued by a company. It can be increased from time to time. Some fee is required to be paid to legal bodies accompanied with some formalities.

- ii Issued Share Capital: It is that part of authorized capital which is Sources of Financing offered to investors.
- iii Subscribed Share Capital: It is that part of Issued capital which is accepted and agreed by the investor.
- iv Paid Up Capital: It is the part of subscribed capital, the amount of which is paid by the investor.

Normally, all companies accept complete money in one shot and therefore issued, subscribed and paid capital becomes one and the same. Conceptually, paid up capital is the amount of money which is actually invested in the business.

There are other types of equity shares discussed below:

- i Rights Share: These are the shares issued to the existing shareholders of a company. Such kind of shares is issued to protect the ownership rights of the investors.
- ii Bonus Share: These are the type of shares given by the company to its shareholders as a dividend. There are various advantages and disadvantages of bonus shares like dividend, capital gain, limited liability, high risk, fluctuation in the market, etc.
- iii Sweat Equity Share: These shares are issued to an exceptional employees or directors of the company for their exceptional job in terms of providing know-how or intellectual property rights to the company.

Various Prices of Equity Shares

- i Par or Face Value: It is the value of a share of which it is accounted in books of accounts.
- ii Issue Price: It is the price at which the equity share is actually offered to the investor. Normally, the issue price and face value of a share are same in the case of new companies.
- iii Share Premium and Share at Discount: When a share is issued at a price higher than face value, the excess amount is called premium. Contrary to it, if the share is issued at a price lower than face value, it is said to be issued at a discount.
- iv Book Value: It is the ratio of the total of paid-up capital and reserves and surplus divided by total no. of shares. This is the balance sheet value of shares.
- v Market Value: In the case of companies listed on stock exchanges, the market value of the share is the price at which they are sold currently sold in the market.

Investing and Financing Angle of Equity Shares

When talking about equity shares, there are two angles. One is an investor's angle wherein the investor invests in equity shares and second financing angle where a company accepts the finance in the form of equity. There are pros and cons of both of these as described below.

ADVANTAGES

- i Dividend: An investor is entitled to receive a dividend from the company. It is one of the two main sources of return on his investment.
- ii Capital Gain: The other source of return on investment apart from dividend is the capital gains. Gains which arise due to rise in market price of the share.
- iii Limited liability: Liability of shareholder or investor is limited to the extent of the investment made. If the company goes into losses, the share of loss over and above the capital investment would not be borne by the investor.
- iv Exercise control: By investing in the company, the shareholder gets ownership in the company and thereby he can exercise control.
- v Claim over Assets and Income: An investor of equity share is the owner of the company and so is the owner of the assets of that company. He also enjoys a share of the incomes of the company.
- vi Rights Shares: Whenever companies require further capital for expansion, growth, entering into new areas etc., they tend to issue 'rights shares'. By issuing such shares, ownership and control of existing shareholders are preserved and the investor receives investment priority over other general investors.
- vii Bonus Shares: At times, companies decide to issue bonus shares to its shareholders. It is also a type of dividend. Bonus shares are free shares given to existing shareholders and many times they are given in lieu of dividends.
- viii Liquidity: The shares of the company which is listed on stock exchanges have the benefit of any time liquidity. The shares can very easily transfer ownership.
- ix Stock Split: Stock split means splitting a share into parts. How should an investor be benefited by this? By splitting of share, the per-share price reduces in the market which eventually increases the readability of share. At the end, stock split results in higher volumes with a number of investors leading to high liquidity of the share.

- i Dividend: The dividend which a shareholder receives is neither fixed nor controllable by him. The management of the company decides how much dividend should be given.
- ii High Risk: Equity share investment is a risky share compared to any other investment like debts etc. The money is invested based on the faith an investor has in the company. There is no collateral security attached with it.
- iii Fluctuation in Market Price: The market price of any equity share has a wide variation. It is always very difficult to book profits from the market. On the contrary, there are equal chances of losses.
- iv Limited Control: An equity investor is a small investor in the company, therefore, it is hardly possible to impact the decision of the company using the voting rights.
- v Residual Claim: An equity shareholder has a residual claim over both the assets and the income. Income which is available to equity shareholders is after the payment of all other stakeholders' viz. debenture holders etc.

(b) Preference shares:

Preference Shares: Preference shares are one of the special types of share capital having fixed rate of dividend and they carry preferential rights over ordinary equity shares in sharing of profits and also claims over assets of the firm. Preference shares are long-term source of finance for a company. They are neither completely similar to equity nor equivalent to debt. The law treats them as shares but they have elements of both equity shares and debt. For this reason, they are also called 'hybrid financing instruments'

. Features of Preference Shares Similar to Debt

- i Fixed Dividends: Like debt carries a fixed interest rate, preference shares have fixed dividends attached to them. But the obligation of paying a dividend is not as rigid as debt. Non-payment of a dividend would not amount to bankruptcy in case of preference share.
- ii Preference over Equity: As the word preference suggests, these type of shares get preference over equity shares in sharing the income as well as claims on assets. Alternatively, preference share dividend has to be paid before any dividend payment to ordinary equity shares. Similarly, at the time of liquidation also, these shares would be paid before equity shares.
- iii No Voting Rights: Preference shares holders normally does not have any voting rights. They are similar to debenture holders and do not have any say in the management of the company.
- iv No Share in Earnings: Preference shareholders can only claim two

things. One agreed on percentage of dividend and second the amount of capital invested. Equity shares are entitled to share the residual earnings and residual assets in case of liquidation which preference shares are not entitled.

- v Fixed Maturity: Just like debt, preference shares also have fixed maturity date. On the date of maturity, the preference capital will have to be repaid to the preference shareholders. A special type of shares i.e. irredeemable preference shares is an exception to this. They do not have any fixed maturity.

Features of Preference Shares similar to Equity Shares:

- i Dividend from PAT: Equity share dividend is paid out of the profits left after all expenses and even taxes and same is the case with preference shares. The preference dividend is paid out of the divisible profits of the company. Out of the divisible profits, the preference dividend would be paid first and the remaining profits can be utilized for paying any dividend to equity shareholders.
- ii Management Discretion over Dividend Payment: The payment of preference dividend is not compulsory and is a decision of the management. Equity shareholders also do not have any right to ask for dividends, the dividends are paid at the discretion of the management of the company. Unlike debt, the nonpayment of a dividend of preference shares does not amount to bankruptcy.
- iii No Fixed Maturity: The maturity of a special variant of preference share is not fixed just like equity shares. This variant is popularly known as irredeemable preference shares.

Types of Preference Shares

There are various Types of Preference Shares with differences in their structure. Some of these are cumulative, non-cumulative, participating, non-participating, redeemable, irredeemable, convertible, non-convertible, callable, adjustable rate preference shares.

- i Convertible and Non-Convertible Preference Shares

Convertible preference shareholders possess an option or right whereby they can be converted into an ordinary equity share at some agreed terms and conditions. Non-convertible simply does not have this option but has all other normal characteristics of a preference share.

- ii Redeemable and Irredeemable Preference Shares

Redeemable preference share is very commonly seen preference share which has a maturity date on which date the company will repay the capital amount to the preference shareholders and discontinue the dividend payment thereon. Irredeemable preference shares are little different from other types of preference shares. It does not have any maturity date. However after introduction of Companies Act, 2013, no irredeemable

preference shares can be issued and even the existing irredeemable preference shares have to be redeemed. Sources of Financing

iii Cumulative and Non-Cumulative Preference Shares

If the shares are cumulative preference shares, the dividends are cumulated and therefore paid when the company makes the profit. In short, a dividend of cumulative preference shares will have to be paid as long as the company earns the profit in any year. Whereas, for non-cumulative preference shares, a company can skip the dividend in the year, the company has incurred losses.

iv Preference Shares with Callable Options

These are another innovative preference shares in which the company has an option to buy the share at a predetermined price and on or before a certain date.

v Adjustable Rate Preference Shares

These are some of the innovative types of instruments where the rate of dividend is not fixed and is formulated based on some calculations relating to the current interest rates etc.

