AC – 20/04/2024 Item No. – 6.7 Sem. II (1a)

## As Per NEP 2020

## Name of the Course: Calculus-I (Minor I) (Sem II)

|            |   | <u>m 11)</u>  |  |
|------------|---|---|--|
| Sr.<br>No. | Heading   | Particulars   |  |
| 1          | Description the course:<br>Including but not limited to:  | This course covers fundamental concepts in<br>calculus and number theory. It includes a<br>review of the real number system, graphing<br>various functions, understanding limits,<br>continuity, and exploring bijective functions.<br>Additionally, the course delves into integers,<br>divisibility, functions, and basic principles of<br>induction, with applications to number theory,<br>congruence, and theorems like Euler's and<br>Fermat's. |  |
| 2          | Vertical:   | Minor   |  |
| 3          | Туре:   | Theory  |  |
| 4          | Credits:  | 2 credits<br>(1 credit = 15 Hours for Theory or 30 Hours<br>of Practical work in a semester)  |  |
| 5          | Hours Allotted:   | 30 Hours  |  |
| 6          | Marks Allotted:   | 50 Marks  |  |
| 7          | <ul> <li>Course Objectives (CO): (List the course objectives)</li> <li>This course gives introduction to basic concepts of Analysis with rigor and prepares students to study further courses in Analysis. In this course, importance is given to formal proofs which also enhances understanding of the subject of Mathematics as a whole.</li> <li>CO1. To give sufficient knowledge of fundamental principles, methods, and a clear perception of numerous powers of mathematical ideas and tools and the skills to use them by modelling, solving and interpreting.</li> <li>CO2. To reflect the broad nature of the subject and develop mathematical tools for continuing further study in various fields of sciences.</li> <li>CO3. To enhance students' overall development, problem solving skills, creative talent and power of communication are necessary for various kinds of employment.</li> <li>CO4. To give adequate exposure to global and local concerns that would help learners explore many aspects of Mathematical Sciences.</li> </ul> |   |  |
| 8          | limits and continuity of function   | ts will be able to<br>of functions and understand the concepts of   |  |

OC3: apply differential equations to solve real life problems.

|   | OC4: verify existence of limit, continuity of a functions and solutions of  |  |  |  |  |  |
|---|---|--|--|--|--|--|
|   | differential equations.<br>OC5: find the limits of various functions and integrating factors along with general   |  |  |  |  |  |
|   | solutions of differential equations.  |  |  |  |  |  |
|   | OC6: construct counter examples related to continuous and discontinuous functions   |  |  |  |  |  |
|   | etc.  |  |  |  |  |  |
| 9 | Modules   |  |  |  |  |  |
|   | Module 1: Graphs of Functions, Limits and Continuity of Real Valued Functions   |  |  |  |  |  |
|   | (15 Hours)  |  |  |  |  |  |
|   | (1) Review of real number system, intervals, graphs of functions such that $ x $ , $\frac{1}{x}$ ,  |  |  |  |  |  |
|   | $ax^{2} + bx + c$ , [x] (flooring functions), [x] (ceiling function), $x^{3}$ , sinx, cosx,   |  |  |  |  |  |
|   | $tanx, \sin\left(\frac{1}{x}\right), xsin\left(\frac{1}{x}\right)$ over suitable intervals.   |  |  |  |  |  |
|   | (2) Graphs of bijective function and its inverse. Examples such as $x^2$ and $x^{\frac{1}{2}}$ , $x^3$  |  |  |  |  |  |
|   | and $x^{\frac{1}{3}}$ , $ax + b$ ( $a \neq 0$ ) and $\frac{1}{a}x - \frac{b}{a}$ over suitable domains.<br>(3) (i) Idea of limits, algebra of limits.   |  |  |  |  |  |
|   | (i) Sandwich theorem of limits (without proof).   |  |  |  |  |  |
|   | (ii) Limits at infinity and infinite limits.  |  |  |  |  |  |
|   | (4) (i) Continuity of a real valued function at a point in terms of limits, two sided   |  |  |  |  |  |
|   | limits, graphical representation of continuity, standard continuous functions like exponential, logarithmic, trigonometric, polynomial and rational functions.  |  |  |  |  |  |
|   | (ii) Continuity of a real valued function at end points of the domain.  |  |  |  |  |  |
|   | (iii) Discontinuity and its types.  |  |  |  |  |  |
|   | (iv) Algebra of continuous functions (without proof).   |  |  |  |  |  |
|   | (v) Intermediate value property (without proof).  |  |  |  |  |  |
|   | Module 2: First Order First Degree Differential Equations (15 Hours)  |  |  |  |  |  |
|   | Review of Definition of a differential equation, order, degree, ordinary differential equation, linear and non-linear ODE. Solution of homogeneous and non-homogeneous differential equations of first order and first degree. Notion of partial derivatives.<br>Exact Equations: General solution of Exact equations of first order and first degree. Necessary and sufficient condition for $Mdx + Ndy = 0$ to be exact. Non-exact equations: Rules for nding integrating factors (without proof) for non exact equations, such as: |  |  |  |  |  |
|   | i) $\frac{1}{Mx+Ny}$ is an I.F. if $Mx + Ny \neq 0$ and $Mdx + Ndy = 0$ is homogeneous.   |  |  |  |  |  |
|   | ii) $\frac{1}{Mx - Ny}$ is an I.F. if $Mx - Ny \neq 0$ and $Mdx + Ndy = 0$ is of the form   |  |  |  |  |  |
|   | $f_1(x, y) y  dx + f_2(x, y)  x dy = 0.$  |  |  |  |  |  |
|   | iii) $e^{\int f(x)dx}$ (resp $e^{\int g(y)dy}$ ) is an I.F. if $N \neq 0$ (resp $M \neq 0$ ) and $\frac{1}{N} \left( \frac{\partial M}{\partial y} - \frac{\partial N}{\partial x} \right)$   |  |  |  |  |  |
|   | $\left(\frac{1}{M}\left(\frac{\partial M}{\partial y}-\frac{\partial N}{\partial x}\right)\right)$ is a function of $x$ (resp $y$ ) alone, say $f(x)$ (resp $g(y)$ ).   |  |  |  |  |  |
|   | iv) Linear and reducible linear equations of first order, finding solutions of first<br>order differential equations of the type for applications to orthogonal<br>trajectories, population growth, and finding the current at a given time.  |  |  |  |  |  |
