

University of Mumbai

No. AAMS(UG)/122 of 2022-23

CIRCULAR:-

Attention of the Principals of the Affiliated Colleges and Directors of the Recognized Institutions in Faculty of Science & Technology is invited to this office circular No. UG/168 of 2017-18 dated 8th August, 2017, relating to the revised syllabus as per (CBCS) for Bachelor of Engineering (Production Engineering) (Sem. III & VIII) be revised for S.E. (Sem. III & IV) form Academic Year 2017-18, Third Year (Sem. V & VI) from Academic Year 2018-19 and Bachelor of Engineering (Sem. VII & VIII) from Academic Year 2019-20.

You are hereby informed that the recommendations made by the Ad-hoc Board of Studies in **Production Engineering** at its meeting held on 2nd June, 2022 and subsequently passed in the Faculty and then by the Board of Deans at its meeting held on 5th July, 2022 vide item No. 6.34 (R) have been accepted by the Academic Council at its meeting held on 11th July, 2022 vide item No. 6.34 (R) and that in accordance therewith, the revised syllabus of **B.E. (Production Engineering) (Sem.- VII & VIII) (CBCS) (REV- 2019 'C' Scheme)**, has been brought into force with effect from the academic year 2022-23. (The circular is available on the University's website www.mu.ac.in).

MUMBAI-400 032

20th October, 2022

To

(Dr. Shailendra Deolankar)
I/c Registrar

The Principals of the Affiliated Colleges and Directors of the Recognized Institutions in Faculty of Science & Technology.

A.C/6.34 (R)/11/07/2022

No. AAMS(UG)/122 -A of 2022-23

20th October, 2022

Copy forwarded with Compliments for information to:-

- 1) The Dean, Faculty of Science & Technology,
- 2) The Chairman, Ad-hoc Board of Studies in Production Engineering,
- 3) The Director, Board of Examinations and Evaluation,
- 4) The Director, Board of Students Development,
- 5) The Director, Department of Information & Communication Technology,
- 6) The Co-ordinator, MKCL.

(Dr. Shailendra Deolankar)
I/c Registrar

Copy to :-

1. The Deputy Registrar, Academic Authorities Meetings and Services (AAMS),
2. The Deputy Registrar, College Affiliations & Development Department (CAD),
3. The Deputy Registrar, (Admissions, Enrolment, Eligibility and Migration Department (AEM),
4. The Deputy Registrar, Research Administration & Promotion Cell (RAPC),
5. The Deputy Registrar, Executive Authorities Section (EA),
6. The Deputy Registrar, PRO, Fort, (Publications Section),
7. The Deputy Registrar (Special Cell),
8. The Deputy Registrar, Fort/Vidyanagari Administration Department (FAD) (VAD), Record Section,
10. The Professor-cum- Director, Institute of Distance and Open Learning (IDOL Admin), Vidyanagari,

They are requested to treat this as action taken report on the concerned resolution adopted by the Academic Council referred to in the above circular and that on separate Action Taken Report will be sent in this connection.

1. P.A. to Hon'ble Vice-Chancellor,
2. P.A. to Pro-Vice-Chancellor,
3. P.A. to Registrar,
4. All Deans of all Faculties,
5. P.A. to Finance & Account Officer, (F. & A.O.),
6. P.A. to Director, Board of Examination & Evaluation,
7. P.A. to Director, Innovation, Incubation and Linkages,
8. P.A. to Director, Board of Lifelong Learning and Extension (BLLE),
9. The Director, Dept. Of Information and Communication Technology (DICT) (CCF & UCC), Vidyanagari,
10. The Director of Board of Student Development,
11. The Director, Department of Students Welfare (DSD),
12. All Deputy Registrar, Examination House,
13. The Deputy Registrars, Finance & Accounts Section,
14. The Assistant Registrar, Administrative sub-campus Thane,
15. The Assistant Registrar, School of Engg. & Applied Sciences, Kalyan,
16. The Assistant Registrar, Ratnagiri Sub-centre, Ratnagiri,
17. The Assistant Registrar, Constituent Colleges Unit,
18. BUCTU,
19. The Receptionist,
20. The Telephone Operator,
21. The Secretary MUASA,

for information.

University of Mumbai

**Revised Syllabus for
B.E. (Production Engineering)
(Sem. - VII & VIII)
(Choice Based Credit System)**

(With effect from the academic year 2022-23)

University of Mumbai

Title of Course	B.E. (Production Engineering)
Eligibility	Passing Third year Engineering as per Ordinance 0.6244
Passing Marks	40%
No. of years/Semesters:	04 Years / 8 semester
Level:	P.G. / U.G. / Diploma / Certificate
Pattern:	Yearly / Semester
Status:	New / Revised 2019
To be implemented from Academic Year :	With effect from Academic Year : 2022-23

Dr. Hari Vasudevan
Chairman
of Ad-hoc Board of
Studies in Production
Engineering

Dr. Suresh K. Ukarande
Associate Dean,
Faculty of Science and
Technology

Dr Anuradha Majumdar
Dean,
Faculty of Science and
Technology

Preamble

To meet the challenge of ensuring excellence in engineering education, the issue of quality needs to be addressed, debated and taken forward in a systematic manner. Accreditation is the principal means of quality assurance in higher education. The major emphasis of accreditation process is to measure the outcomes of the program that is being accredited. In line with this Faculty of Science and Technology (in particular Engineering) of University of Mumbai has taken a lead in incorporating philosophy of outcome based education in the process of curriculum development.

Faculty resolved that course objectives and course outcomes are to be clearly defined for each course, so that all faculty members in affiliated institutes understand the depth and approach of course to be taught, which will enhance learner's learning process. Choice based Credit and grading system enables a much-required shift in focus from teacher-centric to learner-centric education since the workload estimated is based on the investment of time in learning and not in teaching. It also focuses on continuous evaluation which will enhance the quality of education. Credit assignment for courses is based on 15 weeks teaching learning process, however content of courses is to be taught in 12-13 weeks and remaining 2-3 weeks to be utilized for revision, guest lectures, coverage of content beyond syllabus etc.

There was a concern that the earlier revised curriculum more focused on providing information and knowledge across various domains of the said program, which led to heavily loading of students in terms of direct contact hours. In this regard, faculty of science and technology resolved that to minimize the burden of contact hours, total credits of entire program will be of 170, wherein focus is not only on providing knowledge but also on building skills, attitude and self-learning. Therefore, in the present curriculum skill based laboratories and mini projects are made mandatory across all disciplines of engineering in second and third year of programs, which will definitely facilitate self-learning of students. The overall credits and approach of curriculum proposed in the present revision is in line with AICTE model curriculum.