BENEFITS OF PREFERENCE SHARE

There are several benefits of a preference share from the point of view of a company which is discussed below:

- i No Legal Obligation for Dividend Payment: There is no legal compulsion for payment of preference dividend. This dividend is not a fixed liability like the interest on the debt which has to be paid in all circumstances.
- ii Improves Borrowing Capacity: Preference shares become a part of net worth and therefore reduces debt to equity ratio. This is how the overall borrowing capacity of the company increases.
- iii No dilution in control: Issue of preference share does not lead to dilution in control of existing equity shareholders because the voting rights are not attached to the issue of preference share capital. The preference shareholders invest their capital with fixed dividend percentage but they do not get control rights with them.
- iv No Charge on Assets: While taking a term loan security needs to be given to the financial institution in the form of primary security and collateral security. There are no such requirements and therefore, the company gets the required money and the assets also remain free of any kind of charge on them.

DISADVANTAGES OF PREFERENCE SHARES

- i Costly Source of Finance: Preference shares are considered a very costly source of finance which is apparently seen when they are

compared with debt as a source of finance. The interest on the debt is a tax-deductible expense whereas the dividend of preference shares is paid out of the divisible profits of the company i.e. profit after taxes and all other expenses.

- ii Skipping Dividend Disregard Market Image: Skipping of dividend payment may not harm the company legally but it would always create a dent on the image of the company.
- iii Preference in Claims: Preference shareholders enjoy a similar situation like that of an equity shareholder but still gets a preference in both payment of their fixed dividend and claim on assets at the time of liquidation.

(c) Debentures:

A debenture is a debt instrument used by the companies to raise money for medium to long term at a specified rate of interest. It consists of a written contract specifying the repayment of the principal and the interest payment at the fixed rate. Generally, a debenture is not secured by any collateral and is only backed by the reputation of the issuer.

FEATURES / ATTRIBUTES OF DEBENTURES:

Trust Indenture

It is an agreement which has to be entered into by the 'Issuing Company' and the 'Trust' which is involved in taking care of the interest of the general investors. Normally the trustee is a bank or a financial institution who is appointed by a debenture trust deed.

Coupon Rate

It is the rate of interest which is promised by the company to pay to the debenture holder on a regular interval which may vary from case to case. The rate of interest may be fixed or floating.

Tax Benefit

Most important element from the company point of view is that the interest paid is a tax deductible expense. Effectively, the company will get the tax benefit because the taxable income will be reduced by the extent of interest paid. Due to this, the effective cost of borrowing gets reduced.

Date of Maturity

For all the debentures, the issuing company has to issue repayment to the debenture holders on the date of maturity. This date is also mentioned on the certificates

Security

Here, we should classify debentures into two – secured debentures and unsecured debentures. Secured debentures are secured by some or other

immovable assets of the company whereas the unsecured assets are issued based on the general credit of the company. The general legal preference of debt is available to all types of debentures i.e. in the event of liquidation debenture will stand prior to preference shares and ordinary equity shares. Sources of Financing

Convertibility

Certain types of debentures are issued with the option of conversion into equity. The ratio of conversion and the time period after which conversion will take place is mentioned in the agreement of debenture. Debentures may be fully or partly convertible in nature.

Credit Rating

Normally, an investor would not go and check the credibility and the risk involved with the debentures. Credit rating agencies are given this task and they rate the debentures and the overall company. Involving a rating agency is compulsory for the issuing company normally in every country.

A debenture is the primary source of long-term capital for companies to fulfill their financial requirements. Other instruments to raise long term capital are bank loans, bonds, and equity shares. Though all these instruments are used widely in different combinations, they differ from each other in many ways. The article clarifies how debenture is different from the bank loan, equity shares, and bonds respectively.

Types of Debentures:

There are various types of debentures like redeemable, irredeemable, perpetual, convertible, non-convertible, fully, partly, secured, mortgage, unsecured, naked, first mortgaged, second mortgaged, the bearer, fixed, floating rate, coupon rate, zero coupon, secured premium notes, callable, puttable, etc.

Redeemable and Irredeemable (Perpetual) Debentures:

Redeemable debentures carry a specific date of redemption on the certificate. The company is legally bound to repay the principal amount to the debenture holders on that date. On the other hand, irredeemable debentures, also known as perpetual debentures, do not carry any date of redemption. However after introduction of Companies Act, 2013, no irredeemable debentures can be issued and even the existing irredeemable debentures have to be redeemed.

Convertible and Non-Convertible Debentures

Convertible debenture holders have an option of converting their holdings into equity shares. The rate of conversion and the period after which the conversion will take effect are declared in the terms and conditions of the agreement of debentures at the time of issue. On the contrary, non-convertible debentures are simple debentures with no such option of getting converted into equity. Their state will always remain of a debt and will not become equity at any point of time.

Fully and Partly Convertible Debentures

Convertible Debentures are further classified into two – Fully and Partly Convertible. Fully convertible debentures are completely converted into equity whereas the partly convertible debentures have two parts. Convertible part is converted into equity as per agreed rate of exchange based on an agreement. Non-convertible part becomes as good as redeemable debenture which is repaid after the expiry of the agreed period.

Secured (Mortgage) and Unsecured (Naked) Debentures

Debentures are secured in two ways. One when the debenture is secured by the charge on some asset or set of assets which is known as secured or mortgage debenture and another when it is issued solely on the credibility of the issuer is known as the naked or unsecured debenture. A trustee is appointed for holding the secured asset which is quite obvious as the title cannot be assigned to each and every debenture holder.

Registered Unregistered Debentures (Bearer) Debenture

In the case of registered debentures, the name, address, and other holding details are registered with the issuing company and whenever such debenture is transferred by the holder; it has to be informed to the issuing company for updating in its records. Otherwise, the interest and principal will go the previous holder because the company will pay to the one who is registered. Whereas, the unregistered commonly known as bearer debenture. can be transferred by mere delivery to the new holder. They are considered as good as currency notes due to their easy transferability. The interest and principal are paid to the person who produces the coupons, which are attached to the debenture certificate. and the certificate respectively.

Fixed and Floating Rate Debentures

Fixed rate debentures have fixed interest rate over the life of the debentures. Contrarily, the floating rate debentures have the floating rate of interest which is dependent on some benchmark rate say LIBOR etc.

Secured Premium Notes / Debentures

These are secured debentures which are redeemed at a premium over the face value of the debentures. They are similar to zero coupon bonds. The only difference is that the discount and premium. Zero coupon bonds are issued at the discount and redeemed at par whereas the secured premium notes are issued at par and redeemed at the premium.

Callable and Puttable Debentures / Bond:

Callable debentures have an option for the company to buyback and repay to the investors whereas, in the case of puttable debentures, the option lies with the investors. Puttable debenture holders can ask the company to redeem their debenture and ask for principal repayment.

(d) Bonds:

Bond is a financial instrument whereby the issuer of the bond raises (borrows) capital or funds at a certain cost for certain time period and pays back the principal amount on maturity of the bond. Interest paid on bonds is usually referred to as coupon. In simple words, a bond is a loan taken at a certain rate of interest for a definite time period and repaid on maturity.

From a company's point of view, the bond or debenture falls under the liabilities section of the balance sheet under the heading of Debt. A bond is similar to the loan in many aspects however it differs mainly with respect to its tradability. A bond is usually tradable and can change many hands before it matures; while a loan usually is not traded or transferred freely.

Common features of bonds and the financial terms related to bonds.

1. Issuer: The entities that borrow money by issuing bonds are called as issuers.
2. Face Value: Every bond that is issued has a face value; which is usually the principal amount that is borrowed and returned on maturity. In layman's term, it is the value of the bond on its maturity.
3. Coupon: The rate of interest paid on the bond is called as a coupon.
5. Rating: Every bond is usually rated by credit rating agencies; higher the credit rating lower will be the coupon required to pay by the issuer and vice versa.
5. Coupon Payment Frequency: The coupon payments on the bond usually have a payment frequency. The coupons are usually paid annually or semi-annually; however, they may be paid quarterly or monthly as well.
6. Yield: The effective return that the investor makes on the bond is called as a return. Assuming a bond was issued for a face value of ₹ 1000 and a coupon rate of 10% on initiation. The Price at a later date may rise or fall and hence the investor who invests at a rate other than ₹ 1000 will still receive a coupon payment of ₹100 ($1000 * 10\%$) but the effective earning shall be different since investment amount is not ₹ 1000. That effective return in layman's term is called as the yield. If the holding period is considered for a year this is referred to as current yield and if it is held to maturity it is referred to as yield to maturity (YTM).