The present curriculum will be implemented for Final Year of Engineering from the academic year 2022-23.

Dr. S. K. Ukarande
Associate Dean
Faculty of Science and Technology
University of Mumbai

Dr. Anuradha Muzumdar
Dean
Faculty of Science and Technology
University of Mumbai

Incorporation and implementation of Online Contents from NPTEL/ Swayam Platform

The curriculum revision is mainly focused on knowledge component, skill based activities and project based activities. Self-learning opportunities are provided to learners. In the revision process this time in particular Revised syllabus of 'C' scheme wherever possible additional resource links of platforms such as NPTEL, Swayam are appropriately provided. In an earlier revision of curriculum in the year 2012 and 2016 in Revised scheme 'A' and 'B' respectively, efforts were made to use online contents more appropriately as additional learning materials to enhance learning of students.

In the current revision based on the recommendation of AICTE model curriculum overall credits are reduced to 171, to provide opportunity of self-learning to learner. Learners are now getting sufficient time for self-learning either through online courses or additional projects for enhancing their knowledge and skill sets.

The Principals/ HoD's/ Faculties of all the institute are required to motivate and encourage learners to use additional online resources available on platforms such as NPTEL/ Swayam. Learners can be advised to take up online courses, on successful completion they are required to submit certification for the same. This will definitely help learners to facilitate their enhanced learning based on their interest.

Preface By BoS

Engineering education in India is changing fast and is set to face multiple challenges in the near future. Academic institutes are expected to prepare good quality engineers and Industries are expected to come good with the wealth generation activity. Manufacturing, among the industry sectors, is currently emerging as one of the high growth sectors in India. Government of India (GOI) has launched the 'Make in India' program to place India on the world map as a manufacturing hub. The GOI has set an ambitious target of increasing the contribution of manufacturing output to 25% of GDP by 2022, from the current 16 %. In this context, the major challenge is to ensure high quality in all aspects related to education & industry practices. Accreditation of the program is one of the principal ways, by which the quality can be assured. The major emphasis of the accreditation process is to measure the outcomes of the program that is being accredited. Program outcomes are essentially a range of skills and knowledge that a student will have at the time of graduation. Keeping this in mind, the Faculty of Science and Technology of the University of Mumbai has taken the lead in ensuring that the outcome based education is stressed upon in the curriculum development.

At the Board of Studies (Adhoc) in Production Engineering of the University of Mumbai, we are happy to state that, the Program Educational Objectives (PEOs) of the UG Program in Production Engineering, were discussed in detail and finalized during the multiple brain storming sessions, attended by more than 20 members from different colleges affiliated to the University of Mumbai. Experts from the industry were also invited for their inputs and suggestions. Thus the PEOs were finalized as follows:
To prepare the Learner with sound foundation in STEM subjects, related to Manufacturing and its strategies.

To motivate the Learner for self-learning and to use modern tools for solving real life problems.

To inculcate a professional and ethical attitude, good leadership qualities and commitment to social responsibilities in the Learner's thought process.

To prepare the learner to face industrial challenges through practical exposure in an industrial environment. To prepare the Learner for a successful career in Indian and Multinational Organizations.

In addition to PEOs, for each course of the program, objectives and expected outcomes from a learner's point of view are also included in the curriculum to achieve the goal of outcome based education. We hope to achieve the desired goals in our efforts to prepare high quality Production Engineers. Thank you very much.

Board of studies (Adhoc) in Production Engineering

Dr. Hari Vasudevan – Chairman

Dr. Arun Rane – Member

Dr. Yogesh Padia – Member

Dr. K. H. Inamdar - Member

**Program Structure for Fourth Year Engineering
Semester VII & VIII
UNIVERSITY OF MUMBAI
(With Effect from 2022-2023)**

Semester VII

Course Code	Course Name	Teaching Scheme (Contact Hours)			Credits Assigned				
		Theory	Pract./ Tut.		Theory	Pract.	Total		
PEC701	Industrial Training & Project	--	5*8=40		--	20	20		
Total		--	40		--	20	20

PEC701	Industrial Training and Project	20

Objectives:

1. To correlate with the lessons learnt in theory and actual practices followed in the industries.
2. To give exposure to an industrial environment /discipline.
3. To familiarize with the need for a coordinated effort of various persons at different levels in different departments for achieving the set goals and targets.

Outcomes: The learner will be able to:

1. Demonstrate managerial skills.
2. Identify the size and scale of operations in Industry.
3. Apply the knowledge in problem solving.
4. Demonstrate an understanding of various constraints in industry.
5. Demonstrate the scope, functions and job responsibilities in various departments of an organization.
6. Develop a positive attitude while dealing in professional manner.

Guidelines for Evaluation/Assessment

The total duration for each presentation shall be maximum 30 minutes, inclusive of 20 minutes for presentation and 10 minutes for discussion. 50 marks each for stage I and stage II to be awarded based on the points furnished below and as per the discretion of the internal project guide.

1. Contents of the presentation.
2. Presentation skills.
3. Interest taken, personal involvement and contribution.
4. Headway/progress made in the project execution.

Evaluation/Assessment of the Term Work

1. Introduction, Acknowledgements, references.	}	10
2. Company background/ activities.		
3. Training areas / Training details.		
4. Synopsis / Abstract of the Project.		10
5. General presentation, neatness and accuracy of the data furnished		15
6. Technical contents of the report with data / observations, graphs, drawings, etc.		20
7. Quality of work carried out and details furnished based on personal Observations / involvement.		30
8. Results/ Conclusion.		10
Total		100

Note: Report shall be prepared using University of Mumbai approved Guidelines, as applicable.

Course Code	Course Name	Credits
PEC801	Automation and Control Engineering	03

Objectives

1. To acquaint with basic concepts of industrial automation involving pneumatic and hydraulic controls.
2. To familiarize with the elements of electro-pneumatic interface with control systems.
3. To learn about the application of microprocessors and microcontrollers.
4. To learn the basics of Control Theory.

Outcomes: Learner will be able to:

1. Illustrate the basic concept of Industrial automation in different manufacturing set-ups.
2. Design and develop pneumatic control circuits of medium complexity.
3. Design and develop hydraulic control circuits of medium complexity.
4. Illustrate the use of PLC in control systems.
5. Illustrate the basic application of Microprocessor and Microcontroller.
6. Model the system and check with stability of a mechanical system.

Modules	Details	Hrs.
1	Automation Definition; Automation in production systems; Automation principles and strategies; Basic elements of an automated system; Advanced automation functions; Levels of automation; Types of automation; Benefits and Impact of Automation in Manufacturing and Process Industries. Architecture of Industrial Automation Systems.	06
2	Pneumatic control systems Overview of different types of valves and Actuators in Pneumatics, their applications and their ISO symbols. Design of Pneumatic circuits using Cascade method and Shift register method (up to 3 cylinders). Design of Electro-Pneumatic Circuits using single solenoid and double solenoid valves with and without grouping. Design of Pneumatic circuits using PLC Control (ladder programming only and up to 3 cylinders) with applications of Timers and Counters and concept of Flag and latching.	08
3	Hydraulic control systems Overview of different types of valves, Actuators and Accumulators used in Oil hydraulic circuits, their applications and their ISO symbols. Basic hydraulic circuits involving linear and rotary actuators (No sequential circuits). Fundamental concepts of digital and servo hydraulic controls. Comparison between proportional, digital and servo hydraulic control systems.	07
4	Digital logic: Number systems; Logic Gates; Boolean Algebra; Simplification of Boolean equations using Karnaugh Maps. Microprocessors and Microcontrollers (Only basic understanding and applications) Concept of Microprocessor based control and its application; Parts of a Microprocessor system with block diagram of the general form of a microprocessor system; Data bus, Address bus and Control Bus; General internal Architecture of a Microprocessor; Functions of constituent parts such as ALU, Various Registers and	08

	the Control unit. Difference between a Microprocessor and a Microcontroller. General Block diagram of Microcontroller. Brief exposure to developer board like Arduino UNO or raspberry Pi.	
5	Sensors and Transducers Fundamentals of displacement, position and Proximity Sensors; Velocity and Motion Sensors; Force and Fluid Pressure Sensors; Liquid level and Flow sensors; Temperature and light Sensors; Control of stepper motors.	02
6	Fundamentals of Control System Control system concepts, classification of control systems, Mathematical representation of system equations, response characteristics of components and systems through classical solution. Analog computer and Laplace transformation, Frequency response analysis, polar plots, Testing of System's stability using Routh's criteria, Bode plots, Nyquist plot and Root locus method of analysis.	08

Assessment:

Internal Assessment for 20 marks:

Consisting Two Compulsory Class Tests

1. First test based on approximately 40% of curriculum contents and second test based on remaining contents (approximately 40%, but excluding contents covered in Test I).
2. Total duration allotted for writing each of the paper is 1 hr.
3. Average of the marks scored in both the two tests will be considered for final grading.

End Semester Examination:

Weightage of each module in end semester examination will be proportional to the number of respective lecture hours mentioned in the curriculum.

1. Question paper will comprise of total **six questions, each carrying 20 marks.**
2. **Question 1** will be **compulsory** and should **cover maximum contents of the curriculum.**
3. **Remaining questions will be mixed in nature** (for example if Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).
4. Only **Four questions need to be solved.**

Course Code	Course Name	Credits
PEC802	Computer Aided Engineering.	03

Objectives:

1. To introduce the concepts of computer aided engineering for design & manufacture and familiarize them with mathematical basis of computer graphics.
2. To impart knowledge on computer graphics, which are used routinely in diverse areas like science, engineering, medicine etc.
3. The aim is to provide the students with knowledge of the finite element method that will be of use in different manufacturing areas and to provide a foundation for further study.
4. To introduce the concept of Computer integrated manufacturing, and familiarize them with various automated material handling techniques.

Outcomes: Learner will be able to:

1. Understand software configuration of graphic packages.
2. Understand use of Computer graphics in design.
3. Identify proper modeling techniques for geometric modeling.
4. Solve physical and engineering problems with emphasis on Structural and Thermal Engineering applications.
5. Understand the concept of Computer Integrated Manufacturing.
6. Understand the concept of automated material handling and its methodologies.

Module	Details	Hrs.
01	Computer Aided Design: 1.1 Introduction: Need and Utility of CAD systems in industry, Product Cycle, Definition of CAD tools based on their Constituents and Implementation in a design environment. 1.2 CAD Hardware: Types of systems, system considerations, I/O devices, Hardware Integration & Networking.	04
02	Computer Graphics: Pixel plotting, Scan conversions of lines & circuits, 2D & 3D transformation, 2D Viewing and clipping. Parallel Projection. Elementary treatment of Hidden lines and surfaces. Cubic spines Bezier curves & B- spines, Animation and Color models.	08
03	Solid Modeling: Types of representation of solid models, interactive tools available with solid modeling software's. Introduction to surface modeling. CAD DATA Exchange : File Structure and format of IGES,STEP and DXF	05
04	FEA: Introduction, Stress and Equilibrium, Boundary Condition, Strain – Displacement Relations, Stress Strain Relation, Potential Energy. One Dimensional Problem: Finite Element Modelling, Coordinate Potential Energy Approach, Galerkin Approach, Assembly of Global Stiffness Matrix, Properties of Stiffness Matrix, Finite Element Equations. Trusses: Introduction, 2D Trusses, Assembly of Global Stiffness Matrix.	10
05	CIM: Introduction, Evolution, Objectives, CIM Hardware and Software, CIM Benefits, Nature and role of the elements of CIM, Identifying CIM needs, Data base requirements of CIM, Role of CAD/CAM in CIM, Obstacles to Computer Integrated	04

	Manufacturing, Concept of the future CIM systems, Socio -techno- economic aspects of CIM. Introduction to various aspects of Industry 4.0.	
06	Automated Material handling systems: Flexible manufacturing system: Components, layouts, advantages Automated guided vehicles: advantages, types, guidance systems Group technology (GT): Part families, Parts Classification and Coding Automated storage/ Retrieval system (AS/RS) Concept of “Ghost” factory.	08

Assessment:

Internal Assessment for 20 marks:

Course Code	Course Name	Credits
PEC803	Engineering Economics, Finance, Costing and Accounting.	03

Objectives:

1. To acquaint with the concepts of Micro and Macro Economics.
2. To comprehend the need, definition, functions and economic significance of financial institutions and markets.
3. To familiarize with the concept of Fiscal and Monetary Policy.
4. To acquaint with financial statements and Annual Reports of industries.
5. To familiarize the students with cost records / statements.

Outcomes: Learner will be able to:

1. Correlate various micro and macro-economic variables.
2. Illustrate Economic policies and their implications.
3. Get familiarized with the roles played by various financial institutions/banks.
4. Get exposure to various business strategies.
5. Get familiarized with Accounting and costing practices.