DIFFERENT TYPES OF BONDS**Plain Vanilla Bonds**

A plain vanilla bond is a bond without any unusual features; it is one of the simplest forms of bond with a fixed coupon and a defined maturity and is usually issued and redeemed at the face value. It is also known as a straight bond or a bullet bond.

Zero Coupon Bonds

A zero coupon bond is a type of bond where there are no coupon payments made. It is not that there is no yield; the zero coupon bonds are issued at a price lower than the face value (say ₹ 950) and then pay the face value on maturity (₹ 1000). The difference will be the yield for the investor. These are also called as discount bonds or deep discount bonds if they are for longer tenor.

Deferred Coupon Bonds

This type of bond is a blend of a coupon-bearing bond and a zero coupon bond. These bonds do not pay any coupon in the initial years and thereafter pay a higher coupon to compensate for no coupon in the initial years. Such bonds are issued by corporates whose business model has a gestation period before the actual revenues start. Examples of a company which may issue such type of bonds include construction companies.

Convertible Bonds

Convertible bonds are a special variety of bonds which have an inbuilt feature of being converted to equity shares at a specified time at a pre-set conversion price.

Foreign currency convertible Bonds

Foreign currency convertible bond is a special type of bond issued in the currency other than the home currency. In other words, companies issue foreign currency convertible bonds to raise money in foreign currency.

Difference between Debentures & Bonds

Debenture and bond are used often as interchangeable terms. However, there are subtle and noteworthy differences between the two instruments:

- **Security:** A bond is a more secure instrument than a debenture. A debenture does not have any collateral backing; whereas a bond will always have collateral attached.
- **Rate of Interest:** Debenture holders are entitled to a higher rate of interest in comparison to bond holders. The reason is that debenture is an unsecured loan and therefore, is riskier than a bond.
- **Liability:** In a case of a bankruptcy, the company is liable to pay bondholders on priority, whereas debenture holders are paid later.
- **Periodical Payments:** Debenture holders are paid periodical interest on their loan and the principal is paid back at the completion of the entire term. Bondholders, on the other hand, are not paid any periodical payments. They receive the accrued interest and the principal upon the term completion at one go.

(e) Term Loan:

A term loan provides borrowers with a lump sum of cash upfront in exchange for specific borrowing terms. Term loans are normally meant for established small businesses with sound financial statements. In exchange for a specified amount of cash, the borrower agrees to a certain repayment schedule with a fixed or floating interest rate. Term loans may require substantial down payments to reduce the payment amounts and the total cost of the loan.

Types of Term Loans

Term loans come in several varieties, usually reflecting the lifespan of the loan. These include:

Short-term loans: These loans are generally for a period of less than a 12 months.

Intermediate-term loans: These loans are generally for a period of one to three years.

Long-term loans: These loans last anywhere above three to twenty five years.

(f) Venture Funding:

Venture funding is a funding process in which the venture funding companies manage the funds of the investors who want to invest in new businesses which have the potential for high growth in future. The venture capital funding firms provide the funds to start ups in exchange for the equity stake. Such a startup is generally one that possesses the ability to generate high returns. However, the risk for venture capitalists is high.

There are five stages of venture funding. They are as follows:

Stage 1: Seed Capital

Stage 2: Startup Capital

Stage 3: Early Stage / Second Stage Capital

Stage 4: Expansion Stage

Stage 5: Bridge / Pre IPO Stage

Stage 1: Seed Capital

In this first stage of venture funding, the venture or the startup company in need of the funds contacts the venture capital firm or the investor. The venture firm shall share its idea of business with the investors and convince them to invest in the project. The investor or venture capital firm shall then conduct research on the business idea and analyze its future potential. If the expected returns in future are good, the investor (Venture capitalist) shall invest in the business.

Stage 2: Startup Capital

Startup capital is the second stage of venture funding. If the venture is able to attract the investor, the idea of the business of the venture is brought into reality. A prototype product is developed and fully tested to know the actual potential of the product. Generally, a person from the venture capital firm takes a seat in the management of the business to monitor the operations regularly and keep a check that every activity is done as per the framed plan. If the idea of business meets the requirement of the investor and has sufficient market in the trail run, the investor agrees to participate in the future course of the business.

Stage 3: Early Stage / Second Stage Capital

After the startup capital stage comes the early/first/second stage capital. In this stage, the investor significantly increases the capital invested in the venture business. The capital increase is mainly towards increasing the production of goods, marketing or other expansion say building a network etc. The company with higher capital inflow moves towards profitability as it is able to reach a wide range of customers.

Stage 4: Expansion Stage

This is the fourth stage of venture funding. In this stage, the company expands its business by way of diversification and differentiation of its products. This is possible only if the company is earning good profits and revenue. To reach up to this stage the company needs to be operational for at least 2 to 3 years. The expansion gives the venture new wings to enter into untapped markets.

Stage 5: Bridge / Pre IPO Stage

This is the last stage of venture funding. When the company has developed substantial share in the market with its products, the company may opt for going public. One main reason for going public is that the investors can exit out of the company after earning profits for the risks they have taken all the years. The company mainly uses the amount received by way of IPO for various purposes like merger, elimination of competitors, research and development, etc.

(g) American Depository Receipt

American Depository Receipt represents the shares of a foreign company issued by U.S bank which can be traded in U.S. equity markets.

Meaning of American Depository Receipt

American Depository Receipt (ADR) is a certified negotiable instrument issued by an American bank suggesting the number of shares of a foreign company that can be traded in U.S. financial markets. American Depository Receipts provide US investors with an opportunity to trade in shares of a foreign company.

The domestic company, already listed in its local stock exchange, sells its shares in bulk to a U.S. bank to get itself listed on U.S. exchange.

The U.S. bank accepts the shares of the issuing company. The bank keeps the shares in its security and issues certificates (ADRs) to the interested investors through the exchange.

Investors set the price of the ADRs through bidding process in U.S. dollars. The buying and selling in ADR shares by the investors is possible only after the major U.S. stock exchange lists the bank certificates for trading.

The U.S. stock exchange is regulated by Securities Exchange Commission, which keeps a check on necessary compliances that need to be complied by the foreign company.

Advantages of American Depository Receipt

The American investor can invest in foreign companies which can fetch him higher returns.

The companies located in foreign countries can get registered on American Stock Exchange and have its shares trades in two different countries.

The benefit of currency fluctuation can be availed.

It is an easier way to invest in foreign companies as there are no restrictions to invest in ADR.

ADR simplifies tax calculations. Trading in shares of foreign company in ADR would lead to tax under US jurisdiction and not in the home country of company.

The pricing of shares of foreign companies in ADR is generally cheaper. Hence it provides additional benefit to investors.

Disadvantages of American Depository Receipt

Even though the transactions in ADR take place in US dollars, still they are exposed to the risk associated with foreign exchange fluctuation.

The number of options to invest in foreign companies is limited. Only few companies feel the necessity to register themselves through ADR. This limits the choice available to US investor to invest.

The investment in companies opting for ADR often becomes illiquid as investor needs to hold the shares for long term to generate good returns.

The charges for entire process of ADR are mostly transferred on investors by the foreign companies.

Any violation of compliance can lead to strict action by Securities Exchange Commission.

Conclusion:

ADRs provide the US investors with ability to trade in foreign companies shares. ADR makes it easier and convenient for the domestic investors in US to trade in foreign companies shares. ADR provides the investors an opportunity to diversify their portfolio by investing in companies which are not located in America. This eventually leads to investors investing in companies located in emerging markets, thereby leading to profit maximization for investors.

(h) Global Depository Receipt

Global Depository Receipt (GDR) is an instrument in which a company located in domestic country issues one or more of its shares or convertibles bonds outside the domestic country. In GDR, an overseas depository bank i.e. bank outside the domestic territory of a company, issues shares of the company to residents outside the domestic territory. Such shares are in the form of depository receipt or certificate created by overseas the depository bank.