Module	Details	Hrs.
01	Introduction Definition of Economy, Central problems of an economy: what, how and for whom to produce; concepts of production possibility frontier and opportunity cost. Economics, its scope and importance. Introduction to Micro and Macro Economics and their comparison.	03
02	Micro Economics Consumer's Behavior: meaning of utility, marginal utility and law of Diminishing Marginal Utility. Producer's Behavior: law of supply, variation in supply, Types of elasticity of supply. Types of Market: perfect competition, pure competition, Monopoly. Macro Economics Different Methods of Measuring National Income, Economic Policy: Monetary Income and Fiscal Policies. Functions of Central Bank, Functions of Commercial Banks credit Creation, Credit Control Methods, Theory of Inflation, Concepts of Inflation, Effects of Inflation and Anti-inflationary policies.	08
03	Financial Environment of Business: Financial Management-Sources of finance-long term and short term finance Capital Markets: Primary Market: Basics of capital market mechanism and instruments. Secondary Market: Basics of stock exchange and their role, Role of SEBI, Role of FIIs, MFs and Investment Bankers. Money Markets: Basics of Money Market Mechanism, instruments, and institutions. An Overview of investment Appraisal Methods: NPV method, Payback method, discounted payback period method, IRR, Annual worth method.	06

04	Accounting Mechanics, Process and system: Introducing Book Keeping and Record Maintenance, The concept of Double Entry and fundamental principles, Journal, Ledger, Trial Balance and Final Accounts. Financial statement and analysis, Ratio Analysis.	08
05	Cost Accounting Introduction to cost, Types of cost, Element of cost, Material and Labour cost accounting and control, Treatment of Overheads, Overhead allocation and absorption, Concept and Importance of Depreciation and Methods of Depreciation. Unit (cost sheet) and batch costing, activity based costing.	06
06	Management Accounting Joint Product Costing, Process Costing, Marginal Costing, Cost Volume, Profit Analysis and Decision Making. Budgetary Controls, Standard Costing.	08

PEDO8011	Advances in Automobile Engineering	03

Objectives:

1. Study basic principles of actual automobile systems.
2. Study important systems in an automobile.
3. Study recent and modern trends in automobile sector.

Outcomes: Learner will be to:

1. Understand various systems in an automobile.
2. Understand the concept of transmission system and its components.
3. Understand the concepts of steering system and its application.
4. Understand the concepts of brakes, suspension, wheel and balancing etc.
5. Understand the electric system used in automobile.
6. Understand principle of operation, construction and applications of various sensors used in modern automobile along with recent trends.

Module	Details	Hrs.
01	<p>Vehicle Performance: Types of Engines used in automobile, their characteristics and selection, resistance to motion of vehicle, air, rolling, and gradient resistance.</p> <p>Chassis types and structure types: chassis layout, power plant location, Types, Open, Semi integral and integral bus structure.</p> <p>Body Engineering Importance of Body design, Materials for body construction-Styling forms Coach and bus body style, layouts of passenger cars, Bus and truck bodies.</p> <p>Aerodynamic drag – Aerodynamic lifts and pitching moments, Side force, Yawing moments and rolling moments.</p>	06
02	<p>Introduction Transmissions: Necessity of gear box, Sliding mesh, Constant mesh, Synchromesh and epicyclic gear box, Overdrives and hydrodynamic torque converter, CVT, DSG, DCT, AMT, Trouble shooting and remedies.</p> <p>Drive line: Propeller shaft and universal joints, types and construction, different types of universal joints and constant velocity joints.</p> <p>Live axle and differential: Final drive, spiral, bevel, Hypoid and worm drives, Types of live axles, semi, three quarter and full floating axles. Necessity of differential, Conventional and non-slip differential, Trouble shooting and remedies.</p>	05
03	<p>Steering and Front axles Steering geometry, Steering requirements, Steering linkages and steering gears, over steer and under steer, Cornering power, Reversibility of steering gears, wheel alignment, wheel balancing, Power steering mechanisms, components, types. Types of front axles and their constructions. Trouble shooting and remedies</p> <p>Brakes Requirement of brake, Classification of brakes, Mechanical, Hydraulic, Pneumatic, Electro and vacuum brakes. Disc brakes, Braking of front wheel, Rear wheel and four wheel brakes, Brake trouble shooting. Introduction to antilock braking system (ABS).</p>	07
04	Suspension	06

	<p>Objects of suspension, Basic requirements, Air suspension and its features, Independent suspension, Forces acting in independent suspension, Sprung and un-sprung mass, Pitching, rolling and bouncing, Shock absorbers.</p> <p>Wheels and Tyres</p> <p>Requirements of wheels and tyres, Constructional features, Types of tyres, Inflation Pressure and its importance, Application to ride and stability, Trouble shooting and remedies</p>	
05	<p>Electrical system Battery:</p> <p>Types of battery, Lead-Acid, Alkaline, ZEBRA, Sodium Sulphur and Swing, Ratings, charging, Maintenance and testing of Lead-Acid battery.</p> <p>Starting system:</p> <p>Requirements, Various torque terms used, Starter motor drives; Bendix, Follo through, Barrel, Rubber compression, Compression Spring, Friction Clutch, Overrunning Clutch, Dyer. Starter motor solenoids and switches, Glow plugs.</p> <p>Alternator:</p> <p>Principle of operation, Construction, Working, Rectification from AC to DC.</p>	06
06	<p>Recent trends in Automobiles</p> <p>Electronic Control module (ECM), operating modes of ECM (closed loop and open loop) Inputs required and output signals from ECM, Electronic Spark control, Air Management system, Idle speed control. Construction, working & application of temperature sensors, inductive sensors, Position sensors (rotary, linear). Hot wire and thin film air flow sensors, vortex flow/turbine fluid sensors, Optical sensor, Oxygen sensors, Light sensors, methanol sensors ,Rain sensor, New developments in the sensor technology</p>	09

Assessment:

Internal Assessment for 20 marks:

Consisting **Two Compulsory Class Tests**

1. First test based on approximately 40% of curriculum contents and second test based on remaining contents (approximately 40%, but excluding contents covered in Test I).
2. Total duration allotted for writing each of the paper is 1 hr.
3. Average of the marks scored in both the two tests will be considered for final grading.

End Semester Examination:

Weightage of each module in end semester examination will be proportional to the number of respective lecture hours mentioned in the curriculum.

1. Question paper will comprise of total **six questions, each carrying 20 marks.**
2. **Question 1** will be **compulsory** and should **cover maximum contents of the curriculum.**
3. **Remaining questions will be mixed in nature** (for example if Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).
4. Only **Four questions need to be solved.**

Course Code	Course Name	Credits
PEDO8012	Product Design and Industrial Marketing	03

Objectives

1. To acquaint with various approaches in designing and developing new products.
2. To familiarize with various software solutions for designing and developing products.
3. To familiarize with modern approaches like concurrent engineering, product life cycle management, robust design, rapid prototyping / rapid tooling, etc.
4. To familiarize with characteristics of business markets, buying situations, trends in industrial marketing and relevant industrial strategies.

Outcomes: Learner will be able to:

1. Design and develop products right from the conceptual level.
2. Demonstrate concept of computer aided product design approach.
3. Illustrate various modern approaches like concurrent engineering, product life cycle management, robust design, rapid prototyping / rapid tooling.
4. Analyze products based on ergonomics and aesthetic aspects.
5. Apply appropriate strategies in industrial marketing.
6. Demonstrate various aspects related to Industrial Marketing Communication, Advertising, Sales promotion, Publicity Media Plan.

Module	Contents	Hrs.
01	<p>1.1. Introduction: Definition of product design, Classification of products, Design by evolution, Design by innovation, Product Mix, Various phases in product development and Design, Morphology of Design, Considerations in product design, Product specifications.</p> <p>1.2. Conceptual Design: Market research, Generation, Selection and Embodiment of concept, Product Architecture, Customer centric product designing</p> <p>1.3. Creativity: Role of creativity in problem solving, Vertical and lateral thinking, Brain storming, Syntectics, Group working dynamics, Adaptation to changing scenarios in economics, social, cultural and technological fronts, Anticipation of new needs and aspirations.</p> <p>1.4. Materials: Overview of materials including new generation materials, Tailor made material concepts, Material selection process.</p>	05
02	<p>2.1. Design for manufacturing (DFM): Guidelines and Methodology, Producibility requirements, Accuracy and Precision requirements, Strength considerations in Design: Criteria and objectives, Designing for uniform strength, Designing for stiffness and rigidity, Practical ideas for material saving in design - ribs, corrugations, rim shapes, bosses, laminates, etc.</p> <p>2.2. Design for forged and Cast components, Design for Sheet Metal processed components, powder metallurgical components, Expanded metals and wire forms</p> <p>2.3. Designing with plastics: Mechanical behavior, special characteristics and considerations, Design concepts for product features to be manufactured by various production process technologies, Special considerations for designing of components for load bearing applications,</p> <p>2.4. Other DFX Principles: Designs for Maintainability, Safety, Reliability, Sustainable Design</p> <p>2.5. Design for Assembly (DFA): DFA Index, Analysis of assembly requirements, Standardization, Ease of Assembly and disassembly, Design for bolted, welded and riveted components, Design for hinge and snap fit assemblies, maintenance, consideration of handling and safety, Modular concepts.</p>	09

03	<p>3.1. Product Ergonomics: Anthropometry, Environmental conditions, thermal, noise, vibration, displays, illusions, Psycho and psychological aspects in design, Man-machine information exchange.</p> <p>3.2. Product Aesthetics: Visual awareness, Form elements in context of product design, Concepts of size, shape and texture, Introduction to colour and colour as an element in design, Colour classifications and dimensions of colour, Colour combinations and colour dynamics, Interaction / communication of colours, Psychological aspects of colours, generation of products forms with analogies from nature.</p> <p>3.3. Product Graphics: Graphics composition and layout, Use of grids in graphics composition, Study of product graphics and textures.</p>	05
04	<p>4.1. Value Engineering: Product value and its importance, Value analysis job plan, Steps to problem solving and value analysis, Value analysis tests, Value Engineering idea generation check list, Material and process selection in value engineering, Cost reduction, case studies and exercises.</p> <p>4.2. Software solutions: Software for drafting, modeling, assembly, detailing, CAM interfacing, Rapid tooling/rapid prototyping, etc.</p> <p>4.3. Modern Applications: Concurrent Engineering, Robust Design, Additive Manufacturing/Rapid Prototyping, Product Life Cycle Management techniques and application areas.</p>	06
05	5.1 Introduction to Industrial Marketing, Understanding Industrial Markets, Nature of Industrial Buying, Industrial Market Segmentation, New Products and Established product strategies, Resource based and Value based strategy, Industrial Pricing: Price Determinants, Pricing Policies, Pricing Decisions, Pricing – Value based and Competition based.	07
06	<p>6.1. Industrial Marketing Channels: Channel participants, Channel effectiveness, Marketing logistics, Physical Distribution and Marketing Strategy, Value added market channels</p> <p>6.2. Industrial Marketing Communication, Advertising, Sales promotion, Publicity Media Plan, Integrated Promotion Plan, Industrial Sales force Management, Technical Support for Marketing – customer technical services and feedback.</p>	07

Course Code	Course Name	Credits
PEDO8013	World Class Manufacturing	03

Objectives

1. To familiarize with the concepts of Business excellence and competitiveness.
2. To apprise with the need to meet the business challenges and for being ready to meet the future manufacturing competition.
3. To acquaint with the current manufacturing scenario and the need to move from a domestic to a world class global manufacturer status.

Outcomes: Learner will be able to:

1. Illustrate relevance and basics of World Class Manufacturing.
2. Relate factors of competitiveness and performance measures based on which, global manufacturing success is bench marked.
3. Illustrate current Status of Indian Manufacturing scenario.
4. Design and develop a roadmap to achieve world class manufacturing status.

Module	Content	Hrs.
01	Philosophy of WCM World class organizations: Meaning of world class. Competitiveness and Performance measures. Criteria for world class organizations in Manufacturing. Competing in World markets. Review of frameworks in World Class Manufacturing (WCM). Models for manufacturing excellence: Schonberger, Halls, Gunn & Maskell models and Business Excellence.	06
02	Benchmark, Bottlenecks and Best Practices Concepts of benchmarking, Bottleneck & best practices. Best performers, Gaining competitive edge through world class manufacturing, Value Added manufacturing, Value Stream mapping, Eliminating different types of waste. Lean Thinking (Toyota Production System), Six Sigma, Theory of Constraints.	06
03	System and Tools for World Class Manufacturing Improving Product & Process Design: SQC & SPC Tools. Statistical Process Control, Quality Function Deployment (QFD), Poka Yoke, 5-S, Optimizing Procurement & stores practices, JIT, KANBAN, Total Productive maintenance and Visual Control.	07
04	HR Dimensions in WCM – WCM Strategy Formulation Adding value to the organization: Organizational learning, techniques of removing Root cause of problems, People as problem solvers, New organizational structures. Associates: Facilitators, Teams man ship, Motivation and reward in the age of continuous improvement.	06
05	Characteristics of WCM Companies: Performance indicators like Performance Objectives-Production (POP), TOPP and Advance Manufacturing Business Implementation Tool for Europe (AMBITE) systems. Other features of WCM: Supply Chain Management & key issues in SCM, Agile Manufacturing, Green Manufacturing, Role of Information system in WCM, Introduction to Knowledge management, Study of various performance measures in world class organization.	07