Issue of Global Depository Receipt is one of the most popular ways to tap the global equity markets. A company can raise foreign currency funds by issuing equity shares in a foreign country.

Global Depository Receipt Example

A company based in USA, willing to get its stock listed on German stock exchange can do so with the help of GDR. The US based company shall enter into an agreement with the German depository bank, who shall issue shares to residents based in Germany after getting instructions from the domestic custodian of the company. The shares are issued after compliance of law in both the countries.

Global Depository Receipt Mechanism

The domestic company enters into an agreement with the overseas depository bank for the purpose of issue of GDR.

The overseas depository bank then enters into a custodian agreement with the domestic custodian of such company.

The domestic custodian holds the equity shares of the company.

On the instruction of domestic custodian, the overseas depository bank issues shares to foreign investors.

The whole process is carried out under strict guidelines.

GDRs are usually denominated in U.S. dollars

The following are the advantages of Global Depository Receipts:

GDR provides access to foreign capital markets.

A company can get itself registered on an overseas stock exchange or over the counter and its shares can be traded in more than one currency.

GDR expands the global presence of the company which helps in getting international attention and coverage.

GDR are liquid in nature as they are based on demand and supply which can be regulated.

The valuation of shares in the domestic market increase, on listing in the international market.

With GDR, the non-residents can invest in shares of the foreign company.

GDR can be freely transferred.

Foreign Institutional investors can buy the shares of company issuing GDR in their country even if they are restricted to buy shares of foreign company.

GDR increases the shareholders base of the company.

GDR saves the taxes of an investor. An investor would need to pay tax if he purchases shares in the foreign company, whereas in GDR same is not the case.

Disadvantages

The following are the disadvantages of Global Depository Receipts:

Violating any regulation can lead to serious consequences against the company.

Dividends are paid in domestic country's currency which is subject to volatility in the forex market.

It is mostly beneficial to High Net-Worth Individual (HNI) investors due to their capacity to invest high amount in GDR.

GDR is one of the expensive sources of finance.

(i) Public Fixed Deposits:

Public deposits refer to the unsecured deposits invited by companies from the public mainly to finance working capital needs. A company wishing to invite public deposits makes an advertisement in the newspapers.

Any member of the public can fill up the prescribed form and deposit the money with the company. The company in return issues a deposit receipt. This receipt is an acknowledgement of debt by the company. The terms

and conditions of the deposit are printed on the back of the receipt. The rate of interest on public deposits depends on the period of deposit and reputation of the company.

A company can invite public deposits for a period of six months to three years. Therefore, public deposits are primarily a source of short-term finance. However, the deposits can be renewed from time-to-time. Renewal facility enables companies to use public deposits as medium-term finance.

Public deposits of a company cannot exceed 25 per cent of its share capital and free reserves. As these deposits are unsecured, the company having public deposits is required to set aside 10 per cent of deposits maturing by the end of the year. The amount so set aside can be used only for paying such deposits.

Thus, public deposits refer to the deposits received by a company from the public as unsecured debt. Companies prefer public deposits because these deposits are cheaper than bank loans. The public prefers to deposit money with well-established companies because the rate of interest on public deposits is higher than on bank deposits. Now public sector companies also invite public deposits. Public deposits have become a popular source of industrial finance in India.

Merits of Public Deposits:

1. Simplicity:

Public deposits are a very convenient source of business finance. No cumbersome legal formalities are involved. The company raising deposits has to simply give an advertisement and issue a receipt to each depositor.

2. Economy:

Interest paid on public deposits is lower than that paid on debentures and bank loans. Moreover, no underwriting commission, brokerage, etc. has to be paid. Interest paid on public deposits is tax deductible which reduces tax liability. Therefore, public deposits are a cheaper source of finance.

3. No Charge on Assets:

Public deposits are unsecured and, therefore, do not create any charge or mortgage on the company's assets. The company can raise loans in future against the security of its assets.

5. Flexibility:

Public deposits can be raised during the season to buy raw materials in bulk and for other short-term needs. They can be returned when the need is over. Therefore, public deposits introduce flexibility in the company's financial structure.

5. Trading on Equity:

Interest on public deposits is paid at a fixed rate. This enables a company to declare higher rates of dividend to equity shareholders during periods of good earnings.

Public deposits enable a company to build up contacts with a wider public. These contacts prove helpful in the sale of shares and debentures in future.

Demerits of Public Deposits:

1. Uncertainty:

Public deposits are an uncertain and unreliable source of finance. The depositors may not respond when economic conditions are uncertain. Moreover, they may withdraw their deposits whenever they feel shaky about the financial health of the company.

Depositors are entitled to withdraw their deposits at any time after giving prior notice to the company. During times of financial tightness or distress the depositors may get panicked and wish to withdraw their deposits.

Moreover, if a large number of depositors simultaneously withdraw their deposits during slump, the company may find it difficult to repay a huge sum at once. Therefore, public deposits are described as 'fair weather friends'.

2. Limited Funds:

A limited amount of funds can be raised through public deposits due to legal restrictions.

3. Temporary Finance:

The maturity period of public deposits is short. The company cannot depend upon public deposits for meeting long-term financial needs.

5. Limited Appeal:

Public deposits do not appeal as a mode of investment to bold investors who want capital gains. Conservative investors may also not like these deposits in the absence of proper security.

5. Unsuitable for New Concerns:

New companies lacking in sound credit standing cannot depend upon public deposits. Investors do not like to deposit money with such companies.

(j) Concept of Securitization:

Securitization is a structured process by which a pool of loans and other receivables are packaged and sold in the form of asset-backed securities to the investors to raise the required funds from them. By this process relatively illiquid assets are converted into securities. Securitization falls

under the broad category termed as structured finance transactions. Structured finance refers to securities where the promise to repay the investors is backed by the value of the underlying financial asset or the credit support of a third party to the transaction or some combination of the two. Thus, securitization is nothing but liquefying assets comprising loans and receivables of an institution through systematic issuance of financial instruments.

(i) The process of securitization starts with identification by the company (the originator) the loans or bills receivable in its portfolio, to prepare a basket or pool of assets to be securitized.

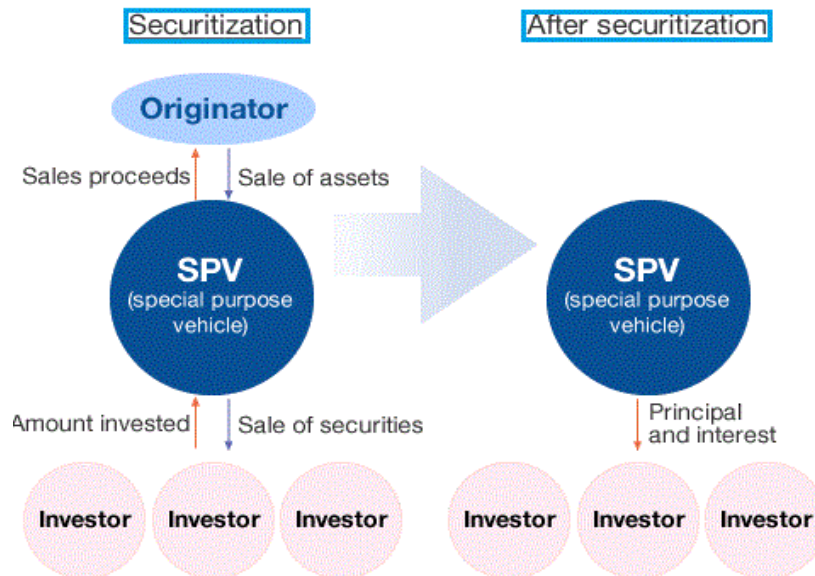

(ii) The pool of assets so identified is then sold to a specific purpose vehicle (SPV) or trust. Usually an investment banker performs the task of an SPV, which is also called an issuer, as it ultimately issues the securities to investors.

(iii) Once the assets are acquired by SPV, the same are split into individual shares/securities which are reimbursed by selling them to investors. These securities are called 'Pay or Pass Through Certificates' (PTC) which are so structured as to synchronize for redemption with the maturity of the securitized loans or bills.

(iv) Repayments under the securitized loans or bills keep on being received by the originator and passed on to the SPV. To this end, the contractual relationship between the originator and the borrowers/obligates is allowed to subsist in terms of the pass through transaction; alternatively a separate agency arrangement is made between the SPV (Principal) and the originator (agent).

(v) Although a PTC could be with recourse to its originator, the usual practice has been to make it without recourse. Accordingly, a PTC holder takes recourse to the SPV and not the originator for payment to the principal and interest on the PTCs held by him. However, a part of the credit risk, as perceived (and not interest risk), can be absorbed by the originator, by transferring the assets at a discount, enabling the SPV to issue the PTCs at a discount to face value.

(vi) The debt to be securitized and the PTC issues are got rated by rating agencies on the eve of the securitization. The issues by the SPV could also be guaranteed by external guarantor-institutions to enhance creditability of the issues. The PTCs, before maturity, are tradable in a secondary market to ensure liquidity for the investors.

(h) Long term financial institution:

Long term loans are provided by specify financial institutions in India. The following are the specialised financial institution:

- (i) The industrial financial corporation in India.
- (ii) Industrial development bank of India.
- (iii) Industrial Reconstruction Corporation in India.
- (iv) Small industries development bank of India.
- (v) Life insurance Corporation of India.
- (vi) State financial corporation.
- (vii) Exime bank.

Term loans are provided by these institutions at deferent rate of interest under scheme of financial institution. it is also to be repaid according to a stipulated repayment schedule these institution stipulate a number of condition management and certain and other financial policy of a company

Term loan represent secured borrowing. It is the most important source of finance for new project. They generally carry a rate of interest inclusive interest tax depending on the credit rating of the borrower, the perceived risk of lending. The loan are generally repayable over a period of 60 to 10 years in annul, half yearly or quarterly installment. For last scale project all India financial institution provides the bulk of term finance either singly or in consortium with other financial institution.

(b) Loan from commercial banks:

The banks' in India also provide term loans to the companies. Banks normally provide term loans to projects in the small and medium scale sectors. The primary role of commercial banks is to cater to the short term requirement of the industry. However, banks have started taking an interest in term financing of industries in several ways. The proceeds of the term loan from banks are generally used for fixed assets or for expansion of plant capacity. Their repayment is scheduled over a period of time. Term loan proposals involve an element of risk because of changes in the conditions affecting the borrowers. The bank making such a proposal has to assess the situation to make a proper appraisal. The decision in such a situation would depend upon various factors affecting the conditions of the industry concerned and the earning potential of the borrower.

(c) Retained earnings:

Retained earnings are the profits retained in the business. Every company retains a certain portion every year in the form of reserve. Even the balance of profit after declaration of dividend is also carried forward in the balance sheet. It is known as ploughing back of profits. Such funds belong to the ordinary shareholder's and increase the net worth of the company. A public limited company has to plough back a reasonable amount of profit every year keeping in view the legal requirements and its own expansion plans. However, retained earnings can be used by existing and financially sound companies. A new company or a loss-making company cannot follow this method. Retained earnings are used as a long-term capital without any cost.

5.3.2 Short Term Source of Finance

Short-term financing deals with raising of money required for periods varying from a few days to one year. It may sometimes exceed for a period above one year but still be called as short-term finance.

1. Trade Credit

Trade credit is credit received by a business organisation from the manufacturers or wholesalers or suppliers. It is also known as mercantile credit. The usual duration of this credit ranges from 30 to 90 days. It is granted to the company or firm on "Open account" without any security except that of the goodwill and financial standing of the buyer. Trade credit does not provide the cash but it facilitates the purchase of materials without immediate payment. Usually no interest is charged on trade credits. Trade credit depends upon the buyer's need for it and also the willingness of the supplier and factors such as:

The financial resources of the supplier.

His eagerness to dispose of his stock.

Degree of competition in the market.

Credit worthiness of the firm.

2. Consumer Credit or Customer Advance

Many times the manufacturers or the suppliers insist on, advance by the customers particularly in case of special orders or big orders. The customer advance forms part of the price of the products ordered by him. Sometimes, the customer also tenders the full price. This is an interest free source of finance. The period of such credit depends upon the time taken to deliver the goods. The availability of this credit also depends on the following factors:

Competitive conditions in the market

Customs of the trade and usage.

Reputation of the supplier.

3. Installment Credit

This is also called consumer credit. Retailers for selling consumer durable generally use it. Here, however, we use the term “Installment credit” to denote the facility provided by the equipment suppliers on easy installments as this serves to provide capital to a firm in kind. Installment includes interest on unpaid sums and is suitably spread so as to enable the purchasing company to meet them out of current cash flows. Commercial banks and financial institutions, now-a-days provide this form of credit on liberal terms. Hire purchase system is also a modified form of the installment credit. In the hire purchase system, the title over the machinery or equipment remains with the supplier until the full price amount is settled.

5. Factoring

Under this method, a financing company purchases the account receivables from the customers or money is advanced on the security of the accounts receivable. In financial accounting, it is denoted as Trade Debtors, and this item appears on the asset side of the Balance Sheet. Since credit sales are unavoidable in trading transactions, every trader has always a larger amount locked up in the form of Account Receivables. This account receivable is a right to property and a right to collect the amount from the client.

5. Short-term Loans

Commercial banks also provide loans to the business concern to meet the short-term financial requirements. When a bank makes an advance in lump sum against some security it is termed as loan. Loan may be in the following form:

(a) Cash credit: A cash credit is an arrangement by which a bank allows his customer to borrow money up to certain limit against the security of the commodity.

(b) **Overdraft:** Overdraft is an arrangement with a bank by which a current account holder is allowed to withdraw more than the balance to his credit up to a certain limit without any securities.

MONEY MARKET INSTRUMENTS IN INDIA

1. Treasury Bills

T-bills are one of the most popular money market instruments. They have varying short-term maturities. The Government of India issues it at a discount for 14 days to 364 days. These instruments are issued at a discount and repaid at par at the time of maturity. Also, a company, firm, or person can purchase TB's. And are issued in lots of Rs. 25,000 for 14 days & 91 days and Rs. 1,00,000 for 364 days.

2. Commercial Bills

Commercial bills, also a money market instrument, works more like the bill of exchange. Businesses issue them to meet their short-term money requirements. These instruments provide much better liquidity. As the same can be transferred from one person to another in case of immediate cash requirements.

3. Certificate of Deposit

Certificate of deposit or CD's is a negotiable term deposit accepted by commercial banks. It is usually issued through a promissory note. CD's can be issued to individuals, corporations, trusts, etc. Also, the CD's can be issued by scheduled commercial banks at a discount. And the duration of these varies between 3 months to 1 year. The same, when issued by a financial institution, is issued for a minimum of 1 year and a maximum of 3 years.

5. Commercial Paper

Corporates issue CP's to meet their short-term working capital requirements. Hence serves as an alternative to borrowing from a bank. Also, the period of commercial paper ranges from 15 days to 1 year. The Reserve Bank of India lays down the policies related to the issue of CP's. As a result, a company requires RBI's prior approval to issue a CP in the market. Also, CP has to be issued at a discount to face value. And the market decides the discount rate.