06	<p>Framework for TQM: Customer Top Management Commitment, Employee involvement, Continuous process improvement, Supplier partnership, Performance measures.</p> <p>WCM - the Indian Scenario</p> <p>Case study discussions on leading Indian companies' efforts towards world class manufacturing and the task ahead.</p>	07

Course Code	Course Name	Credits
PEDO8014	Plant Engineering	03

Objectives

1. To acquaint with concepts of plant engineering and various plant organizing functions.
2. To familiarize with various types of maintenance work and systems in plant.
3. To acquaint with various methods of pollution, noise and vibration control.
4. To acquaint with concept and significance of sustainable approaches in plants.
5. To get conversant with approaches in material handling and plant safety.

Outcomes: Learner will be able to:

1. Design and plan plant layouts and organization for plant engineering.
2. Demonstrate selection and use of material handling systems in plant engineering.
3. Demonstrate various operational and safety practices including fire safety.
4. Illustrate concepts of pollution, noise and vibration control.
5. Apply sustainable approaches and practices.

Module	Contents	Hrs.
1.	INTRODUCTION: Plant Engineering functions, Organization for Plant Engineering, Plant layout – considerations and significance, plant utilities, utility structure, ventilation, heating, air-conditioning, exhaust systems, sanitation and house-keeping, communication and IT network,	06
2.	POLLUTION CONTROL: Types of industrial pollutants and pollutions – Solid, liquid, gaseous and noise pollutions, Regulatory standards and requirements, detection measurements and instrumentation, emission safety, emission controls, collection, storage and disposal of industrial waste, liquid waste, effluents–treatments and disposal, Managing poisonous vapors & gases-systems for handling and disposal, Operational noise and control of plant noise, Human response and noise, vibration and vibration control.	07
3.	MATERIAL HANDLING AND PLANNING: Material handling Equipment – Trolleys, Conveyers, fork lifts and cranes, Addressing material handling problems, Material Handling containerization – Automatic storage and Retrieval system. Use of AGU and Robots in material handling, Handling of powder and liquids – chutes and piping systems, vacuum conveying, Designing material handling projects.	07
4.	PLANT SAFETY: Significance of safety, organization for safety – Man, Machine and tool safety, Importance of house-keeping in safety. Safety tools and gadgets, Safety norms and safety practices. Safety monitoring and implementation of safe practices- use of safety posters and colors, plant fire hazard- Causes and prevention, Design and planning for fire safety, fire detectors and alarm system, special suppression systems, Firefighting- Accessibility for fire engines, firefighting gadgets – their use and maintenance. Training of employees on plant safety and fire hazards.	06
5.	PLANT MAINTENANCE: Organization for maintenance, Classification of maintenance – Break down maintenance, Preventive Maintenance and Total Productive Maintenance, Maintenance Planning and condition monitoring. Lubrication and Lubricants, types of Lubricants and selection, Lubricant systems, Basics of Corrosion and Corrosion prevention.	07

6.	SUSTAINABILITY: Introduction to sustainability and Sustainable approaches in plants, Approaches for carbon emission reduction carbon foot prints and carbon credits, Energy storage and energy conservation technologies, Enhancing energy efficiency through energy saving processes and design. Energy management and energy audits.	06
----	---	----

Course Code	Course Name	Credits
PEDO8015	Energy Management and Audit	03

Objectives:

1. To get conversant with basic concepts of energy, energy resources and significance of optimal use of energy.
2. To get acquainted with energy efficient technologies and energy storage technologies.
3. To enable the students to understand the concepts of energy management and energy management opportunities.
4. To get exposed to Energy laws, standards and energy auditing procedures.

Outcomes: The learner will be able to:

1. Practice energy efficient approaches in various fronts especially in manufacturing.
2. Develop competency in designing and developing energy efficient products and processes.
3. Will acquire knowledge in formulating energy policies and energy management.
4. Understand audit procedures and perform energy audit.

Module	Contents	Hours
1	Introduction: Basic concepts of energy, Types of energy – renewable and non-renewable, Sources of energy, importance of energy conservation –ongoing and futuristic trends, indigenous and global concerns and measures undertaken on energy front, types of industrial loads, optimal load scheduling, peak demand controls.	06
2	Energy Conservation Technologies: Energy storage technologies, Energy efficient approaches in appliances, instruments, manufacturing processes like machining, forging, metal casting, polymer moulding, Biomass conversion technologies and waste disposal.	06
3	Energy Efficiency: Energy efficient approaches in sectors like – transportation, air conditioning, power sectors, electrical utilities- lighting, drives, blowers & exhausts, heating & cooling systems. Energy efficient design, choice of energy efficient materials.	08
4	Energy Management: Objectives, energy policies -- purpose, formulation & ratification, managerial functions, role & responsibilities of energy managers, information system, energy instrumentation & information analysis, energy performance assessment, energy action planning, computer aided energy management.	07
5	Energy Laws & Standards: Provisions of Energy Conservation Act 2001, Nodal agencies – Bureau of Energy Efficiency (BEE) & State Designated Agencies (SDA), energy conservation schemes of BEE, promoting energy efficiency in SMEs, certification of energy managers & auditors, standards & Labelling.	07
6	Energy Audit: Definition, need, types of energy audit, energy audit instruments, ways to reduce energy consumption, benefits of energy audit, and ISO standards for energy auditing, areas covered under audit.	05

Assessment:**Internal Assessment for 20 marks:**

Consisting **Two Compulsory Class Tests**

1. First test based on approximately 40% of curriculum contents and second test based on remaining contents (approximately 40%, but excluding contents covered in Test I)
2. Total duration allotted for writing each of the paper is 1 hr.
3. Average of the marks scored in both the two tests will be considered for final grading.

End Semester Examination:

Course Code	Course Name	Credits
PEL801	Automation and Control Engineering Lab.	01

Objectives:

1. To familiarize with software based pneumatics, electro-pneumatics and PLC circuits' simulation.
2. To familiarize with setup and execution of pneumatics, electro-pneumatics and PLC circuits on an experimental kit.