Denomination and the size of CP:

Minimum size – Rs. 25 lakhs

Maximum size – 100% of the issuer's working capital

5. Call Money

It is a segment of the market where scheduled commercial banks lend or borrow on short notice (say a period of 14 days). In order to manage day-to-day cash flows. The interest rates in the market are market-driven and

hence highly sensitive to demand and supply. Also, the interest rates have been known to fluctuate by a large % at certain times. Sources of Financing

5.4 EXERCISES:

1 Which of the following is a liability of a bank?

- (a) Treasury Bills
- (b) Commercial Papers
- (c) Certificate of Deposits
- (d) Junk Bonds

2. Commercial paper is a type of

- (a) Fixed coupon bond
- (b) Unsecured short-term debt
- (c) Equity share capital
- (d) Government bond

3. In India, Commercial Papers are issued as per the guidelines issued by

- (a) Securities and Exchange Board of India
- (b) Reserve Bank of India
- (c) Forward Market Commission
- (d) None of the above

5. Commercial paper are generally issued at a prices

- (a) Equal to face value
- (b) More than face value
- (c) Less than face value
- (d) Equal to redemption value

5. Which of the following is not applicable to commercial paper?

- (a) Face Value
- (b) Issue Price
- (c) Coupon rate
- (d) None of the above

6. Which of the following is true with respect to commercial paper (CP)?

- (a) These are issued in multiples of 1 lakh
- b) The minimum amount to be invested by a single investor is 5 lakhs
- (c) The minimum maturity period is 30 days
- (d) The issuer cannot buy back these instruments
- (e) These can be raised up to the extent of 80% of working capital limit

7. Which of the following statements is/are true with respect to Short-term bank finance

- i) Under the cash credit arrangement the customer is permitted to borrow up to a limit called the cash credit limit
- ii) Cash credit account operates against security in the form of pledge of shares and securities.
- iii) Under letter of credit agreement the bank assumes the risk and also provides the credit

- (iv) Security in the form of hypothecation is limited to movable properties
- (a) Only (ii) above
- (b) Only (iv) above
- (c) Both (i) and (iv) above
- (d) Both (ii) and (iii) above

8. Which of the following statements is not true with respect to Commercial Papers (CPs)
- (a) These are short-term usance promissory notes with a fixed maturity period
 - (b) It is also referred to as Corporate Paper
 - (c) is mostly used to finance the current transactions of a company
 - (d) it helps to meet the seasonal need for funds
 - (e) it cannot be issued by body corporate

9. Which of the following statements is true with regard to public deposit to a company?
- (a) The procedure involved in raising public deposit is fairly complex

Introduction:

The cash flow is the inflow i.e. receipt of cash and the outflow means payment of Cash. Here the Cash means Cash and Cash equivalents. The cash equivalents include Cash balance, Bank Balance, and the different types of Marketable Securities. Cash Flow Statement means a statement that indicates the inflows of cash and the outflows of Cash during the particular period. Inflows of cash means those transactions that rises the Cash and Cash Equivalents. The Cash outflows are those transactions that reduces the Cash and Cash Equivalents. This statement is arranged in accordance with the Accounting Standard-3 on Cash Flow Statement. As per the Accounting Standard-3, cash flows are obtainable under the three heads i.e. Cash Flow from the Operating Activities, Cash Flow from the Investing Activities and the Cash Flow from Financing Activities.

Cash plays a really imperative part within the financial life of a business. A firm needs cash to make payments for suppliers, daily operations, to make payment of salaries, wages, dividend and interest. In short it can be said that as blood is important in the human body like that cash is important in the business life. Thus, it is exceptionally fundamental for a business to preserve an adequate balance of cash. For instance, a concern works beneficially but it does not have adequate cash balance to make payment of dividend, what message does it pass on to the shareholders and open in common. In this way, managing of cash is remarkably important. There ought to be focus on drive of cash and its equals. Cash implies, cash in hand and demand deposits. Cash equals comprises of bank overdraft, cash credit, short term bank deposits.

Cash Flow Statement compacts with stream of cash which incorporates cash reciprocals as well as cash. This explanation is an extra data to the clients of Money related Statements. The articulation appears the approaching and active of cash. The explanation surveys the capability of the endeavor to produce cash and utilize it. Thus a Cash-Flow statement may be characterized as a outline of receipts and payment of cash for a particular period of time. It moreover clarifies reasons for the changes in cash position of the firm. Cash streams are cash inflows and outpourings. Exchanges which increment the cash position of the substance are called as inflows of cash and those which diminish the cash position as outpourings of cash.

6.4 CLASSIFICATION OF CASH FLOW STATEMENT

1. Cash Flow -Operating Activities:

The operating activities related to the vital income making exercises to a business which comes under this category. Money Inflows for operating activities incorporates Cash Deals, Collection from Indebted individuals and the receipts of Commission and Eminence. Whereas Cash

Objectives -Cash Flow Statement:

- To define the bases of Cash and Cash Equivalents under operating, investing and financing doings of the organization.
- To define the uses of Cash and Cash Equivalents for operating, investing and financing doings of the organization.
- To define the net alteration in Cash and Cash equivalents due to cash arrivals and discharges for operating, investing and financing doings of the organization that take place among the two balance sheet dates.

6.5 Uses of Cash Flow statement

- **To helpful for the Short-term Planning and forecasting:**

It assists in planning of savings and assessing the financial supplies of the enterprise based on evidence provided in the declaration about the inflow and the outflow of Cash and Cash Equivalents.

- **To measure Liquidity and Solvency of the organization:**

It assists in recognizing the capability of the organization to meet its responsibilities on time.

- **To accomplish Cash Efficiently:**

It delivers material about the cash location by reflecting whichever an excess of cash or a shortfall of cash in the report. This assists the organization to take decisions about the investment of excess cash and the preparation for deficit funds.

- **To simplify the Relative Study:**

It simplify the evaluation of actual cash flows with the planned cash flows to recognize whether the arrivals and discharges of cash are moving as per the schedule or not. Such assessment will also reproduce deviations of the real arrivals and discharges from the budgeted cash flows for which essential actions are then occupied by the initiative.

- **To validate Cash Situation:**

The Cash flow statement is arranged to record all the arrivals and discharges which effect in the extra or deficit of cash for an organization. Since, all the cash dealings are accessible in the report, it becomes easy to recognize the items which increase or reduction in the cash balances.

- **To assess Administration Decisions:**

This statement categorizes the cash dealings under three separate heads viz., operating, investing and financing cash. Such arrangement assist the operators of the statement to evaluate whether the decisions taken by the organization are suitable from investing and financing fact of view or not.

- **For payment of dividend :**

To approve the dividends, every organization must comply with the approved provisions for the payment of dividend. It also helps in determining how much dividend the organization should pay in a specific year.

Limitations -Cash Flow Statement:

- **Non-cash transactions are not shown:**

This statement always takes into consideration merely cash arrivals and cash discharges. Non-cash dealings are not measured for preparation of cash flow statement.

- **Not an alternative for a profit and loss statement :**

This statement cannot be used as an alternative for a profit and loss statement because profit and loss statement is prepared on accrual basis of accounting while cash flow statement is prepared on the cash basis. It is not imaginable to calculate net profit or loss from the statement of cash flow.

- **Not an alternative for Balance Sheet:**

This statement cannot be used as an alternative for a financial position showing statement i.e. the Balance Sheet. Therefore, this statement cannot be taken as a substitute for Balance Sheet.

- **Historicity Nature:**

This statement is prepared grounded on the cash arrivals and discharges that have already taken place during the year and hence, it is pastby nature.

- **Valuation of Liquidness:**

The Cash flow statement takes into deliberation all the dealings of cash and cash equivalents. This is just one of the mechanisms in the current assets which regulate the liquidness position of the organization. Therefore, cash flow statement alone cannot help in defining the liquidness position of the organization.

- **Correctness of Cash Flow Statement:**

The cash flow statement is arranged from the financial statements of an organization, correctness of the same will depend upon how correctly the monetary statements of the enterprise are arranged.

Expressions used in the Cash Flow Statement:

- **Cash:**

It comprises Cash in hand and deposit with banks.

- **Cash Equivalents:**

It comprises extremely liquid short-term investments that are freely convertible into cash and that are subject to an unimportant risk of change in value. It includes bill of exchange, commercial papers, investments etc.