Outcomes: The learner will be able to:

1. Design & Simulate Pneumatic, Electro-Pneumatic and PLC based circuits on any compatible software.
2. Setup and execute Pneumatic, Electro-Pneumatic and PLC based circuits on an experimental kit.
3. Design & Simulate PLC based circuits (Ladder Diagram) on any compatible software.
4. Set up and execute Pneumatic circuits on an experimental kit.
5. Set up and execute electro-pneumatic circuits on an experimental kit.
6. Set up and execute PLC based circuit on an experimental kit.

Sr. No	Circuit Design / Assignment
1	Designing of the basic Pneumatic circuit – minimum 3 circuits
2	Designing of the basic Pneumatic circuit including flow control valves - minimum 3 circuits
3	Multiple cylinder pneumatic circuits with Simulation in any software- minimum 3 circuits
4	Designing of the basic Electro-Pneumatic circuit- minimum 3 circuits
5	Designing of the basic Electro-Pneumatic circuit including timer and counters- minimum 3 circuits
6	PLC based Circuit design - minimum 2 circuits

Term Work:

Term work shall consist of exercises listed in the above list

The distribution of marks for term work shall be as follows:

Circuit Simulation:	10 marks
Circuit Setup and Execution:	10 marks
Attendance:	05 marks

The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

Practical/Oral Exam:

The practical/Oral exam shall consist of the following;

Circuit Simulation: one problem:	15 marks
Circuit Setup and Execution: one problem:	10 marks

Course Code	Course Name	Credits
PEL802	Computer Aided Engineering Lab.	01

Objectives:

1. To introduce the concepts of computer aided engineering for design & manufacture and familiarize them with mathematical basis of computer graphics.
2. To impart knowledge on computer graphics, which are used routinely in diverse areas like science, engineering, medicine etc.
3. The aim is to provide the students with knowledge of the finite element method that will be of use in different manufacturing areas and to provide a foundation for further study

Outcomes: Learner will be able to....

1. Understand software configuration of graphic packages.
2. Understand use of Computer graphics in design.
3. Identify proper modeling techniques for geometric modeling
4. Solve physical and engineering problems with emphasis on Structural and Thermal Engineering applications.

List of Experiment:

1. Solid modeling using any 3D modeling software
2. Assembly of solid modelling using 3D modelling software.
3. Shape optimization using FEA software.
4. Structural analysis using FEA software.

Term Work:

Term work shall consist of

1. Assignments: On topics drawn from syllabus [At least 1 assignment per module].
2. Practical: Minimum six experiments are to be conducted based on the list of experiments.

The distribution of marks for term work shall be as follows:

Laboratory work (Experiment/ programs and journal):	10 marks
Assignments:	10 marks
Attendance (Theory and Practical):	05 marks
TOTAL:	25 marks

The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

Course Code	Course Name	Credits
ILO8021	Project Management	03

Objectives:

1. To familiarize the students with the use of a structured methodology/approach for each and every unique project undertaken, including utilizing project management concepts, tools and techniques.
2. To appraise the students with the project management life cycle and make them knowledgeable about the various phases from project initiation through closure.

Outcomes: Learner will be able to...

1. Apply selection criteria and select an appropriate project from different options.
2. Write work break down structure for a project and develop a schedule based on it.
3. Identify opportunities and threats to the project and decide an approach to deal with them strategically.
4. Use Earned value technique and determine & predict status of the project.
5. Capture lessons learned during project phases and document them for future reference

Module	Details	Hrs.
01	Project Management Foundation: Definition of a project, Project Vs Operations, Necessity of project management, Triple constraints, Project life cycles (typical & atypical) Project phases and stage gate process. Role of project manager, Negotiations and resolving conflicts, Project management in various organization structures, PM knowledge areas as per Project Management Institute (PMI)	5
02	Initiating Projects: How to get a project started, Selecting project strategically, Project selection models (Numeric /Scoring Models and Non-numeric models), Project portfolio process, Project sponsor and creating charter; Project proposal. Effective project team, Stages of team development & growth (forming, storming, norming & performing), team dynamics.	6
03	Project Planning and Scheduling: Work Breakdown structure (WBS) and linear responsibility chart, Interface Co-ordination and concurrent engineering, Project cost estimation and budgeting, Top down and bottoms up budgeting, Networking and Scheduling techniques. PERT, CPM, GANTT chart, Introduction to Project Management Information System (PMIS).	8
04	Planning Projects: Crashing project time, Resource loading and levelling, Goldratt's critical chain, Project Stakeholders and Communication plan Risk Management in projects: Risk management planning, Risk identification and risk register, Qualitative and quantitative risk assessment, Probability and impact matrix. Risk response strategies for positive and negative risks	6

05	<p>5.1 Executing Projects: Planning monitoring and controlling cycle, Information needs and reporting, engaging with all stakeholders of the projects, Team management, communication and project meetings</p> <p>5.2 Monitoring and Controlling Projects: Earned Value Management techniques for measuring value of work completed; Using milestones for measurement; change requests and scope creep, Project audit</p> <p>5.3 Project Contracting Project procurement management, contracting and outsourcing,</p>	8
----	--	---

Assessment:

Internal Assessment for 20 marks:

Consisting Two Compulsory Class Tests

First test based on approximately 40% of contents and second test based on remaining contents (approximately 40% but excluding contents covered in Test I)

End Semester Examination:

Weightage of each module in end semester examination will be proportional to number of respective lecture hours mentioned in the curriculum.

1. Question paper will comprise of total **six questions, each carrying 20 marks**
2. **Question 1** will be **compulsory** and should **cover maximum contents of the curriculum**
3. **Remaining questions will be mixed in nature** (for example if Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
4. Only **Four questions need to be solved**

Course Code	Course Name	Credits
ILO8026	Research Methodology	03

Objectives:

1. To understand Research and Research Process
2. To acquaint students with identifying problems for research and develop research strategies
3. To familiarize students with the techniques of data collection, analysis of data and interpretation

Outcomes: Learner will be able to...