- **Disclosure in Cash Flow Statement:**

Cash and Cash Equivalent is calculated as under:

` Cash in Hand + Cash at Bank + Cheques + Drafts on Hand + Short-term Investments (Marketable Securities) + Short-term Deposits in Banks

Classification of the Cash Flows for Cash Flow Statement :

Classification of Cash Flows as per Accounting Standard-3:

This standard on Cash Flow Statement needs that all the inflows and outflows of the cash and cash equivalent during a specific period should be categorized under 3 different heads as per the nature of dealings. These 3 heads are explained as below:

(a) Fund from Operating Activities:

These are the principal revenue making activities of an entity. It comprises all non-investing and non-financing doings. In a cash flow statement, net result of all the inflows and outflows from functioning activities is shown as Cash Flow from Operating Activities. Subsequent is the list of operating doings for:

(I) Financial Companies:

(b) Fund from Investing Activities:

These include all doings related to the purchase and clearance of Long-term Assets and other investments which are not categorized as cash equivalents. Subsequent is the list of investing activities: a. acquisition of fixed assets; b. sale of fixed assets; c. acquisition of securities; d. disposal of securities; e. loans and advances

(c) Fund from Financing Activities:

These are that type of activities that alteration the size and composition of the owner's capital as well as borrowings of the firm. Subsequent is the list of financing doings: a. issue of shares; b. issue of debentures c. loans and bonds d. short-term borrowings; e. bank overdraft as well as cash credit.

Transactions not regarded as Cash Flow:

These are the dealings that are mere actions in between the items of Cash and Cash Equivalents. This comprises cash deposited in bank, cash withdrawn from the bank etc.

Non-cash transactions:

These are the dealings in which the inflow or outflow of Cash does not take place. So, these non-cash dealings are not deliberated while making the Cash Flow Statements. These dealings comprise depreciation, issue of bonus, etc.

Significance of separate expose of cash flows under each activity:

• Operating Activities:

It acts a pointer of the extent to which the business processes successfully generate cash.

It controls operating efficiency of the business.

It helps in taking dynamic decisions with connection with cash for payment of dividends to shareholders, make new investments, expand projects, etc.

It helps in predicting and projecting upcoming cash flows.

Investing Activities:

It signifies the extent to which expenditure has been experienced to generate future revenue

Financing Activities:

It contributes in assessing claims on future cash flows by contributors of funds to the business.

Format of Cash Flow Statement

Extraordinary Items:

All the incomes and expenses that arise from events or transactions that are clearly separate from the ordinary course of business of the enterprise are termed as extraordinary items. All such items are not expected to recur frequently or regularly. It comprises items such as payment to shareholders in the event of buy back of shares, claim for damages received, etc.

**6.6 PREPARATION OF CASH FLOW STATEMENT

(B) Cash Flow from Investing Activities:

These comprise all activities related to the acquisition and disposal of Long-term Assets and other investments which are not categorized as cash equivalents. All cash inflows and outflows connecting to the fixed assets, shares and related instruments of other enterprise including loans and advances to third parties and their repayments are classified under **Investing** Activities. It shows the degree to which investments have been made for resources that produce revenue and cash flows in future. It is determined by analyzing the deviations in fixed assets, long-term investments in the start and at the end of the year for which particular accounts can be prepared using the values that are available.

(C) Financing Activities:

These are those doings that change the size and composition of the owner's capital and borrowings of the firm. It is beneficial in estimating claims on cash flows by lenders of funds in future and therefore, are shown distinctly. It is calculated by analyzing change in Equity and Preference Share Capital, Debentures and other borrowings. It also takes into deliberation the amounts paid on account of interest and dividend. If shares or debentures are delivered at a premium, Cash Flow Statement shows total cash received from the issue that comprises both insignificant value and the premium. Any amount of share issue expenditures and underwriting commission is a cash outflow from financing activities. It does not take into consideration bonus issue as it is just a capitalization of reserves for which the company does not receive any cash for it. Similarly, conversion of debentures into new debentures or shares involves no cash flow and consequently not considered in a cash flow statement.

Preparation of Cash Flow Statement

Steps for Preparing Cash Flow Statement:

Step 1:

Compute cash flow from Operating Activities.

Step 2:

Compute cash flow from Investing Activities.

Step 3:

Compute cash flow from Financing Activities.

Step 4:

Adding Step 1, Step 2 and Step 3 above, compute the net increase or decrease in Cash and Cash Equivalents.

Step 5:

Amount computed in Step 4 is to be added to the balance of Cash and Cash Equivalents in the start of the year.

Step 6:

Adding Step 4 and Step 5 will give the balance of Cash and Cash Equivalents at the end of the year which will match the balance as per Balance Sheet.

Precautions for preparing Cash Flow Statement:

Balance in Statement of Profit and Loss:

Identify whether the balance in the Statement of Profit and Loss is positive or negative. When the opening balance is negative, it is to be added to the closing balance and when the opening balance is positive, it is to be deducted from the closing balance.

Balance of Other Reserves:

Identify whether the balances of other reserves have increased or decreased. When the increase is due to appropriation from Surplus, i.e., Balance in Statement of Profit and Loss, it is to be added to compute Net Profit before tax and Extraordinary Items.

Interest on borrowings:

Identify if the percentage of interest on borrowings is given and add the amount of interest paid to compute Net Profit before Working Capital Changes and show it as an 'Outflow' under Cash Flow from Financing Activities.

Interest on Investment:

Identify if the percentage of interest on Investment is given and deduct the amount of interest received to compute Net Profit before Working Capital Changes and show it as an 'Inflow' under cash Flow from Investing Activities

Non-cash Expenses:

Identify if non-cash expenses are given and add them to compute Net Profit before Working Capital Changes.

Non-operating Expenses:

Identify if non-operating expenses are given and add them to compute Net Profit before Working Capital Changes. It will be shown as an outflow under appropriate head.

Non-operating Incomes:

Sources of Finance and Cash
Flow Analysis

Identify if non-operating incomes are given and deduct them to compute Net Profit before Working Capital Changes.

6.6 PRACTICAL PROBLEMS

Problem No. 1

Prepare a Cash - Flow Statement from the following Balance Sheet of Narayan Industries Ltd. Mumbai.

| | Particulars | Note No. | 31.03.2018 | 31.03.2017 |
|-----------|-------------------------------------|----------|-----------------|-----------------|
| I | Equity & Liabilities : | | | |
| | 1) Share holder's Funds : | | | |
| | a) Share Capital | | 2,50,000 | 2,00,000 |
| | b) Reserve & Surplus | 1 | 1,83,000 | 82,000 |
| | 2) Non-Current Liabilities : | | | |
| | Long term Borrowings | 2 | 80,000 | 50,000 |
| | 3) Current Liabilities : | | | |
| | Trade Payable | | 1,62,000 | 1,30,000 |
| | Total | | 6,75,000 | 4,62,000 |
| II | Assets : | | | |
| | 1) Non - Current Assets : | | | |
| | a) Fixed Assets | | 2,74,000 | 1,17,000 |
| | b) Long-term investments | | 68,000 | 55,000 |
| | 2) Current Assets : | | | |
| | a) Inventory | 3 | 2,06,000 | 1,50,000 |
| | b) Trade Receivables | | 32,000 | 70,000 |
| | c) Cash & Cash Equivalents | | 95,000 | 70,000 |
| | Total | | 6,75,000 | 4,62,000 |

| Note : | | 31.03.2018 | 31.03.2017 |
|---------------|---|-------------------|-------------------|
| 1) | Reserve & Surplus : Profit & Loss Balance | 1,83,000 | 82,000 |
| | | 7,00,000 | 7,50,000 |
| 2) | Long-term Borrowings : 15% Debentures | 8,000 | 50,000 |
| 3) | Trade Receivables : | | |
| | S. Debentures | 20,000 | 60,000 |
| | Bills Receivables | 12,000 | 10,000 |
| | | 32,000 | 70,000 |

Solution :**Cash Flows from Operating Activities****for the year ended 31st March, 2016**

| Particulars | Details | Amount |
|---|----------------|---------------|
| A) Cash Flows from Operating Activities : | | |
| Net Profit before Tax : | | 101000 |
| Adjustment for non-cash & non-operating items : | | |
| Add : Interest paid | | 9000 |

|--|----------------|
| Profit & Loss Balance on 31.03.2018 | 120000 |
| Less : Profit & Loss Balance on 31.03.2017 | 159000 |
| | <u>(39000)</u> |
| Add : Transfer to General Reserve | 1,20,000 |
| Net Profit before Tax | <u>81000</u> |

6.7 SUMMARY:

Business finance, Raising and managing of funds by business organizations. Such activities are usually the concern of senior managers, who must use financial forecasting to develop a long-term plan for the firm. Shorter-term budgets are then devised to meet the plan's goals. When a company plans to expand, it may rely on cash reserves, expected increases in sales, or bank loans and trade credits extended by suppliers. Managers may also decide to raise long-term capital in the form of either debt (bonds) or equity (stock). The value of the company's stock is a constant concern, and managers must decide whether to reinvest profits or to pay dividends. Other duties of financial managers include managing accounts receivable and fixing the optimum level of inventories. When deciding how to deploy corporate assets to increase growth, financial managers must also consider the benefits of mergers and acquisitions, analyzing economies of scale and the ability of businesses to complement each other.

A cash flow statement provides data regarding all cash inflows a company receives from its ongoing operations and external investment sources. The cash flow statement includes cash made by the business through operations, investment, and financing—the sum of which is called net cash flow. The first section of the cash flow statement is cash flow from operations, which includes transactions from all operational business activities. Cash flow from investment is the second section of the cash flow statement, and is the result of investment gains and losses. Cash flow from financing is the final section, which provides an overview of cash used from debt and equity.

6.8 EXERCISE

(A) MCQ type questions:

1. Statement of cash flows includes

- A) Financing Activities
- B) Operating Activities
- C) Investing Activities
- D) All of the Above

2. In cash flows, when a firm invests in fixed assets and short-term financial investments

results in

- A) Increased Equity
- B) Increased Liabilities
- C) Decreased Cash
- D) Increased Cash

3. A firm that issues stocks and bonds to raise funds results in

- A) Decreases Cash
- B) Increases Cash
- C) Increases Equity
- D) Increases Liabilities

6. The purchase value of assets over its serviceable life is categorized as

- A) Appreciated Liabilities
- B) Appreciated Assets
- C) Depreciation
- D) Appreciation

5. The basic financial statements include

- A) Statement of Cash Flows
- B) Statement of Retained Earnings
- C) Balance Sheet and Income Statement
- D) None of the Above

6. The statement of cash flow clarifies cash flows according to

- A) Operating and Non-operating Flows
- B) Inflow and Outflow
- C) Investing and Non-operating Flows
- D) Operating, Investing, and Financing Activities

7. Cash flow example from a financial activity is

- A) Payment of Dividend
- B) Receipt of Dividend on Investment
- C) Cash Received from Customers
- D) Purchase of Fixed Asset

8. Cash flow example from an investing activity is

- A) Issue of Debenture
- B) Repayment of Long-term Loan
- C) Purchase of Raw Materials for Cash
- D) Sale of Investment by Non-Financial Enterprise

9. Cash flow example from an operating activity is

- A) Purchase of Own Debenture
- B) Sale of Fixed Assets
- C) Interest Paid on Term-deposits by a Bank
- D) Issue of Equity Share Capital

10. Which item comes under financial activities in cash flow?

- A) Redemption of Preference Share
- B) Issue of Preference Share
- C) Interest Paid
- D) All of the above

11. As per AS-3, Cash Flow Statement is mandatory for

- A) All enterprises
- B) Companies listed on a stock exchange
- C) Companies with a turnover of more than Rs 50 crores

- a) Both A and B
- b) Both A and C
- c) Both C and B

12. Listed Enterprises need to prepare Cash Flow Statement only under indirect method.

- a) True
- b) False

13. In the case of financial enterprises, the cash flow resulting from interest and dividend

received and interest paid should be classified as cash flow from

- a) Operating activities
- b) Financing activities
- c) Investing activities
- d) None of the above

16. In case of other enterprises cash flow arising from interest paid should be classified as cash flow from _____ while dividends and interest received should be stated as cash flow from ____.

- a) Operating activities, financing activities
- b) Financing activities, investing activities
- c) Investing activities, operating activities
- d) None of the above

15. Issue of bonus shares and conversion of debentures into equity are shown as a footnote to the Cash Flow Statement.

- a) True
- b) False

16. When a fixed asset is bought as hire purchase, interest element is classified under _____ and loan element is classified under _____.

- a) Operating activities, financing activities
- b) Financing activities, investing activities
- c) Investing activities, operating activities
- d) None of the above

- A) Old Furniture written off doesn't affect cash flow.
- B) Cash flow statement is a substitute for cash account.
- C) Appropriation of retained earnings is not shown in Cash flow statement.
- D) Net cash flow during a period can never be negative.

- a) A, B, C
- b) B, C, D
- c) C, D, A
- d) None of the above

18. Which of the following is not a cash inflow?

- a) Decrease in debtors
- b) Issue of shares
- c) Decrease in creditors
- d) Sale of fixed assets

19. Which of the following is not a cash outflow?

- a) Increase in Prepaid expenses
- b) Increase in debtors
- c) Increase in stock
- d) Increase in creditors

20. Which of the following is a conventional method of ascertaining cost?

- a) Absorption costing
- b) Full Costing
- c) Both a & b
- d) None of the above

Answers

1. D) All of the Above
2. C) Decreased Cash
3. B) Increases Cash

6. C) Depreciation
5. D) None of the Above
6. D) Operating, Investing and Financing Activities
7. D) Purchase of Fixed Asset
8. D) Sale of Investment by Non-Financial Enterprise
9. C) Interest Paid on Term-deposits by a Bank
10. D) All of the above
11. c) Both C and B
12. a) True
13. a) Operating activities
16. b) Financing activities, investing activities
15. a) True
16. b) Financing activities, investing activities
17. b) B, C, D
18. c) Decrease in creditors
19. d) Increase in creditors
20. c) Both a & b

(B) Short Answer Questions

1. What is meant by 'Cash Flows'?
2. Give the meaning of 'Cash Equivalents' for the purpose of preparing Cash Flow Statement.
3. How is 'dividend paid' treated by a financial enterprise for the purpose of preparing cash flow statement?
4. When can 'Receipt of Dividend' be classified as an operating activity State. Also give reason in support of your answer.

| | | 2,68,000 | 1,70,000 |

Additional Information:

12% debentures were issued on 1st September, 2017.

(D) Question 2.

From the following Balance Sheet prepare cash flow statement

| Particulars | Note No. | 31.3.2019 (₹) | 31.3.2018 (₹) |
|--|----------|------------------|-----------------|
| I. EQUITY AND LIABILITY : | | | |
| 1. Shareholder's Fund: | | 7,00,000 | 5,00,000 |
| a. Share Capital | | | |
| b. Reserve and Surplus | | 3,50,000 | 2,00,000 |
| 2. Non-Current Liabilities: | | | |
| Long Term Borrowings | | 50,000 | 1,00,000 |
| 3. Current Liabilities: | | | |
| a. Trade Payables | | 1,22,000 | 1,05,000 |
| b. Short term Provisions (Provision for tax) | | 50,000 | 30,000 |
| Total | | 12,72,000 | 9,35,000 |
| II. ASSETS : | | | |
| 1. Non Current Assets: | | | |
| a. Fixed Assets: | | | |
| i. Tangible Assets | 1 | 5,00,000 | 5,00,000 |
| ii. Intangible Assets | 2 | 95,000 | 1,00,000 |
| b. Non-current Investments | | 1,00,000 | Nil |
| 2. Current Assets: | | | |
| a. Inventory | | 1,30,000 | 55,000 |
| b. Trade Receivable | | 1,47,000 | 80,000 |
| c. Cash and Cash Equivalents | | 3,00,000 | 2,00,000 |
| Total | | 12,72,000 | 9,35,000 |

| Note No. | Particulars | 31.3.2018 (₹) | 31.3.2017 (₹) |
|----------|--------------------------|-----------------|-----------------|
| 1 | Tangible Assets: | | |
| | Machinery | 2,80,000 | 2,00,000 |
| | Accumulated depreciation | (1,00,000) | (80,000) |
| | | 1,80,000 | 1,20,000 |
| 2 | Equipments | 3,20,000 | 3,80,000 |
| | Intangible Assets : | 5,00,000 | 5,00,000 |
| | Goodwill | 95,000 | 1,00,000 |

Additional Information: Machinery of the book value of 80,000 (accumulated depreciation ₹ 20,000) was sold at a loss of ₹ 18,000.