1. Prepare a preliminary research design for projects in their subject matter areas
2. Accurately collect, analyze and report data
3. Present complex data or situations clearly
4. Review and analyze research findings

Module	Details	Hrs
01	Introduction and Basic Research Concepts 1.1 Research – Definition; Concept of Construct, Postulate, Proposition, Thesis, Hypothesis, Law, Principle. Research methods vs Methodology 1.2 Need of Research in Business and Social Sciences 1.3 Objectives of Research 1.4 Issues and Problems in Research 1.5 Characteristics of Research: Systematic, Valid, Verifiable, Empirical and Critical	09
02	Types of Research 2.1. Basic Research 2.2. Applied Research 2.3. Descriptive Research 2.4. Analytical Research 2.5. Empirical Research 2.6 Qualitative and Quantitative Approaches	07
03	Research Design and Sample Design 3.1 Research Design – Meaning, Types and Significance 3.2 Sample Design – Meaning and Significance Essentials of a good sampling Stages in Sample Design Sampling methods/techniques Sampling Errors	07
04	Research Methodology 4.1 Meaning of Research Methodology 4.2. Stages in Scientific Research Process: a. Identification and Selection of Research Problem b. Formulation of Research Problem c. Review of Literature d. Formulation of Hypothesis e. Formulation of research Design f. Sample Design g. Data Collection h. Data Analysis i. Hypothesis testing and Interpretation of Data j. Preparation of Research Report	08

05	Formulating Research Problem 5.1 Considerations: Relevance, Interest, Data Availability, Choice of data, Analysis of data, Generalization and Interpretation of analysis	04
06	Outcome of Research 6.1 Preparation of the report on conclusion reached 6.2 Validity Testing & Ethical Issues 6.3 Suggestions and Recommendation.	04

Assessment:

Internal Assessment for 20 marks:

Consisting Two Compulsory Class Tests

First test based on approximately 40% of contents and second test based on remaining contents (approximately 40% but excluding contents covered in Test I)

End Semester Examination:

Weightage of each module in end semester examination will be proportional to number of respective lecture hours mentioned in the curriculum.

1. Question paper will comprise of total **six questions, each carrying 20 marks**
2. **Question 1** will be **compulsory** and should **cover maximum contents of the curriculum**
3. **Remaining questions will be mixed in nature** (for example if Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
4. Only **Four questions need to be solved.**

Course Code	Course Name	Credits
ILO8027	IPR and Patenting	03

Objectives:

1. To understand intellectual property rights protection system
2. To promote the knowledge of Intellectual Property Laws of India as well as International treaty procedures
3. To get acquaintance with Patent search and patent filing procedure and applications

Outcomes: Learner will be able to...

1. understand Intellectual Property assets
2. assist individuals and organizations in capacity building
3. work for development, promotion, protection, compliance, and enforcement of Intellectual Property and Patenting

Module	Details	Hrs
01	Introduction to Intellectual Property Rights (IPR): Meaning of IPR, Different category of IPR instruments - Patents, Trademarks, Copyrights, Industrial Designs, Plantvariety protection, Geographical indications, Transfer of technology etc. Importance of IPR in Modern Global Economic Environment: Theories of IPR, Philosophical aspects of IPR laws, Need for IPR, IPR as an instrument of development	05
02	Enforcement of Intellectual Property Rights: Introduction, Magnitude of problem, Factors that create and sustain counterfeiting/piracy, International agreements, International organizations (e.g. WIPO, WTO) active in IPR enforcement Indian Scenario of IPR: Introduction, History of IPR in India, Overview of IP laws in India, Indian IPR, Administrative Machinery, Major international treaties signed by India, Procedure for submitting patent and Enforcement of IPR at national level etc.	07
03	Emerging Issues in IPR: Challenges for IP in digital economy, e-commerce, human genome, biodiversity and traditional knowledge etc.	05
04	Basics of Patents: Definition of Patents, Conditions of patentability, Patentable and non-patentable inventions, Types of patent applications (e.g. Patent of addition etc), Process Patent and Product Patent, Precautions while patenting, Patent specification Patent claims, Disclosures and non-disclosures, Patent rights and infringement, Method of getting a patent	07
05	Patent Rules: Indian patent act, European scenario, US scenario, Australia scenario, Japan scenario, Chinese scenario, Multilateral treaties where India is a member (TRIPS agreement, Paris convention etc.)	08
06	Procedure for Filing a Patent (National and International): Legislation and Salient Features, Patent Search, Drafting and Filing Patent Applications, Processing of patent, Patent Litigation, Patent Publication, Time frame and cost, Patent Licensing, Patent Infringement Patent databases: Important websites, Searching international databases	07

Assessment:

Internal Assessment for 20 marks:

Consisting Two Compulsory Class Tests

First test based on approximately 40% of contents and second test based on remaining contents (approximately 40% but excluding contents covered in Test I)

End Semester Examination:

Weightage of each module in end semester examination will be proportional to number of respective lecture hours mentioned in the curriculum.

1. Question paper will comprise of total **six questions, each carrying 20 marks**
2. **Question 1** will be **compulsory** and should **cover maximum contents of the curriculum**
3. **Remaining questions will be mixed in nature** (for example if Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
4. Only **Four questions need to be solved.**

Course Code	Course Name	Credits
ILO8029	Environmental Management	03

Objectives:

1. Understand and identify environmental issues relevant to India and global concerns
2. Learn concepts of ecology
3. Familiarise environment related legislations

Outcomes: Learner will be able to...

1. Understand the concept of environmental management
2. Understand ecosystem and interdependence, food chain etc.
3. Understand and interpret environment related legislations.

Module	Details	Hrs
01	Introduction and Definition of Environment: Significance of Environment Management for contemporary managers, Career opportunities, Environmental issues relevant to India, Sustainable Development, the Energy scenario	10
02	Global Environmental concerns : Global Warming, Acid Rain, Ozone Depletion, Hazardous Wastes, Endangered life-species, Loss of Biodiversity, Industrial/Man-made disasters, Atomic/Biomedical hazards, etc.	06
03	Concepts of Ecology: Ecosystems and interdependence between living organisms, habitats, limiting factors, carrying capacity, food chain, etc.	05
04	Scope of Environment Management, Role and functions of Government as a planning and regulating agency Environment Quality Management and Corporate Environmental Responsibility	10
05	Total Quality Environmental Management, ISO-14000, EMS certification.	05
06	General overview of major legislations like Environment Protection Act, Air (P & CP) Act, Water (P & CP) Act, Wildlife Protection Act, Forest Act, Factories Act, etc.	03

Assessment:

Internal Assessment for 20 marks:

Consisting **Two Compulsory Class Tests**

First test based on approximately 40% of contents and second test based on remaining contents (approximately 40% but excluding contents covered in Test I)

End Semester Examination:

Weightage of each module in end semester examination will be proportional to number of respective lecture hours mentioned in the curriculum.

1. Question paper will comprise of total **six questions, each carrying 20 marks**
2. **Question 1** will be **compulsory** and should **cover maximum contents of the curriculum**
3. **Remaining questions will be mixed in nature** (for example if Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
4. Only **Four questions need to be solved**.
